# Executive Summary Introduction

Residents in New Orleans East voiced concerns that the overconcentration of tire shops, nail salons, beauty supply shops and convenience stores hinder economic development in New Orleans East.

As a result, the New Orleans City Council passed Motion M-24-74 on February 22, 2024, to direct the City Planning Commission to conduct a study and make recommendations regarding the proliferation of specific retail goods establishments: tire shops, nail salons, beauty supply shops and convenience stores in New Orleans East.

Such considerations include distance requirements between said establishments or the requirement for tire shops, nail shops, beauty supply shops and convenience stores to receive conditional use approval from the City Council. The motion grants the City Planning Commission and its staff flexibility to make additional changes and recommendations as needed.

## **Key Findings**

Staff compiled data from active occupational licenses held and maintained by the Department of Revenue (see *Appendix H*) to determine if there was an overconcentration of establishments in New Orleans East. Occupational licenses are categorized by business type, and business types are identified by a distinct code. An occupational license is only issued to a business that holds a valid Certificate of Occupancy from the Department of Safety and Permits. For the purposes of this study, staff utilized the following codes in defining what establishments were tire shops, nail salons, beauty supply shops or convenience stores.

#### Tire Shop

- o 1130 TIRE DEALERS
- 1129 AUTO PARTS & ACCESSORIES STORES
- 1701 AUTO & OTH MOTOR VEHICLE WHLSRS
- 2031 AUTOMOTIVE BODY, PAINT & INTERIOR R&M
- 2068 AUTO MECHANICAL/ELECTRICAL R & M, OTH
- o 2071 AUTO REPAIR & MAINT, ALL OTH

# **Nail Salon**

o 2081 - NAIL SALONS

#### **Beauty Supply Shop**

1121 - COSMETICS/BEAUTY SUPP/PERFUME STORES

#### **Convenience Store**

- 1101 CONVENIENCE STORES
- 1131 GASOLINE STATIONS W/CONVENIENCE STORES
- 1142 GASOLINE STATIONS, OTHER
- o 1169 MISCELLANEOUS STORE RETAILERS (EXCEPT TOBACCO), ALL OTHER

Occupational license data was aggregated and adjusted to evaluate each establishment by the number of businesses in each Council District and New Orleans East (see *Table 1*):

**Table 1**. Summary of Results: Aggregate of Each Business Type<sup>1</sup>

	Tire Shops	Nail Salons	Beauty Supply Shops	Convenience Stores	Total	Active Occupational Licenses	% of Retail Goods with Occupational Licenses
District A	10	14	3	32	59	1,268	5%
District B	48	20	8	61	137	4,189	3%
District C	10	9	21	59	99	2,321	4%
District D	22	12	15	40	89	1,016	9%
District E	36	16	6	39	97	824	12%
Total	126	71	53	231	481	9,618	5%
N.O. East	41	17	7	50	115	837	14%

The resulting data indicates the following:

- New Orleans East has a slightly above average number of convenience stores and nail salons.
- New Orleans East has a below average number of beauty supply shops.
- New Orleans East has more tire shops than average.
- The number of active occupational licenses in New Orleans East is significantly below average but the percentage of retail goods establishments with active occupational licenses is the greatest.

When adjusted per capita, or 50,000 residents, staff found there is not a proliferation of tire shops, nail salons, beauty supply shops or convenience stores in New Orleans East (which is comprised of a portion of District D and District E) despite tire shops, nail salons and convenience stores having more businesses than the average per capita (see *Table 2*):

**Table 2**. Summary of Results: Prevalence of Each Business Type

	Total Establishments New Orleans East	Average per Capita <sup>2</sup>	Total per Capita <sup>3</sup> New Orleans East	Total in City of New Orleans
Tire Shops	41	16	29	126
Nail Shops	17	9	12	71
<b>Beauty Supply Shops</b>	7	7	5	61
<b>Convenience Stores</b>	50	32	35	231

<sup>&</sup>lt;sup>3</sup> Per 50,000 residents.

#### Recommendations

Based on findings and data gathered from stakeholders, the City Planning Commission recommends the following action:

#### **General Recommendations**

The City Planning Commission does not recommend the implementation of a conditional use requirement or distance requirement for tire shops, nail salons, beauty supply shops or convenience stores in New Orleans East as such measures are found to be unwarranted for the identified issues. Staff were unable to ascertain a causal link between the perceived proliferation of the four types of establishments in New Orleans East and the dearth of other types of retail stores. In evaluating the expressed concerns of various stakeholders, the City Planning Commission has not found any harm associated with any of the establishments' land use activities. Rather, the City Planning Commission has identified alternative measures in which to address stakeholders' concerns regarding quality of life, economic diversity, and development challenges.

Recommendations include the creation of an enforcement task force, the establishment of a New Orleans East opportunity zone, and a reconsideration of the 2004 New Orleans East Renaissance Plan which would evaluate transportation, infrastructure, land-use, safety, housing and other metrics that are found to have a larger impact on the types of businesses that choose to locate in a certain location. City Council allocated approximately one million dollars towards updating the Plan in 2025. The lack of investment in New Orleans East cannot be attributed to a single cause, and the current economic landscape is a confluence of factors that require a holistic study.

The Retail Goods Establishment Study targets businesses that are assumed to deter more desirable commerce from locating in New Orleans East. However, the effort of limiting certain uses through distance requirements or conditional use approval is a piecemeal land-use initiative that is not likely to result in the intended outcome but may result in removing opportunities and wealth from small local businesses. Alternatively, the impending update to the 2004 New Orleans East Renaissance Plan proposes a comprehensive approach to realizing the full potential of the area by evaluating New Orleans East through a post-COVID-19 lens and with major developments on the horizon.

#### Specific Recommendations

**Tire Shops**: Staff found that tire shops, due to their inherent autocentric nature, may be considered for a conditional use requirement if they are proposed in the pedestrian friendly, mixed-use areas promoted in the Comprehensive Zoning Ordinance. However, the location of tire shops - as indicated in the data - concludes that tire shops in New Orleans East are primarily located along Chef Menteur Highway, which is considered an appropriate location for a transit-oriented business.

# **Next Steps**

The Retail Goods Establishment Study will be presented to the City Planning Commission at a public hearing on December 10, 2024. The public hearing is an opportunity for the City Planning Commission to receive input from members of the public. If the City Planning Commission chooses to modify staff's recommendations, staff must incorporate such modifications into the Study. Following the public hearing, the City Planning Commission will transmit the Study to City Council with the City Planning Commission's recommendation.

At its discretion, City Council may hold a public hearing as it reviews the Study, but a hearing is not required. Following its review, City Council may direct the City Planning Commission to consider all or part of the recommendation as a text amendment to the Comprehensive Zoning Ordinance after which the City Planning Commission staff will docket the Council's request and present the text amendment recommendations via a staff report at a public hearing before the City Planning Commission. At the hearing, the Commission may choose to defer, approve, amend, or deny the staff recommendations. If deferred, the item will be reheard by the Commission at a specified later date. If approved, amended, or denied, the recommendation is transmitted to City Council and presented to the Council at a City Council public hearing. At its hearing, the Council may adopt, adopt with modifications, or deny the City Planning Commission's recommendations.

# **Background**

New Orleans East (see *Figure* 1) has historically endured a lack of economic investment. This lack of investment has resulted in food deserts, vacant commercial sites, and the absence of robust retail and amenities in New Orleans East. Displeased with the current economic landscape of their neighborhoods, New Orleans East residents identified specific retailers that are believed to operate in abundance in various neighborhoods. Residents argued that these types of businesses, specifically beauty supply shops, convenience stores, nail salons and tire shops, hinder economic development in New Orleans East.

As a result, the New Orleans City Council passed Motion M-24-74 on February 22, 2024, to direct the City Planning Commission to conduct a study and make recommendations regarding the proliferation of these retail uses.

The Retail Goods Establishment Study directs the City Planning Commission to address the following:

- Potential conditional use requirement for each use.
- Potential distance requirement for each use.

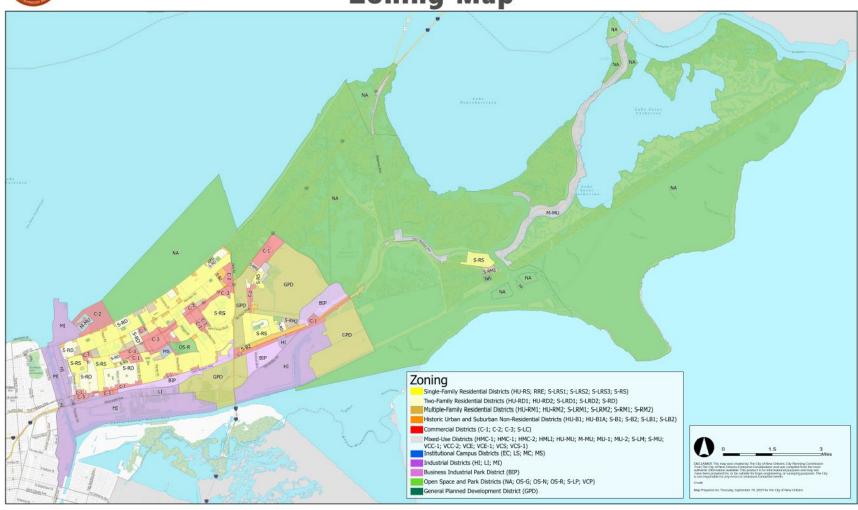

To conduct a holistic analysis, the City Planning Commission also considered the following:

- Zoning regulations, if any, that inhibit or promote a proliferation of these uses.
- Quality of life issues resulting from tire shops, nail shops, beauty supply shops and convenience stores in New Orleans East; and
- Zoning actions that can mitigate quality of life issues.

# Figure 1. New Orleans East Zoning Map (2024)

# New Orleans East Zoning Map

# Research Methods

Staff collected cross sectional data from March 2024 to June 2024. Qualitative data was collected through meetings with stakeholders and an online survey. Quantitative data was collected during site visits, also through the online survey, Google Imagery, publicly accessible data sources, occupational license data from the Department of Revenue<sup>4</sup> and 2020 Census data.<sup>5</sup> Staff created a tiered survey to analyze survey respondents' perceptions of the level of saturation for each retail establishment. The survey is described in more detail in the *Public Comments* section of the study.<sup>6</sup>

The uses listed in the Motion are not individually defined in the Comprehensive Zoning Ordinance but are part of more general uses such as retail goods establishments and personal service establishments. To adequately evaluate each establishment, representatives from Council Districts D and E clarified what distinguished one establishment from the other, and staff utilized the most appropriate revenue data to analyze tire shops, beauty supply shops, nail salons and convenience stores.

