# 1. INTRODUCTION AND SUMMARY OF RECOMMENDATIONS

---

## *Purpose of the Capital Improvement Plan (CIP)*

The Capital Improvement Plan (CIP) is a five-year program for expenditures by the City of New Orleans for permanent physical improvements. The CIP is prepared and adopted annually by the City Planning Commission and is presented as a recommendation to the Mayor and the City Council. Each year, the plan identifies the physical needs of the City's agencies, estimates the costs of proposed projects, and recommends expenditures and sources of funding for priority capital improvements. As such, the CIP plays an integral role in the process of formulating the City's annual capital budget.

Projects considered through the CIP process involve proposed investments in the City's infrastructure and facilities, such as streets, police and fire stations, parks and recreation facilities, libraries, community centers, offices, sanitation facilities, museums and cultural facilities. Although not defined in the Home Rule Charter, capital improvements are referred to there as "permanent physical improvements" and have conventionally been considered by the City as improvements that are expected to have a normal life of ten years or longer.<sup>1</sup> Equipment and objects needed for day-to-day use by City agencies are generally not considered capital improvements. Smaller projects and projects that are intended to last for fewer than ten years are generally funded through the City's operating budget.

## *Legal Foundation*

The City Planning Commission is required under Section 5-402 (4) of the Home Rule Charter of the City of New Orleans to prepare the City's capital improvement plan and to assist the Chief Administrative Officer in the preparation of the annual capital budget. The Home Rule Charter further requires that the capital improvement plan and the capital budget be consistent with the City's Master Plan.

---

<sup>1</sup> The proposition that enabled the sale of general obligation bonds in 2004 also specifically stated that the funds could only be used for projects that would have a normal life or ten years or longer. City Council Resolution No. R-04-648, Section 2.

## ***CIP Development Process***

### ***Process Overview and Submittal of Funding Requests***

Each year, the City's Chief Administrative Officer issues a memorandum setting forth the process and schedule for the preparation and adoption of the City's capital budget. Beginning in April of 2012, each agency of the City was asked to meet with representatives of the Capital Projects Administration for assistance with the preparation of capital budget requests. On June 15<sup>th</sup>, the Capital Projects Administration transmitted copies of all completed capital budget request forms to the City Planning Commission staff. Each request form included the reasons for each proposed improvement project, its estimated acquisition and construction costs, the estimated costs of annual operation and maintenance for the facility, the proposed dates of initiation and completion of the project, the source of funding required for the project in each of the following five years, and the agency's priority rating for the project. The priority rating is based on scores assigned by the agency for each of seventeen rating categories, including *Public Health and Safety*, *Percent of Population Served by Project*, *Availability of Financing*, *Relation to Adopted Plans*, and *Public Support*, among others.

### ***Public Hearings with Requesting Agencies***

Between June 18<sup>th</sup> and July 13<sup>th</sup>, the City Planning Commission staff held public hearings with representatives of each agency that had submitted a request. The hearings were intended to provide further background information on each proposed project, answer questions, and obtain input from the public. On July 16<sup>th</sup>, the Chief Administrative Officer provided the City Planning Commission staff with a statement of the funds that were likely to be available for capital expenditures between 2013 and 2017, including bond issues, federal and state grants, insurance proceeds, FEMA reimbursements, and miscellaneous capital funds generated from the sale of City property.

### ***City Staff Analysis and Draft Plan Preparation***

The City Planning Commission staff then performed a detailed analysis of the requests and prepared the draft capital improvement plan. This year's CIP, similar to the ones for 2006 through 2012, was the product of strong collaboration between the staff of the City Planning Commission and the staffs of the Capital Projects Administration, the office of the Deputy Mayor for Facilities, Infrastructure, and Community Development, and each of the agencies that submitted a capital improvement proposal.

