STORIA PROJECT DELTA

Project Description

Delta is a conversation about land and people, and how the interactions between the two have shaped each other over time. Situated near the intersection of Bayou St. John and the Lafitte Greenway, the project sits at an historically vital fulcrum between land, water, and people. This project endeavors to talk about land within the context of Indigenous land use and knowledge, as well as throughout the history of the city of New Orleans. We are partnering on this project with the Friends of the Lafitte Greenway, who coordinates programming along the length of the Greenway. We would like the space to be both a literal bridge to the Clarity Park Project, but also a place to pause and consider where we have come from, where we are, and where we could go from here.