Nail Salons are solely classified under revenue code 2081. Staff acknowledge that nail salons may be colocated within other businesses such as hair salons and massage establishments. However, staff learned through stakeholder meetings and communication with representatives from District E, that multi-use businesses that provide nail services were not the focus of the study. As such, stand-alone nail salons under the 2081 revenue code are reflected in the subsequent analysis.

Beauty Supply Shops are classified under revenue code 1121, which also includes cosmetics and perfume stores. While staff acknowledge that beauty supply shops often carry cosmetics as well as perfume, businesses that are classified as strictly "cosmetics" or "perfume" such as Lush or Ulta were excluded from the subsequent analysis.

Convenience Stores are classified under revenue codes 1101 for stand-alone convenience stores; 1131 for convenience stores attached to gas stations; 1142 for Gasoline Stations; and 1169 for miscellaneous store retailers (except tobacco). Through stakeholder meetings, and communication with representatives from Council District E, staff learned that both stand-alone convenience stores and convenience stores that are a part of gas stations should be included in the study. As such, all the revenue codes for convenience stores are reflected in the subsequent analysis.

Tire Shops as Motor Vehicle Service and Repair, Major and Motor Vehicle Service and Repair, Minor uses are classified under several revenue codes. For this study, staff classified tire shops under 1130 for tire dealers, 2068 for auto mechanical, electrical repair and maintenance, 2071 for auto repair and maintenance and 2031 for automotive body, paint and interior. Revenue codes 1130, 2068, 2071 and 2031 were included as businesses that specialize in the repair and or maintenance of motor vehicles, and who may also sell, remove or repair tires which are reflected in the subsequent analysis. Staff excluded the revenue code 1701 which includes auto and other motor vehicle wholesalers. These types of businesses generally purchase and sell entire motor vehicles and not individual parts such as tires.

<sup>&</sup>lt;sup>4</sup> See Appendix H.

<sup>&</sup>lt;sup>5</sup> Explore Census Data. (n.d.). Data.census.gov. https://data.census.gov/profile/New\_Orleans\_city,\_Louisiana? g=160XX00US2255000#housing

<sup>&</sup>lt;sup>6</sup> A breakdown of the coding is included in the Appendix C.

# **Study Limitations**

City Planning Commission staff does not have the resources or capacity to enumerate every tire shop, nail salon, beauty supply shop, convenience store or in the City of New Orleans in an absolute and definitive matter. Therefore, staff utilized several techniques to obtain research data. Revenue codes were filtered for tire shops and beauty supply shops which may have led to the inclusion of businesses not classified as a tire shop or beauty supply shop or the exclusion of businesses that should be classified as a tire shop or beauty supply shop. This is because staff were unable to go through each business under revenue codes 1130, 2068, 2071 and 2031, and 1701 to definitively determine if each site sells tires. Some stores do not have websites, so staff would need to call or visit each site, to determine if tires were sold. Similarly for beauty supply shops, staff filtered out sites that were classified as cosmetics or perfume business, resulting in the exclusion of some beauty supply shops depending on how the business owner classified their business.

During site visits, staff identified several nail salons, beauty supply shops, tire shops and convenience stores that are currently operational, but are not included in the revenue data. This margin of error may be a result of new businesses that are not yet reflected in the revenue data or those that are not current with their occupational licenses.

Despite the limitations, staff believe that the data analyzed in this study provides an approximate depiction of the prevalence of each of the aforementioned retail goods uses within New Orleans East, as well as throughout the City of New Orleans.

# **Spatial Data**

Staff surveyed tire shops, nail salons, beauty supply shops and convenience stores citywide. The locations of each are as follows:

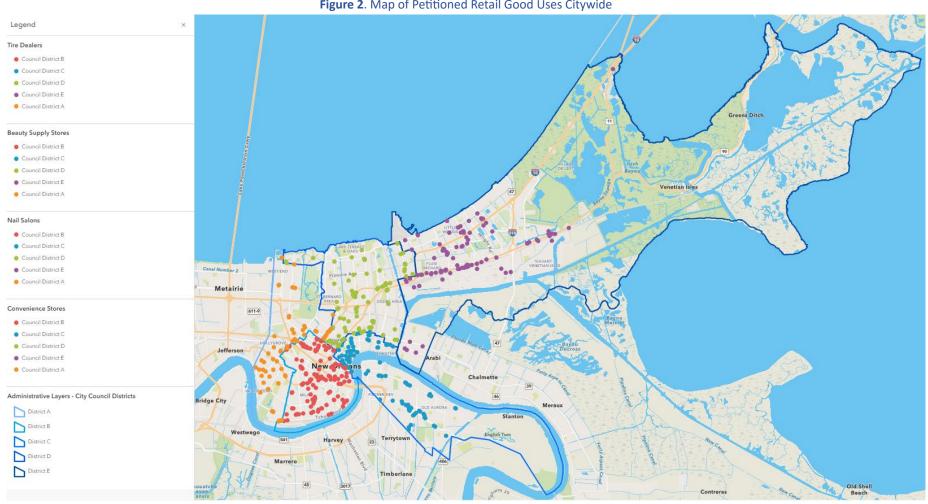

Figure 2. Map of Petitioned Retail Good Uses Citywide

# History and Challenges in New Orleans East

New Orleans has defined geographic boundaries: Lake Pontchartrain to the north, the Mississippi River and Jefferson Parish boundary to the south and west, and the St. Bernard Parish boundary to the east. New Orleans East is in the marshy land east of the Industrial Canal and north of the Gulf Intracoastal Waterway. Drained, filled, and subdivided, this area of New Orleans effectively became the city's first suburb – housing nearly 100,000 residents prior to Hurricane Katrina in August 2005.

In the 1960s, white flight, the completion of the Interstate 10 and the location of NASA's new Michoud Assembly Facility resulted in a flurry of new development in New Orleans East. However, the latter half of the 20<sup>th</sup> century marked a period of suburban flight where many middle-class New Orleanians moved to Jefferson or St. Tammany Parish, bringing their tax base with them. To maintain its viability, cultivating a suburb within the confines of Orleans Parish was seen as an alternative to losing residents to neighboring parishes. Thus, New Orleans East allured middle-class and affluent Black families who were uninterested in migrating to neighboring, mostly white, parishes.

Prior to the oil bust in the mid-1980s, the suburb thrived but lost thousands of mostly white families after jobs in the oil industry disappeared. This mass migration left thousands of empty housing units in its wake which were eventually occupied by lower-income black families. Thus, shifting migratory patterns changed the demographics of New Orleans East to a majority black and segregated area of the City.<sup>8</sup>

Hurricane Katrina and the resulting levee failures inundated New Orleans East with floodwaters that destroyed two commercial hubs – the Lake Forest Plaza Mall and Six Flags – and nearly the entire housing stock. Since 2005, nearly 20 years after the storm, New Orleans East contains a little under 80% of the residents it had prior to the storm, yet economic investment still lags. The vast majority of New Orleans East was developed after the advent of air conditioning, and structures are primarily ranch style, with lower ceilings and built slab-on-grade, which makes them more susceptible to flooding when compared to housing in historic areas of the city. In some areas, New Orleans East lays 10 feet below sea level. "By century's end, geophysical problems increasingly came to light. Surrounded by salt water, bowl-shaped in its elevation, detached from the metropolitan core, adjacent to eroded marshes and ungated surge-prone canals, and ill-protected by what proved to be flimsy levees, New Orleans East lay both physically and socially vulnerable to catastrophe". The catalogue of the city of the catastrophe of the city of the catastrophe of the city of the catastrophe".

Today nearly 72,000 residents - or about 19% of all residents in New Orleans – live in New Orleans East. <sup>11</sup> The landmass in New Orleans East constitutes approximately two-thirds of the City's geographic area and is comprised of majority Black residents with a Vietnamese enclave in the Village de L'Est neighborhood.

Despite having large swaths of vacant commercially zoned land and a significant portion of the City's population, this area of this city has been unsuccessful at attracting commercial interest, especially among big box stores, higher-end retail and sit-down restaurants in the last several decades. As a result, residents in New Orleans East may be forced to spend their dollars (and the resulting sales tax revenue) in other areas of the City and surrounding parishes.

According to MLS data from May 2024, there are approximately 43 listings for vacant storefronts and 29 listings for vacant commercially zoned land in New Orleans East. There are currently 229 vacant, commercially zoned parcels in New Orleans East (see *Figure 3*). These vacancies reflect underutilized economic opportunities and do not support the perception that a lack of available commercially zoned land is hindering economic investment in New Orleans East. This lack of investment is likely due to several confounding factors, which can be explored more holistically in the updated New Orleans East Renaissance plan.

Page 14 of 130

#### Precedents for Distance Limitations in Comprehensive Zoning Ordinance

Distance limitations are restrictions found within many zoning districts or geographic boundaries in the Comprehensive Zoning Ordinance. Distance limitations may result in limiting a specific use per block face or by imposing a certain distance requirement between the subject uses. In some instances, certain uses are prohibited within a certain geographic boundary, regardless of the zoning districts contained within those boundaries.

Distance limitations, use restrictions and block face limitations are all ways of curtailing the prevalence of certain uses that are deemed inconsistent with surrounding properties as such uses typically have higher noise, traffic or activity impacts than other uses. Impacts that may be mitigated with a distance requirement generally go beyond the confines of the particular property, such as noise. Imposing a distance restriction is a way to help alleviate potentially harmful effects of a use by dispersing the impact across a larger area and deflating congestion in a location. Limitations are often placed-based or catered to a specific location where there are set goals and visions for the future of the affected area – i.e. a commercial corridor, an intersection, or a neighborhood.