### *Consideration and Adoption by the City Planning Commission*

The City Planning Commission staff then presented an initial draft of the plan to the City Planning Commission's Planning and Special Projects Committee, which worked with the staff to provide guidance and set priorities. The staff then prepared the draft plan for presentation at the City Planning Commission's public hearing on September 25<sup>th</sup>, 2012. Following the public hearing, the City Planning Commission will consider and adopt the plan with final recommendations. The City Planning Commission will then forward the plan to the Mayor on September 30<sup>th</sup> as directed by the Chief Administrative Officer. Upon receipt of the CIP, the Mayor will prepare a message to the City Council setting forth his recommendations, which will be transmitted by the Chief Administrative Officer along with a proposed capital budget ordinance for 2013. The City Council will consider the CIP and will adopt a capital budget for 2013 prior to its adoption of the City's operating budget, which must occur no later than December 1<sup>st</sup>, 2012.

### *Capital Improvement Plan Funding Sources*

The proposed 2013-2017 Capital Improvement Plan has a total source of funds of \$447,619,124. This figure constitutes the sum of six separate funding sources. The amount of each funding source by year is provided in Section 2.2 of the Capital Improvement Plan report. A brief explanation of each funding source is provided below.

#### *General Obligation Bonds*

On November 2, 2004, the voters of the City of New Orleans approved the issuance of up to \$260 million of general obligation bonds to finance capital improvements throughout the city. Through last year, the City was able to issue \$115 million of those bonds. The Capital Projects Administration has indicated that the City intends to issue another \$40 million of general obligation bonds toward the end of 2012 to finance capital improvements that were approved in the 2012 capital budget ordinance. The City plans to issue \$40 million of general obligation bonds in 2013, \$35 million in 2014, and the remaining \$30 million in 2015.

The bonds were approved for allocation among four purposes: \$162,900,000 for streets and related infrastructure, \$43,545,000 for parks and recreation facilities, \$8,100,000 for libraries, and \$45,455,000 for other public buildings and facilities. Within these categories, the amounts of general obligation bond funds that remain to be issued are as follows: \$70,025,154 for streets and related infrastructure, \$15,183,357 for parks and recreation facilities, \$2,840,000 for libraries, and \$16,951,489 for other public buildings and facilities. Prior to the election, the City published a list of projects that could be funded with the proceeds from the sale of the bonds. Several of the projects have since been funded with bond funds or a mixture of bond funds and FEMA reimbursement funds, and some were for facilities or services that are no longer operated or provided by the City. Recommendations for the use of funds from general obligation bonds are indicated in this report with the term "Bond" next to the amount.

### *FEMA Reimbursement Funds*

Federal Emergency Management Agency (FEMA) Public Assistance funds continue to present a challenge in determining project priorities and funding. Because obligations from FEMA are revised on an ongoing basis, projects budgets fluctuate and amendments to the capital budget ordinance are necessary throughout the year. The total forecasted amount of FEMA reimbursement funds in this CIP is \$228,402,124. The majority of this funding – \$225,000,000 – is projected to come from reimbursements for street repair projects. FEMA reimbursement funds are indicated in this report with the designation “FEMA” next to the anticipated amount.

### *Self-Generated Funds and Federal Roadway Funds*

In addition to the sources listed above, several City agencies obtain funds for capital improvements from other sources, including self-generated revenues and federal and state grants. For example, the French Market and Upper Pontalba Building Restoration Corporations generate revenues sufficient to entirely fund their planned capital improvements. The Audubon Institute, the City Park Improvement Association, and the Municipal Yacht Harbor Management Corporation all have self-generated revenue sources that can be used to support some capital improvements, and the New Orleans Aviation Board and the Department of Public Works also receive funding for capital projects from federal and state grant programs. These funds are indicated in the report below with abbreviations to indicate their source: “FMC,” “NOAB,” and “UPF” for funds generated or obtained through grants by the French Market Corporation, the New Orleans Aviation Board, and the Upper Pontalba Building Restoration Corporation, respectively, and “FED” to indicate federal roadway funding for use by the Department of Public Works.

