
Warehouse Monument

1820 Tchoupitoulas Street

- 41 feet x 33 feet = 1,353 sq. ft.
- 320 sq. ft. of concert bricks
- 16 sq. ft. for center monument
- 224 cobble stone area (to emulate the makeup of Nuns Street)
- 720 sq. ft. of paver bricks or wash gravel finish
- 73 sq. ft. of 6" boarder

Base will be a concrete slab, approximately 5 inches thick, with a 6 inch wide lip the height of the thickness of the brick pavers (or wash gravel finish) and concert bricks, to receive the bricks and pavers.

Note: if we decide to go with washed gravel finish, then we may only need to recess those areas where the concert bricks and cobble stones will be placed.