Use restrictions are not usually applied to a large swath of land with diverse land-use characteristics or market demands and can be by found by zoning district. For example, in the CBD-5 Urban Core Neighborhood Lower Intensity Mixed-Use District, all types of restaurants are permitted but limited to one per block face. <sup>12</sup> In the HMC-2 Historic Marigny/Tremé/Bywater Commercial District, indoor and outdoor live performance venues and live entertainment as secondary uses are permitted through conditional use approval but limited to one per block face. <sup>13</sup> However, restrictions can also be assigned to a use regardless of the zoning district in which the use is located. The use standards for bed and breakfasts, for example, limit their use to one within a city block, and the use standards for townhomes and short-term rentals prohibit these uses entirely within the Garden District. <sup>14</sup>

Lastly, distance or block face restrictions can be found within the provisions of an overlay district. Overlay districts pertain to certain geographic locations and require additional regulations beyond those of the base zoning district. Overlay districts may require conditional use approval or prohibit a use outright when it is otherwise permitted by-right in the base zoning district. The Magazine Street Use Restriction Overlay District, for example, requires all standard restaurants to receive conditional use approval despite this use being permitted by-right in much of the commercial zoning districts that cover Magazine Street. <sup>15</sup> In the ENORC Eastern New Orleans Renaissance Corridor Use Restriction Overlay District, reception facilities require conditional use approval and a minimum distance of 500 feet between any new reception facility and the nearest residential district. <sup>16</sup>

Perhaps most germane to the subject study is a prohibition of a certain retail goods establishments and personal service establishments within the French Quarter as well as a study regarding the prevalence of "small box variety stores" in New Orleans East. *Article 10* of the Comprehensive Zoning Ordinance. contains a use restriction section that places limitations on T-shirt shops (a type of retail goods establishment) and massage parlors (a type of personal service establishment). T-shirt shops are

<sup>&</sup>lt;sup>12</sup> Article 17, Section 17.3.B.4

<sup>&</sup>lt;sup>13</sup> Article 10, Section 10.2.B.7

<sup>&</sup>lt;sup>14</sup> Article 20, Section 20.3.I.1; Article 20, Section 20.3.X; Article 20, Section 20.3.LLL.1

<sup>&</sup>lt;sup>15</sup> Article 18, Section 18.20.B.1.a

<sup>&</sup>lt;sup>16</sup> Article 18, Section 18.4.B.1.c.i

prohibited in all Vieux Carré districts, or throughout the entirety of the French Quarter, and require 600 feet between uses in the Central Business District.<sup>17</sup> Massage establishments are prohibited in the VCE Vieux Carré Entertainment District.<sup>18</sup> Both T-shirt shops and massage establishments do not have their own use in the use tables. They do, however, have definitions in *Article 26* of the Comprehensive Zoning Ordinance.

In 2018, City Planning Commission conducted a Small Box Retail Diversity Study<sup>19</sup> following an outpour of community opposition at the prevalence of small box variety stores, colloquially known as "Dollar Stores", in New Orleans East. Residents indicated that the proliferation of these types of businesses limited the development of full-service grocery stores and other types of retail in New Orleans East. In the study, staff found that 12, or 33%, of the existing Dollar stores throughout the city were in New Orleans East and listed several recommendations for remediation; however, no connection between the presence of small box variety stores and the absence of full-service grocery stores was ascertained. The study ultimately resulted in a new definition for small-box variety stores, separating the use into its own use category with individual use standards, and the implementation of a one- or two-mile distance requirement between new small box variety stores throughout the City.<sup>20</sup>

While distance requirements can be an effective planning tool to lessen harmful impacts associated with certain uses, they can be difficult to enforce. The New Orleans' Department of Safety and Permits explained that creating distance requirements or a conditional use for the four establishments would be challenging for their department to track and oversee as existing establishments would become classified as non-conforming uses. The Department indicated how business operators who may be subject to current distance requirements often find ways to circumvent the regulations by applying as a different type of retail goods establishment, which undermines both the regulations and the Department.

All things considered, the four establishments analyzed in this report do not inherently have negative impacts associated with their use. Therefore, the creation of arbitrary distance requirements for a large portion of New Orleans is antithetical to the purpose of these regulations.

# **Public Input**

City Planning Commission staff received public comments regarding the adverse impacts of tire shops, nail salons, beauty supply shops and convenience stores in New Orleans East. Public comments were submitted in writing via a survey, during stakeholder meetings and in-person at the April 9, 2024, City Planning Commission hearing. Categorically, comments were related to concerns of density, use standards, store operations, and the economy. Many of the comments and concerns were not related to land use. A synopsis of the comments is provided below.

# Stakeholders' Comments Summary

# Tire Shop

- o Believe use is appropriately located along Chef Menteur Highway and Downman Road
- Potential for additional design standards (lighting etc.)
- Perception that the number of stores is limiting other economic development
- Perception that independently owned tire shops may directly or indirectly contribute to illegal tire dumping
- Design a taskforce to investigate, combat, and prevent illegal tire dumping

#### Nail Salon

- No issue with design or operator operations
- Perception that the number of stores is limiting other economic development

# **Beauty Supply Shop**

- No issue with operations
- Potential for additional design standards (lighting, removal of excessive storefront signage, etc.)
- Perception that the number of stores is limiting other economic development

#### **Convenience Store**

- Perceive an over-proliferation of this use within New Orleans East
- Potential for additional design standards (lighting, etc.)
- Operations encourage loitering, which fosters crime
- Lack of fresh foods
- Perception that the number of stores is limiting other economic development

#### Collective Economic Impacts

- o Find difficulty in defining and enforcing each business as a separate use
- Believe tax incentive programs designed to encourage developers to build in New Orleans
   East are underutilized
- o Absentee landlords "landbank" properties in hopes of future upscale developments
- Perceptions about crime and/or lack of income may dissuade potential investors

# Survey Data Summary

City Planning Commission staff circulated a 13-question survey that assessed residents', businesses', and neighborhood organizations' concerns and perceptions regarding each of the aforementioned uses. The survey opened on May 7, 2024, and closed at noon on May 17, 2024. The survey was presented to various stakeholders<sup>21</sup>, who in turn disseminated the survey to their respective networks.

The survey closed with 273 recorded responses.<sup>22</sup> Of the survey participants, 91% of the respondents identified as Black and 3.1% of the respondents identified as White. The remaining 5.9% of respondents identified as Hispanic, Asian or other. Survey respondents reported that they resided in various neighborhoods within Gentilly and New Orleans East. Respondents overwhelmingly concluded that each retail use is oversaturated in New Orleans East. Approximately 59% (see *Figure E-1* in appendix) of respondents reported that tire shops are oversaturated in New Orleans East, 86% (see Figure E-2 in appendix) reported that beauty shops are oversaturated, 76% (see *Figure E-3* in appendix), reported that nail salons are oversaturated and 74% (see *Figure E-4* in appendix) reported that convenience stores are oversaturated.<sup>23</sup> However, quality of life impacts (see *Table 3*) for each use varied by respondent.<sup>24</sup> A summary of the responses is provided below.

Table 3: Quality of Life Impacts Summary Survey Data

## Tire Shops

Attract violent crime and loitering.

Attract customers of a lower economic status.

Provide a useful service.

#### **Nail Salons**

Presence of an overconcentration of nail salons limits the desirability of the area to high end retail uses. Some nail shops utilize harmful chemicals in their various services.

Provide a useful service.

#### **Beauty Supply Shops**

Provide culturally relevant products that may not be available at larger big box stores.

Presence of an overconcentration of beauty supply shops limits the desirability of the area to high end retail uses.

Proprietors do not follow current design standards for signage and transparency.

#### **Convenience Stores**

Offer convenience and affordability to those with limited income and mobility.

Presence of an overconcentration of convenience stores limits the desirability of the area to high end retail uses.

Attract loitering, loud music and profanity.

Offer foods high in salt and sugar that are generally nutrient poor.

Poorly maintained and littered store fronts.

<sup>&</sup>lt;sup>21</sup> Staff sent the survey to NOEM, ENONAC, NOMAR and former Councilwoman Cyndi Nguyen.

<sup>&</sup>lt;sup>22</sup> A full summary of the survey responses is included in Appendix E.

<sup>&</sup>lt;sup>23</sup> Staff created a survey coding for 0-5 for residents to choose from. Zero (0) for no saturation, 1-2 for slightly saturated, 3 for moderately saturated and 4-5 for highly saturated. This coding is based solely on respondents' point of view and not actual rates of market saturation.

<sup>&</sup>lt;sup>24</sup> Respondents were asked if and how each retail use impacted their quality of life. A complete list of survey questions is included in the Appendix E.

# **Stakeholder Meetings**

In studying tire shops, nail shops, beauty supply shops and convenience stores in New Orleans East, the City Planning Commission staff met with the following offices, organizations, groups, and individuals:

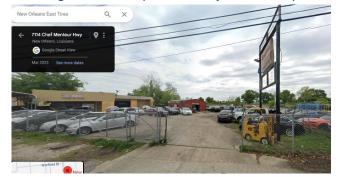

- City Council, District D
- City Council, District E
- Christy Verges Peachy, local business owner and investor
- Cyndi Nguyen, former Councilwoman, District E
- Department of Safety and Permits, City of New Orleans
- Eastern New Orleans Neighborhood Advisory Commission (ENONAC)
- New Orleans East Matters Neighborhood Association (NOEM)
- New Orleans Metropolitan Association of Realtors (NOMAR)
- Office of Economic Development, City of New Orleans

# Tire Shops: Overview

Tire shops, while part of the larger automobile industry, comprise a separate 61-billion-dollar industry in the United States. <sup>25</sup> Stores that sell tires provide practical benefits, but they can be conflated with the illegal tire disposal that is rampant throughout New Orleans East and associated with various environmental concerns, which are mentioned later in this Study. The illegal disposal of tires in various New Orleans neighborhoods, particularly in New Orleans East, prompted the City Council to create additional use standards for *tire dealers*, and fines for non-compliance, which are reflected in the City's code of ordinances, under MCS 27652. Neither a separate use designation or accompanying use standards have been created for tire shops or tire dealers in the Comprehensive Zoning Ordinance as a result of this Ordinance.

Currently, tire shops are classified under Minor or Major Motor Vehicle Service and Repair use within the Comprehensive Zoning Ordinance, as well as under the designation of tire dealers, within the North American Industry Classification System. Tire shops primarily supply tires for patrons but may retail various automotive parts and provide services that include tire repair, installation, and oil changes. These establishments can be located within open-air or enclosed store fronts. The Comprehensive Zoning Ordinance requires all repair operations to be enclosed and prohibits the open storage of tires.

Figure 4: Tire Shop at 7603 Chef Menteur Hwy

**Figure 5:** Tire Shop at 7101 Chef Menteur Hwy

# Definition within the Comprehensive Zoning Ordinance

The term *tire shop* is not a distinct designation in the Comprehensive Zoning Ordinance. However, *tire retail shops* are classified within the Motor Vehicle Service and Repair, Major and Motor Vehicle Service and Repair, Minor definitions:

**Motor Vehicle Service and Repair, Major**. A business involved engine rebuilding, major reconditioning of worn or damaged motor vehicles or trailers, towing and collision service, including body, frame or fender straightening or repair, and painting of motor vehicles. The business may also include the sale of tires, including tire installation and virtual motor vehicle sales.

**Motor Vehicle Service and Repair, Minor**. A business that includes, but is not limited to, minor repairs to motor vehicles, including repair or replacement of cooling, electrical, fuel and exhaust systems, brake adjustments, relining and repairs, wheel servicing, alignment

<sup>&</sup>lt;sup>25</sup> U.S. Tire Manufacturers Association. (n.d.). *Powering the U.S. economy*. Powering The U.S. Economy https://www.ustires.org/powering-us-economy

and balancing, repair and replacement of shock absorbers, and replacement or adjustment of mufflers and tail pipes, hoses, belts, light bulbs, fuses, windshield wipers/wiper blades, grease retainers, wheel bearings, and the like. The business may also include the sale of tires, including tire installation and virtual motor vehicle sales.