### *Miscellaneous Capital Funds and State Capital Outlay Funds*

Two other funding sources are also utilized for capital improvements: state capital outlays and miscellaneous capital funds. State capital outlays are funds provided by the State of Louisiana to government subdivisions to fund specific capital improvements as indicated in an annual Act of the State Legislature. State capital outlay funds are indicated by the abbreviation “SCO” in the report below. Finally, miscellaneous capital funds are other funds received and held by the City for the purposes of capital improvements. They generally consist of proceeds from the sale of City owned property. Miscellaneous capital funds are not a major source of capital funds, and generally amount to approximately \$200,000 each year. Recommendations for the use of miscellaneous capital funds are indicated in the report below by the abbreviation “MCF.”

## ***Overview of the 2013-2017 Capital Improvement Plan Allocation Recommendations***

An overview of capital improvement expenditures by program grouping is provided in Section 2.4 of the plan report. Highlights of the funding recommendations for each program grouping are presented below.

### ***Street Improvement Projects***

Street projects by the Department of Public Works again represent the largest portion of the CIP, with a total expenditure of \$312,525,154. The majority of this funding – \$225,000,000 – is expected to come from FEMA reimbursement funds for streets damaged as a result of Hurricane Katrina. Most of the rest of the funding for the Department of Public Works will come from the remaining approved general obligation bond funding for street projects, which amounts to just over \$70 million. A list of the various street projects planned by the Department of Public Works is provided as an appendix to the CIP report.

### ***Airport Improvement Projects***

The next largest category of funding in the CIP is for the Louis Armstrong New Orleans International Airport, which is operated by the New Orleans Aviation Board. The Aviation Board's funding, which is entirely self-generated, comes principally from federal and state sources. A major portion of the capital funding for the airport will be used to prepare for a major terminal expansion or new construction project as requested by the Mayor.

### ***Parks and Recreation Facilities***

The next largest category of funding is for parks and recreation facilities. The majority of this funding will come from the sale of bonds and will allow for the Department of Parks and Parkways and the New Orleans Recreation Development Commission to make improvements to a number of parks and recreation facilities across the city. Additional funding for projects at certain parks will come from State Capital Outlay funding. Funding in this category will also be used to dredge the municipal yacht harbor at the West End and for improvements at Audubon Park and City Park. Funding is also recommended for improvements at recreation sites that were included in the 2004 list of suggested bond projects that have not yet received bond funding. The CIP recommends that the remaining bond funds in this category be set aside for projects in future years that will be based on priorities established through the New Orleans Recreation Development Commission's upcoming master plan.

### *Public Safety Facilities*

Funding for improvements at several public safety facilities is also included in the plan. Bond funding will be used for major repairs to several fire stations throughout the city and for land acquisition to allow for the future consolidation of fire department stations. Bond funding will also be used to provide for a new facility to replace the New Orleans Police Department's Second District police station, which has deteriorated significantly and is not appropriately designed to accommodate the operations of a modern police department. Additional funding will be used to redevelop the department's shooting range at the Victor Schiro Municipal Training Academy. It is also important to note here that the New Orleans Fire Department is presently working with the administration to finalize a master plan for its future operations. Changes to the Capital Improvement Plan may be necessary in future years to address the results of this plan once it is formally adopted by the City.

### *Libraries and Museums*

Funding for libraries will allow for long overdue major repairs to the electrical and air conditioning systems of the Central Branch of the New Orleans Public Library. Bond funding will also be used to make repairs to the Nix branch library, which is the only remaining suggested bond-funded project from 2004 that has not yet been undertaken. Additionally, funding for the New Orleans Museum of Art will provide for major repairs to the building's heating, ventilation, and air conditioning systems and for major repairs to the interior of the structure.

