City Planning Commission  
City of New Orleans  
1300 Pedido Street, 1 Rm 7w03 I  
New Orleans LA 70112

August 3, 2015

Dear Commissioners:

East New Orleans neighborhood associations and community based representatives have worked diligently with City government over the last several years. We have worked on behalf of New Orleans East in the creation and development of the City’s new Master Plan and the newly adopted comprehensive zoning and development. The ink is barely dry on the documents and now there are attempts by commercial interests to make changes to zoning that can be considered as not being in the community’s best interest.

In particular, the owner of the site of the former Bern Mas apartments (10112-10200 Plainfield Drive) is seeking a zoning change of the vacant land tract from residential to commercial. In recent meetings with the community, Mr. Ramsey, the property owner, vaguely tells us that his plans are for hotel(s), fast food businesses and a sports rehab center, but fails to give any concrete specifics of any of his development plans. In his meeting with ENONAC this month, he revealed that it is his plan and intention to obtain commercial zoning for that tract and then subdivide it.

There are several problems that our community based organizations and neighborhood associations see with Mr. Ramsey’s land development objectives as he has relayed them to the community.

Foremost, ‘commercial’ re-zoning of this ‘residential’ tract will not bind Mr. Ramsey to construct what he says he will develop but will indefinitely allow construction of any type of business as long as it fits within the broad spectrum of commercial zoning. This allowance also extends to any future developer to whom he sells his subdivided parcels and leaves the community as a whole virtually voiceless in the business types that may take residence on the property.

Community organizations question how can it be in the best interest of our community to convert residential land to commercial when there are many commercially zoned tracts in the vicinity of Mr. Ramsey’s land that remain vacant. Business enterprises seeking to invest in our community can locate on existing commercially zoned property without disrupting the new comprehensive zoning guidelines that demand planned orderly development in our community.

---

*Sylvia Scineaux-Richard, President   Romona Baudy, 1<sup>st</sup> Vice President   Brenda Jackson, Ph.D., 2<sup>nd</sup> Vice President*  
*Karol Sanders, Treasurer   Lydia Leon, Secretary,*  
*Joan Heisser, Member -At-Large   Carroll Denesse, Member -At-Large*

Finally, in the community's opinion, Mr. Ramsey's business enterprise has what his neighbors consider a less than stellar history as a proprietor within our community. As the owner and manager of the now defunct Bern Mas apartments and the current owner of the vacant property, grounds maintenance of the tract was historically sub-par and has been virtually nonexistent post-Katrina. Mr. Ramsey can be viewed as a less than 'good neighbor as his property gave and continues to give our neighborhood a less than positive impression aesthetically by anyone driving thru the area via Interstate-10.

The general consensus of New Orleans East community organizations is that while we desire progress and improvements in New Orleans East, *'nothing is much better than something undesirable'*.

We have canvassed the neighbors that will be affected by this zoning change and have obtained signatures in opposition to this requested.

We are asking you not to support this zoning change based on the reasons stated above by the community.

Sincerely,

Sylvia Scineaux-Richard  
President

# DENY Zoning Change Request - 10112 Plainfield Dr. New Orleans, La

About this petition

I, the undersigned resident of Lake Barrington Subdivision New Orleans, Louisiana 70128, bounded by I-10 Service and Morrison Roads, Wright Road and Berg Canal, located within Councilmanic District "E" and Third Municipal District, hereby petition the City Planning Commission and City Council of New Orleans to take necessary actions to Deny the Zoning Change request by Family Resources of New Orleans, Inc. and James Ramsey for property located on Square 24; Lot 2-C2 and 2C-1 bearing municipal addresses 10112, 10100-10122, 10200-10222 Plainfield Road from **RM-2E Eastern New Orleans Residential District (adopted S-RS Suburban Single Family Residential District) to C-2 General Commercial District.**

I the undersigned OBJECT to the proposed request for the following reasons:

It is inconsistent with the current Land Use Category **RSF-Post (Residential Single Family Post-War) of The Plan for the 21st Century** (Masterplan). In accordance with **City Charter Section 5-404. - Master Plan (3) Legal Effects of Master Plan. (d) A Land Use Action is consistent with the Master Plan if the Land Use Action: (2) Is compatible with the proposed future land uses, densities, and intensities designated in the Land Use Element of the Master Plan.**

- As adjacent property owners we believe that our property rights and values will be adversely affected by a General Commercial zoning amendment at the proposed site.
- To rezone from low-density residential use to a General Commercial District, setback and height provisions, allowing for various ranges of higher density and intensity uses, will all contribute to altering the essential character of the neighborhood.
- According to the **US Standard State Zoning Enabling Act**, cities are empowered to regulate and restrict Land Uses for the purpose of promoting health, safety, morals and general welfare. So therefore, we believe that this rezoning is not being enacted for the benefit of the public and the adjacent property owners but rather for the private benefit of the applicant to make way for an undesirable and incompatible development.
- We also have reason to believe based the series of events that a rezoning for the petition site can be considered as unconstitutional under the due process and equal protection provisions of the state and federal constitutions.
- The uses of land requires the coming together of a complex set of social, economic and physical forces, held together by a vision (often inchoate) of the desired outcome by all parties.

## Zoning Change Request 10112 Plainfield Dr. New Orleans, La Neighborhood Petition 2015

We the undersigned residents of \_\_\_\_\_ Subdivision New Orleans, Louisiana 70\_\_\_\_, bounded by I-10 Service and Morrison Roads, Bullard and Crowder Boulevards within Councilmanic District "E" and Third Municipal District, the abutting residents hereby petitions the City Planning Commission and City Council of New Orleans to take necessary actions to Deny Zoning Change request by Family Resources of New Orleans, Inc. and James Ramsey for property located on Square 24; Lot 2-C2 and 2C-1 bearing municipal addresses 10112, 10100-10122, 10200-10222 Plainfield Road from RM-2E Eastern New Orleans Residential District (adopted S-RS Suburban Single Family Residential District) to C-2 General Commercial District. We the undersigned **OBJECT** to the proposed request for the following reasons:

- It is inconsistent with the current Land Use Category RSF-Post (*Residential Single Family Post-War*) of *The Plan for the 21st Century* (Masterplan). In accordance with City Charter Section 5-404. - Master Plan (3) Legal Effects of Master Plan. (d) A Land Use Action is consistent with the Master Plan if the Land Use Action: (2) Is compatible with the proposed future land uses, densities, and intensities designated in the Land Use Element of the Master Plan.
- As adjacent property owners we believe that our property rights and values will be adversely affected by a General Commercial zoning amendment at the proposed site.
- To rezone from low-density residential use to a General Commercial District, setback and height provisions, allowing for various ranges of higher density and intensity uses, will all contribute to altering the essential character of the neighborhood.
- According to the US Standard State Zoning Enabling Act cities are empowered to regulate and restrict Land Uses for the purpose of promoting health, safety, morals and general welfare. So therefore, we believe that this rezoning is not being enacted for the benefit of the public and the adjacent property owners but rather for the private benefit of the applicant to make way for an undesirable and incompatible development.
- We also have reason to believe based the series of events that a rezoning for the petition site can be considered as unconstitutional under the due process and equal protection provisions of the state and federal constitutions.
- The uses of land requires the coming together of a complex set of social, economic and physical forces, held together by a vision (often inchoate) of the desired outcome by all parties.