# Additional Definitions

**Tire Dealers.** As outlined in Council Ordinance 27652 MCS, a tire dealer shall mean any person, business, or firm that engages in the sale of tires, including recapped or retreaded tires, for use on motor vehicles.

#### **Use Standards**

Both Minor and Major Motor Vehicle Service and Repair uses are subject to the Use Standards found in *Article 20, Section 20.3.MM* of the Comprehensive Zoning Ordinance:

20.3.MM MOTOR VEHICLE SERVICE AND REPAIR, MINOR OR MAJOR (INCLUDES TIRE RETAIL SHOPS)

- 1. Minor motor vehicle service and repair shops may not store the same vehicles outdoors on the site for longer than fifteen (15) days. Major motor vehicle service and repair shops may not store the same vehicles outdoors on the site for longer than thirty (30) days.
- 2. All driveways shall be located and designed to ensure that they will not adversely affect the safety and efficiency of traffic circulation on adjoining streets.
- 3. All repair operations and tire retail shops shall be fully enclosed. Wrecked or junked vehicles may not be stored on-site. Where the property abuts a residential use, the facility shall install an opaque fence at least six (6) feet high on the property line to buffer the residential use.
- 4. Minor motor vehicle service and repair may also include gas stations as an accessory use. All gas stations that are part of such an establishment shall comply with the regulations of this Article.
- 5. Virtual sales of used motor vehicles may be permitted with the following conditions:
  - a. The storage of used vehicles for sales on premise is prohibited;
  - b. Vehicles shall be located off-premise at the vehicle owner's property or at a property zoned and licensed for the storage of vehicles; and
  - c. The business shall hold a valid license with the Louisiana Use Motor Vehicle Commission.
- 6. No motor vehicles may be stored and no repair work may be conducted in the public right-of-way.
- 7. Minor motor vehicle service and repair and tire retail shops shall have a minimum lot size of five-thousand (5,000) square feet. Major motor vehicle service and repair shops shall have a minimum lot size of nine-thousand (9,000) square feet.
- 8. All tire retail shops, whether new or used tires, must be registered with an LDEQ Agency Interest number (AI#). Operators shall submit proof of compliance with all local, state and federal laws prior to the issuance of a certificate of occupancy for the site, and proof of compliance with LDEQ standards prior to the issuance of an occupational license for the site.
- 9. The open storage of tires is prohibited. Covers shall be adequate to exclude water from the waste tires. All facilities shall have the means to control standing or pooling water in the containment areas.

# Use Permissions for Motor Vehicle Service and Repair, Major and Motor Vehicle Service and Repair, Minor

The use tables below show zoning districts where Motor Vehicle Service and Repair, Major or Motor Vehicle Service and Repair, Minor uses are permitted ("P") and conditional ("C") uses.

# State and Other Regulations

Though not outlined in Article 20 of the Comprehensive Zoning Ordinance, City Council Ordinance 27652 MCS (see *Appendix O*), under City Code 26-415 through 26-430, outlines use standards that are specific to tire dealers, which are outlined below.

#### Division 5. - Standards for Tire Sales, Installation, Hauling, and Disposal. 5 Sec. 26-415. - Definitions.

- 1. For the purposes of this Division, the following terms shall have the following meanings:
  - a. Abandoned shall mean waste tires and or waste tire material discarded without adhering to the proper disposal or processing standards required by these 9 regulations.
  - b. City shall mean the City of New Orleans
  - c. Destination shall mean a facility where waste tires and or waste tire material is 12 processed, recycled, collected, stored-and/or disposed after transportation.
  - d. Disposal means the depositing, dumping, or placing of waste tires or waste tire 14 material on or into any land or water so that such waste tires, waste tire material or any constituent thereof, may have the potential for entering the environment, or being emitted into the air, or discharged into any waters of the state of Louisiana.
  - e. Manifest shall mean the mechanism provided by the Louisiana Department of Environmental Quality, used for identifying the quantity, type, origin, transportation, and destination of waste tires and/or waste tire material from the tire dealer to the authorized destination facility.
  - f. Motor Vehicle shall mean an automobile, motorcycle, truck, trailer, semi-trailer, or any combination of truck, tractor, and semi-trailer, or any other vehicle designed and approved for use

on the public streets of this City, used to transport persons or property and propelled by power other than muscular power.

- g. Site shall mean the physical location, including land area and appurtenances, upon which tires, waste tires, and/or waste tire material is located. The site shall be inclusive of any abutting or adjoining right-of-way that is occupied by tires or waste tires regardless of the legal status of such occupancy.
- h. Tire shall mean a continuous solid or pneumatic rubber covering encircling the wheel of a motor vehicle.
- I. Tire Dealer shall mean any person, business, or firm that engages in the sale of tires, including recapped or retreaded tires, for use on motor vehicles.
- J. Transporter shall mean a person who transports waste tires.
- k. Unauthorized Waste Tire Pile shall mean an accumulation of more than 20 waste tires whose storage and/or disposal is not authorized by the Louisiana Department of Environmental Quality.
- I. Waste Tire shall mean any tire that is no longer suitable for its original purpose because of wear, damage, or defect and/or has been discarded by the consumer. This term shall also apply to any tire which has been previously installed on a motor vehicle that has been removed from that vehicle and is not actively being offered for sale by facility at which it is stored, regardless of the suitability of such tire for resale pursuant to Louisiana Department of Public Safety regulations.

#### Sec. 26-416. - General Authority.

The departments of health, sanitation, safety and permits, and any other municipal department or agency that is responsible for the health and sanitary condition of the city may enforce the provisions of this Division.

#### Sec. 26-417. - Enforcement.

- 1. Failure of any person, business, or entity to comply with any of the provisions of this Division shall be in violation of this Code.
- 2. Violations of this Division shall be subject administrative adjudication pursuant to Chapter 6 of this Code.

#### Sec. 26-418. - Operational Standards.

- 1. Tire dealers shall possess an Occupational License issued pursuant to this Code by the 54 Department of Finance, authorizing the conduct of business in the City of New Orleans.
- 2. Tire dealers which store or may store more than 20 waste tires shall, within 30 days of commencement of business operations, notify the Louisiana Department of Environmental Quality of their existence and obtain a generator identification number. Storage of more than 20 waste tires, as provided in this Division, without a generator identification number shall be a violation of this Code.
- 3. Tire dealers shall prominently display to the public the notification provided by the Louisiana Department of Environmental Quality indicating that:
  - a. "It is unlawful for any person to dispose, discard, bum, or otherwise release waste tires to the environment in a manner in contravention to the Louisiana Solid Waste Regulations. A fine of up to \$32,500 per day per violation may be imposed on any company or individual who violates these rules and regulations."

- b. "All Louisiana tire dealers are required to collect a waste tire cleanup and recycling fee from the consumer at the time of the retail sale of \$2 for each 68 passenger/light truck tire, \$5 for each medium truck tire, \$10 for each off-road tire, and \$1.25 for recapped or retreaded tires. These fees shall also be collected upon replacement of all recall and adjustment tires. Tire fee categories are defined in the Waste Tire Regulations. This fee must be collected whether or not the purchaser retains the waste tires. Tire dealers must accept from the purchaser, at the time of sale, one waste tire for every tire sold, unless the purchaser elects to retain the waste tire. The department does not require the collection of fees on the sale of tires weighing 500 pounds or more, solid tires, or tires which are de minimis in nature, including but not limited to lawn mower tires, bicycle tires, and golf cart tires."
- 4. Generators of waste tires, required to register in accordance with LAC 33:VII.10SI9.A, shall comply with the manifest requirements of LAC 33:VII.10534.
- 5. Waste tires may be stored for up to 120 days after receipt or generation; however, storage up to 365 days may be permitted, provided:
  - a. The storage is solely for the purpose of accumulating such quantities as are necessary for cost effective transportation and processing; and,
  - b. Documentation supporting the storage period and quantity generated is made available at the tire dealer's facility for audit and/or inspection.
- 6. No more than I5O waste tires shall be stored at the generator's place of business at one time, unless stored indoors or in a transportable collection container.
- 7. No tire dealer shall allow the removal of waste tires from his place of business by anyone other than a transporter that is properly authorized and licensed by the Louisiana Department of Environmental Quality, unless the tire dealer generates or less waste tires per month from the sale of 50 tires.
  - a. If 50 tires or less are generated per month, the tire dealer may transport up to 20 waste tires to a permitted processing facility. Documentation supporting the number of tires sold or generated, and documentation indicating delivery to or disposal through a state permitted processing facility shall be made available at the tire dealer's facility for audit and/or inspection
- 8. Waste tires shall be segregated from any tires offered for sale or resale by the tire dealer.
- 9. Tire dealers shall maintain completed manifests, from a transporter authorized by the State of Louisiana to perform such function, for a minimum of five (5) years and shall make such manifests available for audit and/or inspection at the tire dealer's place of business during regular business hours.

## 102 Sec. 26-419. - Storage of New, Used, and Waste Tires.

- 1. Tire dealers shall not engage in outdoor storage of new, used, or waste tires except in compliance with the standards of the Comprehensive Zoning Ordinance.
- 2. Storage of tires may not be located on a different parcel, lot, or site than the business site 106 of the tire dealer.
- 3. Storage may not be located on the public right-of-way; such storage violates Section 146- 108 494 of this Code and shall constitute a separate violation under this Division.
- 4. Storage areas of all new, used, or waste tires collected and/or stored by a tire dealer shall 110 provide:
  - a. A cover adequate to exclude water from the waste tires;

- b. Vector and vermin control;
- c. Means to prevent or control standing water in the tires and storage area.
- 5. Tire dealers shall not be eligible for sidewalk use permits pursuant to Chapter 146 for the 115 display or placement of tires.

# Tire Shops: Impact Analysis

# Stakeholder Analysis

Stakeholders expressed several complaints about tire shops in New Orleans East. Many comments centered on the idea that open-air tire shops are unsightly when strewn with tire parts and can encourage littering and loitering. Stakeholders argue that the littering and uncovered tire parts negatively impact the design and visual aesthetics of the surrounding neighborhood. Additionally, stakeholders voiced concerns that local tire shops may be contributing to illegal tire dumping in New Orleans East. Albeit there is no clear, evidentiary support for this claim. Staff analyzed 311 data from January 1, 2019 - April 16, 2024 (see Appendix M), which indicated that 2,633 calls were reported for illegal tire dumping during that time. Three hundred twenty-two or 12% of those calls were for locations in New Orleans East. On the contrary, some stakeholders believe tire shops are needed, and that they are located appropriately along industrial or heavy commercial corridors such as Chef Menteur Highway and Downman Road.