### *Other Public Facilities*

Finally, funding for several other public facilities will be provided primarily through bond funds. One of the recurring needs identified by City agencies in this year's CIP process was for storage and warehousing space. The CIP recommends that bond funds be set aside for improvements to a portion of one of the structures at the Naval Support Activity East Bank site as the City continues to work toward a final redevelopment agreement for that property. Several agencies also identified funding requests for various improvements to City Hall, but the CPC is aware that long-term plans for that structure have not been finalized. The CIP recommends that a portion of the remaining unspent bond funds be set aside for City-owned buildings across the city, which would allow for repairs or improvements to City Hall at its current site or at another location if one is selected in the future. This category of funding would also allow for major repairs to other City buildings identified by the Department of Property Management.

### ***Master Plan Consistency***

The Home Rule Charter requires that the Capital Improvement Program, the capital budget, and any decision to construct a capital improvement must be consistent with the City's Master Plan.<sup>2</sup> The Charter specifically states that any decision to construct a capital improvement is consistent with the Master Plan if it: a) furthers, or at least does not interfere with, the goals, policies, and guidelines, including design guidelines, that are contained in the Land Use Element of the Master Plan, and b) is compatible with the proposed future land uses, densities, and intensities designated in the Land Use Element of the Master Plan. Capital Improvement Program project proposals therefore must be certified by the City Planning Commission as consistent with the Master Plan's Land Use Plan in order to be recommended for funding. Proposed projects may also be supported by goals and policies of other elements of the Master Plan, including those pertaining to environmental quality, green infrastructure, economic development, community facilities and infrastructure, and transportation. Finally, it is important to note that some requests are for projects without a selected location. In these cases, Master Plan consistency can only be certified with respect to policies supporting the proposed improvement. Funds for property acquisition may be recommended, but the specific location and design of the proposed facility must be certified by the City Planning Commission prior to undertaking the project.

### ***Conclusion***

Aside from pending reimbursements for street projects, federal disaster-related funding will be coming to an end in the early part of the five-year period of this Capital Improvement Plan. Additionally, the last of the remaining general obligation bond funds approved by voters in 2004 are planned to be issued in 2015. With the exception of ongoing FEMA-funded street projects, capital budgets for the years 2016 and beyond are predicted to return to levels similar to those prior to Hurricane Katrina. Additional bond issues and new revenue sources will have to be identified in the future in order to continue street improvement programs, ensure adequate maintenance of public infrastructure, and provide for new facilities.

The second section of the Capital Improvement Plan report provides summaries of the sources and uses of capital funds for each of the next five years by agency and program category. Additional summaries are provided for the use of general obligation bond funds by agency and by voter-approved purpose. The third section of the report provides Master Plan consistency determinations and detailed funding recommendations for each capital project request from each agency. Finally, the plan report includes appendices with a list of street improvement projects planned by the Department of Public Works and the status of ongoing capital improvement projects from previous years.

---

<sup>2</sup> Sections 5-402 (4) and 5-404 (3) (c) of the Home Rule Charter of the City of New Orleans.

## 2.1. SUMMARY OF CAPITAL FUND REVENUES BY SOURCE, 2013-2017

FUNDING SOURCE	2013	2014	2015	2016	2017	TOTALS
General Obligation Bonds (Bond)	\$40,000,000	\$35,000,000	\$30,000,000	\$0	\$0	\$105,000,000
FEMA Reimbursements (FEMA)	\$46,454,372	\$69,004,541	\$52,269,841	\$38,013,666	\$22,659,704	\$228,402,124
Federal Roadway Funds (FED)	\$2,500,000	\$15,000,000	\$0	\$0	\$0	\$17,500,000
State Capital Outlay Funds (SCO)	\$860,000	\$1,215,000	\$0	\$0	\$0	\$2,075,000
Miscellaneous Capital Funds (MCF)	\$200,000	\$200,000	\$200,000	\$200,000	\$200,000	\$1,000,000
Self-Generated Funds (FMC, NOAB, UPBRC)	\$13,640,000	\$57,438,000	\$10,988,000	\$10,938,000	\$638,000	\$93,642,000
<b>TOTALS</b>	<b>\$103,654,372</b>	<b>\$177,857,541</b>	<b>\$93,457,841</b>	<b>\$49,151,666</b>	<b>\$23,497,704</b>	<b>\$447,619,124</b>