Figure 6: Uncovered Tire Shop along 6799 Chef Menteur Hwy

Figure 7: Covered Tire Shop along 6801 US-90 (Chef Menteur Hwy)

#### Data

Staff examined the number of tire shops with active occupational licenses in each Council District (see *Figure 8*), then filtered that number to only include the number of tire shops with active occupational licenses that operate in New Orleans East (see *Table 5*). Staff also examined the population rates with a standard of 50,000 residents per capita for each Council District, and within New Orleans East, to determine the prevalence rates for tire shops (see *Table 5*). A detailed summary of the analysis is provided below.<sup>26</sup>

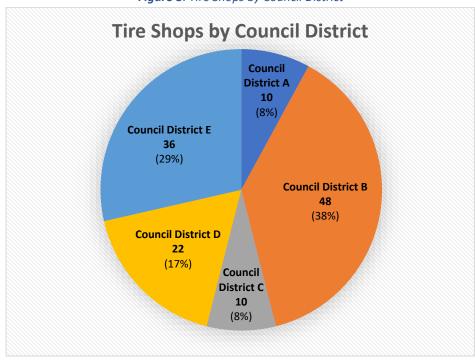

Figure 8: Tire Shops by Council District

**Table 5**: Tire Shops Per Capita (50,000 Residents)

	Number of Businesses	Number of Businesses per Capita (Per 50k)	Resident Population	Total Housing Units	District Area (Developable Square Miles)	District Area (Total Square Miles)
District A	10	6	76,708	37,356	14.4	155
District B	48	31	77,793	45,529	10.9	117
District C	10	7	69,222	39,064	23.6	254
District D	22	14	80,826	38,592	17.4	187
District E	36	24	75,655	31,714	32.4	167
Total	126	82	380,204	192,255	95.2	880
N.O. East	41	29	71,438	29,354	29.8	141

\_

<sup>&</sup>lt;sup>26</sup> Tire Shop data from the Department of Revenue is in Appendix L.

# **Data Analysis**

Staff utilized March 2024 through July 2024 data from the Department of Revenue<sup>27</sup> and 2020 Census Block data to conduct an analysis of existing tire shops. Based on this data, staff determined there were 126 tire shops throughout the City. 28 District D, which contains a portion of New Orleans East, has 22 shops (17%), and District E, which contains the majority of New Orleans East has 36 shops (29%). When adjusted by capita, Districts D and E respectively have prevalence rates of 14 shops per 50,000 residents and 24 shops per 50,000 residents. District B, which includes a large portion of the Uptown area, contained 38% of all tire shops and the highest prevalence rate when adjusted per capita.

When staff filtered and combined District D and District E to only include New Orleans East, New Orleans East contained 41, or approximately 36% of the tire shops throughout the City. When adjusted by capita, New Orleans East has 29 tire shops per 50,000 residents, which is slightly above the average per capita rate of 16 tire shops per 50,000 residents.

# Health Impact Assessment

Exposed tires and other vehicle components at open air tire shops can impact neighboring property values and impose environmental risks on patrons and employees of the establishments. Stakeholders reported that proprietors of independent tire shops may be contributing to illegal tire dumping along various corridors in New Orleans East. Illegal tire dumping poses several environmental risks such as air pollution, the attraction of various pests, eradication of native species and a decrease in neighboring property values.<sup>29</sup> However, staff were unable to determine a clear linkage between illegal tire dumping and tire shops in New Orleans East. It is possible that the tire dumping may be a result of out-of-state operators, who illegally dump tires in areas throughout the City.

Due to the release of fuels, oils and other contaminants that result from the repair of automotive vehicles, tire shops may be considered brownfield sites. This designation may require site remediation prior to a tire shop's adaptive reuse, which is discussed further in the recommendation section of this study.

Figure 9: Illegal Tire Dumping on Michoud Blvd at I-10 Interchange (Source: WWLTV.com)

<sup>&</sup>lt;sup>27</sup> While conducting site visits, staff determined that several businesses were missing from each of the retail goods use types. However, staff found data from the Department of Revenue to be the most complete data set, as it is derived from active occupational licenses.

<sup>&</sup>lt;sup>28</sup> For the purpose of this study, tire shops include establishments with the revenue distinctions as tire shops and auto parts and accessories stores.

# Nail Salons: Overview

Nail Salons are part of an 8-billion-dollar global beauty industry. Known for various services, nail salons typically provide manicures, pedicures and waxing treatments. In the United States, over 50% of nail salons are owned by Korean business owners and approximately 79% of staff are native born Koreans.<sup>30</sup> Tippi Hedren, a White American actress, is often credited for helping Koreans enter the United States' nail industry.<sup>31</sup> Following the aftermath of the Vietnam War, Hedren set up a refugee camp in Los Angeles, California, for those fleeing the Vietnam War. Hedren, along with her manicurist, aided female refugees in learning to become nail technicians and later advocated for the creation of nail technician licenses independent of a cosmetologist license. After Hedren's initial cohort graduated, graduates quickly found lucrative work and began assisting their relatives in coming to the United States. Korean graduates quickly established relationships with existing suppliers in the nail care industry and gradually became the main suppliers in this service industry.<sup>32</sup>

Figure 10. Nail Salon (VIP Nails) at 7330 Read Blvd (2019)

The New Orleans' Comprehensive Zoning Ordinance classifies nail salons as a personal service establishment.<sup>33</sup> Personal service establishments include businesses such as spas, tailors, barbershops, animal groomers, and tattoo parlors, and are generally permitted by-right in commercial and mixed-use zoning districts. In certain residentially zoned districts, personal service establishments can be permitted as a neighborhood commercial establishment through the conditional use process. The residentially zoned districts in New Orleans East do not permit neighborhood commercial establishments. So, the only avenue in which a nail salon may operate in New Orleans East is under the Personal Service Establishment designation where this establishment is permitted.

<sup>&</sup>lt;sup>30</sup> Davis, N. (2021, December 3). *The Evolution of the Nails Industry*. NAILS Magazine. https://www.nailsmag.com/1078423/the-evolution-of-the-nails-industry-1

<sup>&</sup>lt;sup>31</sup> Pham, K. (2015, December 30). *The Vietnamese-american nail industry: 40 Years of legacy*. NAILS Magazine. https://www.nailsmag.com/381867/the-vietnamese-american-nail-industry-40-years-of-legacy

<sup>&</sup>lt;sup>32</sup> Davis, N. (2021, December 3). *The Evolution of the Nails Industry*. NAILS Magazine. https://www.nailsmag.com/1078423/the-evolution-of-the-nails-industry-1

<sup>&</sup>lt;sup>33</sup> Personal service establishments include businesses such as spas, tailors, barbershops, animal groomers, and tattoo parlors, and are generally permitted by right in commercial and mixed-use zoning districts.

Generally, nail salons, like other personal service establishments, are well under 5,000 square feet in floor area and operating hours are typically during the day from 9:00AM to 6:00PM, five to six days a week with slight variations. Depending on its size and zoning designation, nail salons may or may not provide off-street parking. However, most nail salons are generally situated among other commercial activities within strip malls, multi-tenant commercial structures, grocery stores, and hotels, where access to off-street parking is readily available.

The Comprehensive Zoning Ordinance provides definitions for use classifications, design terms, and general zoning standards. Below is the definition for nail shops:

# Definition within the Comprehensive Zoning Ordinance

The term *nail salon* is not a distinct use designation in the Comprehensive Zoning Ordinance and is classified within the Personal Service Establishment use designation per the following definition:

**Personal Service Establishment.** An establishment primarily engaged in the provision of frequent or recurrent services of a personal nature. Typical uses include, but are not limited to, beauty salons and spas, barbershops, tanning salons, massage establishments, tattoo parlors, commercial copy shops, animal grooming, shoe repair, personal item repair shops, laundromats, dry cleaners, and tailors. Personal service establishments do not include any adult uses.

Additionally, the Neighborhood Commercial Establishment use designation permits Personal Service Establishments along with other low intense commercial uses. Per this allowance, a *nail salon* is a permitted Personal Service Establishment under the Neighborhood Commercial Establishment use, as part of the conditional use process. Neighborhood Commercial Establishments are not allowed in any current zoning districts in New Orleans East and are not reflected in the subsequent analysis.

#### **Use Standards**

There are no use standards specific to personal service establishments.

#### Use Permissions for Personal Service Establishment

Most habitable portions of New Orleans East are primarily characterized by large S-RS and S-RD residential zoning districts with small S-RM2 districts dotted in between. These areas were developed in the latter half of the 20<sup>th</sup> Century and are characterized by lower density development, which primarily includes single-family developments on lots of various sizes. Personal Service Establishments are entirely restricted from operating in any Suburban Neighborhood Residential Districts, which can be found in **Article 13 – Suburban Neighborhoods Residential Districts** (S-RS, S-RD, S-RM1, S-RM2, S-LRS1, S-LRS2, S-RLD1 S-RLD2, S-LRM1, S-LMR2, S-LP).

Per its development pattern, most of New Orleans East permits low density residential uses and limited commercial uses. Nevertheless, New Orleans East, like other parts of the city, has dense commercial and industrial activity along major and high traffic thoroughfares, highways, waterways, and public rights-of-way. Commercial and industrial activity are generally concentrated and often clustered into various mixes of business types, services, and intensity (see *Figure 1*). In analyzing the location of nail salons throughout the City, approximately 17 of the 71 nail shops citywide operate in New Orleans East, all of which are permitted by right (see *Table 6*).

The use table below indicates the zoning districts where Personal Service Establishments uses are permitted ("P") and conditional ("C") uses.

## State and Other Regulation

The Louisiana Board of Cosmetology requires all nail salons to be registered and its manicurists to be licensed within the state of Louisiana. No person or entity is permitted to operate a nail salon in the state of Louisiana without a Certificate of Registration issued by the Board. To obtain a certificate of registration, the operator must:

- 1) Certify that all persons employed at such a facility are appropriately licensed by their respective licensing board.
- 2) Demonstrate that the required physical, sanitary, and administrative facilities have been established.
- 3) Submit an initial application for a new shop location along with the appropriate fee specified in *R.S.* 37:599.
- 4) Include the words "beauty shop" or "salon" in any sign or advertisement for cosmetology services.
- 5) Designate, by placing a sign containing at least four-inch lettering, areas of his beauty shop or salon as areas where only cosmetology shall be practiced and areas where only barbering shall be practiced.

In the case of home-based businesses, no person, firm, corporation, or association of individuals can establish or maintain a beauty shop in a home or in connection with a business where food is handled unless a separate room is provided. Home-based businesses are also subject to the following regulations as it related to obtaining a Certificate of Registration:

- The owners and managers of beauty shops established in homes or in connection with places where food is handled shall permanently close a door leading to the living quarters or place where food is handled and establish a separate outside entrance leading directly into the shop.
- 2) Every beauty shop shall be well lighted, well-ventilated and kept in a clean, orderly and sanitary condition at all times.
- 3) The practice of cosmetic therapy shall be carried on only in quarters especially equipped therefore and for which a shop owner's certificate has been issued.
- 4) Floors, walls and fixtures must be kept in a clean and sanitary condition at all times, and no carpet or floor cloth shall be used in the work area.
- 5) The owner and manager of every beauty shop shall see that it is supplied with an adequate supply of running water, both hot and cold, at all times.
- 6) Manicuring salons must have adequate ventilation.

The application, along with a detailed summary of all required equipment, sanitation requirements, and the permitting process, may be found on the Louisiana Board of Cosmetology's website.<sup>34</sup> To become eligible for licensure, a manicurist must be previously licensed in another state or country as recognized

<sup>&</sup>lt;sup>34</sup> Louisiana State Board of Cosmetology Shop Application. (n.d.). Retrieved May 10, 2024, from http://www.lsbc.louisiana.gov/pdfs/LSBC shop application.pdf

by the Louisiana Board of Cosmetology or successfully complete 500 hours of course credit at a Louisiana cosmetology school, pass the Louisiana state practicum, the Louisiana theory examination, and pay all applicable exam and application fees to the Board. Manicurist licenses are to be renewed annually for a fee of \$25.

# Nail Salons: Impact Analysis

## Stakeholder Analysis

Stakeholders reported several concerns regarding existing nail salons in New Orleans East: the number of businesses of this particular use type limits other economic development which impacts residents' quality of life, proprietors of nail salons may provide poor customer service due to language and cultural barriers, and existing nail salons create a perception that neighborhoods in New Orleans East will only support these types of businesses. However, stakeholders from all accounts do not have complaints regarding the operators or management of existing establishments.

#### Data

Staff examined the number of nail salons with active occupational licenses in each Council District (see Figure 12), then filtered that number to determine the number of nail salons with active occupational licenses that operate in New Orleans East (see *Figure 13*). Lastly, staff examined the population rates of 50,000 residents per capita, for each Council District and within New Orleans East, to determine prevalence rates for nail salons (see *Table 6*). During site visits, staff identified several nail salons that are currently operational, but not included in the revenue data. This margin of error may be a result of new businesses that are not yet reflected in the revenue data or those that are not current with their occupational licenses. A detailed summary of the analysis is provided below. The salons with active occupational licenses in each Council District (see Figure 12), then filtered that number to determine the number of nail salons with active occupational licenses in each Council District and within New Orleans East, to determine prevalence rates for nail salons (see Table 6). During site visits, staff identified several nail salons that are currently operational, but not included in the revenue data.

N.O. East	17	12	71,438	29,354	29.8	141

# Data Analysis

Staff reviewed July 2024 data from the Department of Revenue<sup>36</sup> and 2020 Census Block data.<sup>37</sup> The data identifies the number of nail salons in each Council District in addition to providing nail salon rates per capita, or 50,000 residents. Based on this data, there were 71 nail salons throughout the City. Of the 71 salons, 14 (20%) were in Council District A; 20 (28%) in Council District B; 9 (13%) in Council District C; 12 (17%) in Council District D; and 16 (22%) in Council District E. Council District D contains 7 salons per capital and District E contains 11. Together Council Districts D and E represent New Orleans East. With an average of 9 nail salons per 50,000 residents, staff determined that there is not a proliferation of nail salons in New Orleans East, which contained 17 or (24%) nail salons in the City, despite New Orleans East having more businesses per capita than the average.

The data does not indicate there is a higher prevalence of nail shops in New Orleans East, as compared to other parts of New Orleans. The highest concentration of nail salons is in District B, which contains a large part of the Uptown area.

#### Health Impact Assessment

Staff acknowledge that the public comments received in response to this study indicate a community perception that there is a proliferation of nail shops in New Orleans East. However, staff were unable to ascertain any negative impacts of nail shops in New Orleans East aside from general dissatisfaction with employee interactions. Stakeholder complaints about nail salons centered on the lack of compliance with design standards and customer interactions, which does not impact the health or safety of the public.

However, due to its frequent use of chemical, toxic or other hazardous materials, nails salons are potential brownfield sites. Thus, the adaptive reuse of a nail salon could require the removal or remediation of

<sup>&</sup>lt;sup>36</sup> While conducting site visits, staff determined that several businesses were missing from each of the retail goods use types. However, staff found data from the Department of Revenue to be the most complete data set, as it is derived from active occupational licenses.

<sup>&</sup>lt;sup>37</sup> Explore Census Data. (n.d.). Data.census.gov. https://data.census.gov/profile/New\_Orleans\_city,\_Louisiana? g=160XX00US2255000#housing

various environmental hazards before a new use can become operable at the site. The remediation and adaptive reuse process is further discussed in the recommendation section of this study.

# **Beauty Supply Shops: Overview**

Beauty Supply stores are a part of a 15-billion-dollar global beauty industry that generally provides customers with hair care, beauty products, clothing, and cosmetics. Beauty Supply Stores include popular retailers such as Ulta Beauty and Sally's Beauty Supply as well as smaller, individually owned stores. "Hair store" is the emic term used by customers that frequent these stores. During stakeholder meetings, representatives from Council District E stated smaller hair stores were the focus of the Motion. Specifically, New Orleans East contains a large Black demographic, and these stores are generally located exclusively in Black and Brown neighborhoods, while stores such as Ulta and Sally's are generally located within major commercial corridors throughout the City. Smaller independent stores are regarded "...simultaneously [as] a Black cultural and gendered retail experience. Beauty products in the store are tailored to the needs of Black or Brown women who frequent the store for wigs, braiding hair, lashes, makeup, clothes, and jewelry". 38 As retailers like Ulta and Sally's are not the intended focus of the study, they are not reflected in the subsequent data set.

As of 2013, approximately 300 of the upwards of 9,800 beauty supply stores nationwide were Black owned. It is suggested that many of these businesses are Korean owned, due to Korea's influence over the wig industry. In the 1960's-1970's, Korean wig merchants successfully lobbied the Korean government to outlaw the export of raw hair, so suppliers would be forced to export already produced wigs and/or extensions. <sup>39</sup> Subsequently, in 1965, the United States banned the import of wigs that contained hair from China, further strengthening Korea's stronghold on the industry. <sup>40</sup> Korean wig merchants also received lines of credit or loans from the government, and were able to obtain storefronts in the United States with investments that ranged from \$2,000 to \$20,000 dollars. <sup>41</sup> They often decided to open in Black neighborhoods as the cost to invest was lower than in other parts of the City, and Black consumers purchased more than 30% of the wigs sold in the United States. Black business owners face adversity when entering the wig business as Korean business owners can obtain products cheaper, often directly, from Korean merchants or refuse to sell them the products that they need for their businesses to thrive. <sup>42</sup>

In the Comprehensive Zoning Ordinance, *Beauty Supply Shops* are classified under the Retail Goods Establishment use. Retail Goods Establishments are considered low intensity commercial uses that are permitted by-right in most non-residential zoning districts throughout the City. They are generally located along commercial corridors, within small strip malls (see *Figure 14*) and in many instances, adjacent to nail salons (see *Figure 15*). Beauty supply shops are also permitted as a neighborhood commercial establishment within certain residential districts through the conditional use process. However, there are not any zoning districts in New Orleans East that permit neighborhood commercial establishments.

#### Definition within the Comprehensive Zoning Ordinance

The term *beauty supply shop* is not a distinct use designation in the Comprehensive Zoning Ordinance and is classified within the Retail Goods Establishment use designation per the following definition:

**Retail Goods Establishment**. A business that provides physical goods, products, or merchandise directly to the consumer, where such goods are typically available for immediate purchase and removal from the premises by the purchaser. A retail goods establishment does not include any adult uses. A retail goods establishment may not sell alcoholic beverages unless retail sales of packaged alcoholic beverages is allowed within the district and a separate approval is obtained for such use. A retail goods establishment that sells food products, such as a delicatessen, bakery, or grocery, may offer ancillary seating areas for consumption of food on the premises.

## **Use Standards**

There are no use standards specific to retail goods establishments.

## Use Permissions for Retail Goods Establishments

The use table below shows the zoning districts where Beauty Supply Stores, or "Retail Goods Establishments" uses are permitted ("P") and conditional ("C") uses.

## State and Other Regulation

Other than municipal permitting and zoning requirements, there are no additional state regulations for beauty supply shops.

## Beauty Supply Shops: Impact Analysis

#### Stakeholder Analysis

Stakeholders reported several comments about how beauty supply shops impacted their quality of life. They indicated that the excessive window signage, in addition to outdoor displays, are unsightly and negatively impact the design aesthetic of the surrounding neighborhoods. In addition, the stakeholders argue that the over-proliferation of beauty supply shops limit the desirability of higher end retailers to operate in New Orleans East, for fear that residents are unable to afford diversified retail. There were no complaints about the operators or management of these establishments.

Figure 14: Magnolia Marketplace Development

Figure 15: Beauty Express

Stakeholders referenced the Magnolia Marketplace Development at 2900 S. Claiborne Ave as an example of retail developments that they would like to see replicated in New Orleans East (see *Figure 18*). The Magnolia Marketplace Development along the S. Claiborne corridor includes various retail uses such as Canes, Ulta, TJ Max, Ross, and Five Below. This development is less than a block away from Beauty Express (see *Figure 15*), a beauty supply store, and less than a mile away from Queen Beauty Supply, which is directly across the street from Beauty Kingdom, another beauty supply store. This indicates that a variety of retail uses, that include beauty supply shops, can co-exist within less than a mile from each other and serve various community needs.

#### Data

Staff examined the number of beauty supply shops with active occupational licenses in each Council District (see Figure 16), then filtered that number to determine the number of beauty supply shops with active occupational licenses that operate in New Orleans East (see Table 9). Lastly, staff examined the population rates of 50,000 residents per capita, for each Council District and within New Orleans East, to determine prevalence rates for these beauty supply shops (see Table 9). During site visits, staff identified several beauty supply shops that are currently operational, but not included in the revenue data. This margin of error may be a result of new businesses that are not yet reflected in the revenue data or those that are not current with their occupational licenses. A detailed summary of the analysis is provided below.43

Figure 16. Beauty Supply Shops by Council District 44

**Table 9:** Beauty Supply Shops Per Capita (50,000)<sup>45</sup>

Total	53	35	380,204	192,255	95.2	880
N.O. East	7	5	71,438	29,354	29.8	141

#### Data Analysis

Staff reviewed a dataset from the Department of Revenue<sup>46</sup> and 2020 Census Block data. The data indicates the number of beauty supply shops in each Council District, in addition to providing prevalence rates per capita of 50,000 residents. Based on this data set, there were 53 stores that specialized in hair and hair care products throughout the city. District D, which contains a portion of New Orleans East, has 15 stores (28%) and District E, which contains the majority of New Orleans East, has 6 stores (11%).