## 2.2. RECOMMENDED CAPITAL IMPROVEMENT EXPENDITURES BY FUNDING SOURCE

FUNDING SOURCE	AMOUNT OF REQUESTED FUNDING	AMOUNT OF EXPENDITURES RECOMMENDED BY CITY PLANNING COMMISSION					TOTALS
		2013	2014	2015	2016	2017	
General Obligation Bonds (Bond)	\$389,513,418	\$40,000,000	\$35,000,000	\$30,000,000	\$0	\$0	\$105,000,000
FEMA Reimbursements (FEMA)	\$228,712,163	\$46,454,372	\$69,004,541	\$52,269,841	\$38,013,666	\$22,659,704	\$228,402,124
Federal Roadway Funds (FED)	\$17,500,000	\$2,500,000	\$15,000,000	\$0	\$0	\$0	\$17,500,000
State Capital Outlay Funds (SCO)	\$2,075,000	\$860,000	\$1,215,000	\$0	\$0	\$0	\$2,075,000
Miscellaneous Capital Funds (MCF)	\$1,958,445	\$200,000	\$200,000	\$200,000	\$200,000	\$200,000	\$1,000,000
Self-Generated Funds (FMC, NOAB, UPBRC)	\$93,642,000	\$13,640,000	\$57,438,000	\$10,988,000	\$10,938,000	\$638,000	\$93,642,000
<b>TOTALS</b>	<b>\$733,401,026</b>	<b>\$103,654,372</b>	<b>\$177,857,541</b>	<b>\$93,457,841</b>	<b>\$49,151,666</b>	<b>\$23,497,704</b>	<b>\$447,619,124</b>

### 2.3. RECOMMENDED CAPITAL IMPROVEMENT EXPENDITURES BY AGENCY

AGENCY	AMOUNT OF REQUESTED FUNDING	AMOUNT OF EXPENDITURES RECOMMENDED BY CITY PLANNING COMMISSION					TOTALS
		2013	2014	2015	2016	2017	
AUDUBON COMMISSION	\$8,742,673	\$0	\$400,000	\$0	\$0	\$0	\$400,000
DEPARTMENT OF CITY CIVIL SERVICE	\$11,088	\$0	\$0	\$0	\$0	\$0	\$0
CITY COUNCIL	\$500,000	\$339,279	\$0	\$0	\$0	\$0	\$339,279
CITY PARK IMPROVEMENT ASSOCIATION	\$3,373,500	\$0	\$700,000	\$0	\$0	\$0	\$700,000
EQUIPMENT MAINTENANCE DIV. (CAO)	\$32,115,267	\$0	\$0	\$0	\$0	\$0	\$0
EMERGENCY MEDICAL SERVICES (HEALTH)	\$5,300,000	\$0	\$0	\$0	\$0	\$0	\$0
FRENCH MARKET CORP.	\$2,892,000	\$810,000	\$808,000	\$458,000	\$408,000	\$408,000	\$2,892,000
OFFICE OF HOMELAND SEC. & EMERG. PREP.	\$59,500,000	\$0	\$0	\$0	\$0	\$0	\$0
OFFICE OF INF. TECH. & INNOVATION (CAO)	\$76,000,000	\$0	\$0	\$0	\$0	\$0	\$0
MUNICIPAL YACHT HARBOR MGMT CORP.	\$12,570,000	\$2,080,000	\$0	\$100,000	\$0	\$0	\$2,180,000