Districts D and E have prevalence rates of 9 and 4 when adjusted by capita. Based on this data, staff determined that District D has the second highest prevalence of beauty supply shops in New Orleans and District E has the second lowest prevalence rate in the city. District C, however, which includes Algiers and the French Quarter, contained the most beauty supply shops at 21 shops (48%) and the highest prevalence rate, at 16, when adjusted by capita.

New Orleans East contains 7 (13%) beauty supply shops is on par with the average rate of 7 beauty supply shops per 50,000 residents. When adjusted per capita, New Orleans East has 5 beauty supply shops per 50,000 residents, which is below the average per capita. Per these findings, staff determine that there is not an over-proliferation of beauty supply shops in New Orleans East.

#### Health Impact Assessment

Staff were unable to ascertain any negative economic, environmental or other health impacts of beauty supply shops in New Orleans East. Stakeholder complaints for beauty supply shops centered on the lack of compliance with design standards, which does not impact on the health of residents.

<sup>&</sup>lt;sup>46</sup> While conducting site visits, staff determined that several businesses were missing from each of the retail goods use types. However, staff found data from the Department of Revenue to be the most complete data set, as it is derived from active occupational licenses.

## Convenience Stores: Overview

In New Orleans, convenience stores, or the emic term "corner stores", were historically owned and operated by immigrant and Black entrepreneurs. <sup>47</sup> Corner stores have historically been mixed-use structures, with the retail space located on the ground floor and residential uses located on the upper floor(s). Initially corner stores provided fresh produce, meat, and various household items. With the rise of food costs, full-service grocery stores, and the transition to a more auto-centric society, remaining corner stores have adapted to offer packaged foods, hot takeaway meals, tobacco products and alcohol. <sup>48</sup>

Convenience stores are part of the social and cultural fabric of New Orleans. Not only do stores provide owners with a livelihood, they also serve as a place for members of the community to gather. The facades of historic corner stores were built at a 45° angle, which created a canopy designed specifically for social interaction. As a meeting space, convenience stores were especially significant for people of color, who were often barred from white meeting spaces, neighborhoods and even schools, because of *de jure* or *defacto* segregation. <sup>49</sup>

Because New Orleans East was developed in the latter half of the 20<sup>th</sup> century, their convenience stores typically do not take the form of the historic corner stores common in the older parts of the city.

Figure 17. Convenience Store at 7045 Read Blvd (2018)

<sup>&</sup>lt;sup>47</sup> Environmental Protection Agency. (n.d.). EPA. https://www.epa.gov/sciencematters/where-rubber-meets-road-epa-researchers-study-environmental-and-health-impacts-tires

<sup>&</sup>lt;sup>48</sup> McCarthy, M. (2021, September 30). *Corner culture: The rebirth of the neighborhood corner store*. Preservation Resource Center of New Orleans. https://prcno.org/corner-culture-rebirth-neighborhood-corner-store/

<sup>&</sup>lt;sup>49</sup> De jure segregation refers to a legal separation of the races. De facto segregation typically refers to after the passage of the Civil Rights Act of 1964, which outlawed the legal separation of schools, meeting places, neighborhoods and more, due to race and or ethnic background. Even after its passage, segregation often still exists due to various intimidation tactics. (Leffler, 2014)

Figure 18. Convenience Store associated with a Gas Station at 10422 Chef Menteur Hwy (2019)

In the Comprehensive Zoning Ordinance, convenience stores are generally classified as a retail goods establishment. Retail goods establishments include businesses that provide physical goods, products, or merchandise directly to consumers for the consumer's immediate removal from the premises. Examples include souvenir shops, clothing and department stores, office supplies retailers, delicatessens, and stores connected to gas and filling stations. Convenience stores are generally permitted by-right in most commercial and mixed-use zoning districts. In certain residential zoning districts, retail goods establishments can be conditionally permitted as a neighborhood commercial establishment. Neighborhood commercial establishments include a broad range of low intensity commercial activities which include bakeries, coffee shops, law and other offices, child and adult day care centers, cellular providers, yoga studios, and art galleries. However, neighborhood commercial establishments are prohibited in the suburban residential districts which constitute the residential areas of New Orleans East. Therefore, convenience stores would only be permitted where retail goods establishments are allowed.

#### Definition within the Comprehensive Zoning Ordinance

The term *convenience store* is not a distinct use designation in the Comprehensive Zoning Ordinance. Generally, *convenience stores* operate in retail spaces under 5,000 square feet. Convenience stores are usually situated along historic, highly trafficked, or easily accessible corner sites in neighborhoods or along commercial and industrial corridors. Operating hours for stores not associated with a gas station are typically 6:00AM to 9:00PM, seven days a week, with slight variations, while convenience stores in conjunction with a gas station generally operate 24 hours a day, seven days a week.

Unlike a small box discount store, which retails physical goods, products, or merchandise directly to consumers at a price offered lower than the typical market price —usually in a retail environment 5,000 to 10,000 square feet in area— or a grocery store, which primarily retails fresh, frozen and specialty foods in a space that is typically 20,000 square feet and greater, most *convenience stores* sell victuals — hot takeaway meals and frozen and fresh meats — in addition to retailing its physical goods, products, merchandise, tobacco and alcohol.

The retail sale of alcohol is a separate and district use that convenience stores must acquire generally through conditional use approval. The stated practices coupled with the nature of its small-scale retail and limited variety of goods distinguish a *convenience store* from a small box discount store or grocery store. Thus, a *convenience store* is generally classified within the Comprehensive Zoning Ordinance under the Retail Goods Establishment use designation per the following definition:

**Retail Goods Establishment**. A business that provides physical goods, products, or merchandise directly to the consumer, where such goods are typically available for immediate purchase and removal from the premises by the purchaser. A retail goods establishment does not include any adult uses. A retail goods establishment may not sell alcoholic beverages unless retail sales of packaged alcoholic beverages is allowed within the district and a separate approval is obtained for such use. A retail goods establishment that sells food products, such as a delicatessen, bakery, or grocery, may offer ancillary seating areas for consumption of food on the premises.

#### **Use Standards**

There are no use standards for retail goods establishments.

#### Use Permissions for Retail Goods Establishments

Convenience Stores currently fall under the Retail Goods Establishment use. Retail Goods Establishments are entirely restricted from operating in any Suburban Neighborhood Residential Districts, which can be found in **Article 13 – Suburban Neighborhoods Residential Districts** (S-RS, S-RD, S-RM1, S-RM2, S-LRS1, S-LRS2, S-RLD1 S-RLD2, S-LRM1, S-LMR2, S-LP). The only commercial uses permitted in these districts are Day Care Centers or Child Care Centers as conditional or permitted uses depending on the zoning district. As is indicated below in the analysis of the location of Convenience Stores section, there are 50 Convenience Stores that operate in New Orleans East, which is a use allowed by-right in most non-residential districts.

The use table below shows the zoning districts where Retail Goods Establishments uses are permitted ("P") and conditional ("C") uses.

#### State and Other Regulations

In offering a variety of goods and merchandise, convenience store operators are required to obtain several licenses and permits from the Department of Safety and Permits and the State of Louisiana. Convenience stores that sell packaged alcohol must first apply for and obtain a Conditional Use from the New Orleans' City Council and City Planning Commission with the exception of stores located in C-3 Heavy Commercial Districts where the retail sale of packaged alcohol is permitted by-right. Conditional Use application fees vary per size of the project or development but are typically between \$1,160.00 and \$2,320.00. Following the Conditional Use approval for the Retail Sales of Packaged Alcoholic Beverages, store owners must also

obtain an Alcoholic Beverage Outlet (ABO) license<sup>50</sup> and Manager's Permit<sup>51</sup> from the Department of Safety and Permits in addition to an Alcohol Retailer permit from the State of Louisiana.<sup>52</sup> Respectively, fees for licenses and permits are between \$100.00 and \$500.00 with annual renewal fees mirroring the initial cost of the license or permit.

Businesses that opt to retail prepared or hot food must obtain state issued licenses, permits and certifications. Most licenses and permits are issued by the Louisiana Department of Health<sup>53</sup>, while various food safety certificates require third party approvals prior to receiving the final certificate from the state.<sup>54</sup> Lastly, stores that retail tobacco products require state issued permits, which include both an application and annual renewal fee,<sup>55</sup> and convenience stores connected to gas and fueling stations require additional state requirements and permits related to the site's fueling activities.

## Convenience Stores: Impact Analysis

## Stakeholder Analysis

Stakeholders reported a number of concerns regarding existing convenience stores in New Orleans East: (1) the number of businesses of this particular use type limits other economic development which impacts residents' quality of life; (2) some proprietors permit loitering, soliciting, the consumption of alcohol onpremises, and other activities that may promote crime; and (3) existing convenience stores create a perception that neighborhoods in New Orleans East will only support these types of business.

Despite these complaints, staff spoke with an Assistant City attorney that prosecutes permitees before the New Orleans Alcohol and Beverage Control Board. Staff was informed that Alcohol Beverage Outlets (ABO) complaints were generally connected with on-site consumption of alcohol typically associated with bars, not with convenience stores or the retail sale of packaged alcohol.

#### Data

Staff examined the number of convenience stores with active occupational licenses in each Council District (see *Figure 19*), then filtered that number to determine the number of convenience stores with active occupational licenses that operate in New Orleans East (see *Table 11*). Lastly, staff examined the population rates of 50,000 residents per capita, for each Council District and within New Orleans East, to determine prevalence rates for these convenience stores (see *Table 11*). During site visits, staff identified several convenience stores that are currently operational, but are not included in the revenue data. <sup>6</sup> This margin

#### Data Analysis

Staff reviewed July 2024 data from the Department of Revenue<sup>57</sup> and 2020 Census Block data<sup>58</sup>. The data identifies the number of convenience stores in each Council District in addition to providing convenience store rates per capita, or 50,000 residents. Based on this data, there were 231 convenience stores

<sup>&</sup>lt;sup>56</sup> Convenience Store data from the Department of Revenue is in the Appendix J pages 53-55.

<sup>&</sup>lt;sup>57</sup> While conducting site visits, staff determined that several businesses were missing from each of the retail goods use types. However, staff found data from the Department of Revenue to be the most complete data set, as it is derived from active occupational licenses.

<sup>&</sup>lt;sup>58</sup> Explore Census Data. (n.d.). Data.census.gov. https://data.census.gov/profile/New\_Orleans\_city,\_Louisiana? g=160XX00US2255000#housing

throughout the City. Of the 231 stores surveyed, 32 (14%) were in Council District A; 61 (26%) in Council District B; 59 (26%) in Council District C; 40 (17%) in Council District D; and 39 (17%) in Council District E. Council District D, which constitutes a small portion of New Orleans East, contained 7 convenience stores per capital and District E contained 11. Together Council Districts D and E represent New Orleans East. With an average of approximately 32 convenience stores per 50,000 residents, staff determined that there is not a proliferation of convenience stores in New Orleans East which contained 50 (22%) of convenience stores in the City or 35 convenience stores per capita.

Staff acknowledge that the public comments received in response to this study indicate a community perception that there is a proliferation of convenience stores in New Orleans East and as a result, the respondents felt their quality of life for residents in the East is negatively impacted. However, staff were unable to ascertain any negative environmental or economic impacts associated with convenience stores in New Orleans East. In addition, the data does not indicate there is a higher prevalence of convenience stores in New Orleans East compared to other parts of New Orleans. The data indicates the highest concentration of convenience stores per capita in District C, which is mostly comprised of the French Quarter, Marigny, Bywater and Westbank.

#### Health Impact Analysis

Many neighborhoods in New Orleans East as well as throughout the City of New Orleans are in a food desert. Food deserts are classified as areas in which residents lack access to fresh or nutritious foods. <sup>59</sup> Generally food deserts are located greater than a mile away from a full-service grocery store in urban or suburban areas and more than two miles in rural areas.

Stakeholders indicated that convenience stores contribute to food deserts in New Orleans East as they provide limited, if any, fresh fruit and vegetables. Stakeholders also argue that convenience stores occupy valuable retail space that would better be utilized by full-service grocery stores. The City Planning Commission's Small Box Retail Diversity Study sought to address aspects of these concerns by recommending distance requirements for small box discount retailers as well as incentives for retailers and full grocery stores to allocate additional shelf space for fresh fruits and vegetables. Convenience stores were excluded from the small box variety store definition and accompanying distance requirements as they are often attached to gas stations or maintain a gross floor area of less than 5,000 square feet. <sup>60</sup>

Moreover, stakeholders correlated the sale of alcohol for off-premises consumption at convenience stores with loitering and illegal or violent activities. However, the retail sale of alcohol is a separate and distinct use that convenience stores must acquire through conditional use approval in most zoning districts where this use is permitted. All conditional use requests require participation in the Neighborhood Participation

<sup>&</sup>lt;sup>59</sup> Karpyn, A. E., Riser, D., Tracy, T., Wang, R., & Shen, Y. E. (2019). The changing landscape of food deserts. *UNSCN nutrition*, *44*, 46–53.

<sup>&</sup>lt;sup>60</sup> Article 26 of the Comprehensive Zoning Ordinance describes a *Small Box Variety Store* as: A retail store between 5,000 and 15,000 square feet that sells at retail an assortment of physical goods, products, or merchandise directly to the consumer, including food or beverages for off-premises consumption, household products, personal grooming and health products, and other consumer goods. Small box variety stores do not include small box stores that:

<sup>1.</sup> contain a prescription pharmacy;

<sup>2.</sup> sell gasoline or diesel fuel;

<sup>3.</sup> primarily sell specialty food items (e.g. meat, seafood, cheese, or oils and vinegars);

<sup>4.</sup> dedicate at least 15% of shelf space to fresh or fresh frozen foods; or

<sup>5.</sup> dedicate less than 5% of shelf space to food sales.

Program, which gives community members a chance to publicly voice support, opposition, or concern on how potential alcohol licenses at a convenience store would impact their community.

Lastly, convenience store themselves are not found to be hazardous or harmful to one's health or the environment, but convenience stores in connection with a gas station are likely to be considered brownfields per their connection with the site's petroleum and oil usage. Brownfield remediation and adaptive reuse for convenience stores in connection with a gas station is further discussed in the recommendation section of this study.

# Analysis of Land Use Recommendations Proposed in Council Motion M-24-74

The Retail Goods Establishment Study was modeled on a similar request from City Council in 2018 that directed the City Planning Commission to study and make land-use recommendations to limit small box variety stores (colloquially known as "Dollar Stores") in the Small Box Retail Diversity Study. The hypothesis was that the over-proliferation of dollar stores, particularly in New Orleans East, may impede the entry of full-service grocery stores. The recommendations from the Small Box Retail Diversity Study resulted in a subsequent text amendment that codified a new use, definition, use permissions and use standards for small box variety stores. The use standards, found in **Article 20, Section 20.3.NNN** of the Comprehensive Zoning Ordinance, notably included distance limitations prohibiting small box variety stores within 2 miles of other small box variety stores or 1 mile of other small box variety stores, depending on the location.

The request to study the use of small box variety stores and the four retail establishments outlined in this study are remarkably similar. However, the concluding recommendations in this study do not suggest implementing a distance limitation for beauty supply stores, convenience stores, tire shops or nail salons for several reasons. In the Small Box Retail Diversity Study, it was found there was an oversaturation of this use compared with the rest of the city and identified a relative lack of full grocery stores in New Orleans East, limiting access to fresh food options. A casual relationship was established between the oversaturation of the small box variety stores and a harmful impact (food deserts) where it was determined a distance requirement would have a direct impact on addressing that harm. Lastly, the City Planning Commission was able to make specific recommendations regarding farmer's markets and grocery stores that would incentivize such uses in the East. None of the factors that led to those recommendations in the Small Box Variety Store Study could be established in this study, so the City Planning Commission staff was not able to make similar recommendations.

Below are the City Planning Commission staff's responses to the proposed land-use considerations in Motion M-24-74, the Motion that initiated this study.

#### **Conditional Use Requirement**

**Purpose:** A conditional use, as described in **Article 4, Section 4.3.A,** of the Comprehensive Zoning Ordinance states that:

"Within each zoning district, the use of land and structures are substantially uniform. However, there are certain uses that, because of their unique characteristics, cannot be properly classified in certain districts without consideration, in each case, of the impact of those uses upon neighboring land and of the public need for the particular use at the particular location. These uses are allowed as conditional uses within the zoning districts."

The purpose of a conditional use is to provide greater evaluation if a use could be appropriate at a site. If determined to be appropriate, the use will be accompanied by a set of specific conditions that must be met. If those conditions cannot be met, the resulting situation could have a negative impact on existing and future surroundings. For example, a bar, due to its traffic, noise, or hours of operation, may impose

negative impacts upon the surrounding community. However, a bar may operate at a specific location through a conditional use if certain conditions are met which should curtail negative impacts.

#### Staff Recommendation: Nail Salons, Beauty Supply Shops, Convenience Stores

Staff concluded there was not an over-proliferation of tire shops, nail salons, beauty supply shops or convenience stores in New Orleans East compared to the rest of the city. While stakeholders have expressed concerns related to each establishment, staff did not identify any land use challenges. Likewise, staff have not determined a level of harm that would warrant a conditional use for nail salons, convenience stores or beauty supply shops.

For these reasons, staff does not recommend enforcement restrictions on current developments that are not linked to demonstratable harm as such restrictions are likely to (a) stifle competition, (b) artificially restrict market supply and demand, and (c) do not resolve the underlying desire for increased business or economic diversity in New Orleans East. Per such findings, stakeholder concerns may best be addressed through alternative measures.

#### Staff Recommendation: Tire Shops

Staff were unable to determine a verifiable link between existing tire shops and the prevalence of illegal tire dumping in the New Orleans East area. Data indicates that one-third of tire shops are in New Orleans East, and tire shops are generally located along industrial corridors and not in residential communities. However, as *Table 3* indicates, tire shops are allowed in various commercial, mixed-use and industrial districts. *Chapter 13* of the *Master Plan* outlines parts of New Orleans East as an "Opportunity Site". The goal of an opportunity site is to transform a vacant or underutilized light industrial and commercial area in New Orleans, to a vibrant, contemporary, pedestrian friendly, transit-oriented neighborhood, main street, or commercial center.<sup>61</sup>

Opportunity sites in New Orleans East include the Lincoln beach and the former Lake Forest Plaza, both of which are slated for redevelopment. The influx of additional tire shops in these areas would be antithetical to the goals of opportunity sites as intended in of the Master Plan. The former *Lake Forest Plaza* site is located at 9909 Lake Forest Blvd in a C-3 Heavy Commercial District, where tire shops are permitted by right. The Lincoln Beach site, located at 13835 Lincoln Beach Blvd, and nearby corridors are currently under consideration for several Future Land Use Map (FLUM) amendments. One amendment, if adopted, could up-FLUM the area from a RSF-Post Residential Single-Family Post-War designation to a NC Neighborhood Commercial designation, which would be compatible with several zoning classifications that allow tire shops by-right or through the conditional use process. <sup>62</sup>

The location of existing tire shops, as indicated in the data, concludes that tire shops in New Orleans East are primarily located along Chef Menteur Highway and Downman Road, which are considered appropriate industrial corridors for these businesses. Tire shops, per their autocentric

<sup>&</sup>lt;sup>61</sup> City of New Orleans. (n.d.). *Chapter 13 - Land Use Plan* | *Master Plan*, Nola.Gov. https://masterplan.nola.gov/volume-2/13/

<sup>&</sup>lt;sup>62</sup> See PD 09-05 in Appendix H.

nature, may be considered for a conditional use requirement if they are proposed in the pedestrian friendly, mixed-use opportunity sites that are designated in New Orleans East.

## **Distance Requirement (Measurement)**

**Purpose:** A *distance requirement (measurement)* as defined in **Article 26** of the Comprehensive Zoning Ordinance is:

**Distance Requirement (Measurement).** A minimum distance or spacing requirement is measured along the centerline of the adjacent public right-of-way from the nearest point of the lot on which such use is located to the nearest point of a lot where another use is required to be located.

The implementation of a distance requirement for tire shops, nail salons, beauty supply shops and convenience stores in New Orleans East would restrict the concentration of new businesses by requiring new establishments to maintain a specified distance between it and existing uses.

#### Staff Recommendation

The implementation of a distance requirement generally results in mitigating negative impacts of an over proliferation of a particular use or business type within a specified area that may pose negative economic, quality of life conditions, or a combination thereof. However, staff were unable to determine associated negative impacts or an over-proliferation from the surveyed retail establishments that would warrant a distance requirement, despite New Orleans East having more businesses per capita than the average per capita throughout the rest of the city.

Stakeholders' concerns regarding each business generally center around enforcement concerns and not specific land use issues. Accordingly, staff have not determined any demonstratable land use harm. For these reasons, staff do not recommend a distance requirement on future tire shops, nail salons, beauty supply shops or convenience stores in New Orleans East and consider such a restriction to likely (a) stifle existing competition, (b) restrict market supply and demand, and (c) counteract supportive measures to increase economic diversity in New Orleans East. Likewise, stakeholder concerns may best be addressed through alternative measures.

#### Additional Land Use Recommendations

## **Additional Design Standards**

**Purpose:** Design standards as intended in the Comprehensive Zoning Ordinance, bring uniformity to the development pattern or style of a specified area. Intrinsically, design standards also mitigate negative or unintended design choices for newly constructed or recently renovated developments.

Residents expressed that beauty supply shops, tire shops and convenience stores need storefront beautification efforts and additional design standards, which primarily referenced signage, property maintenance, parking lot conditions, loitering and soliciting activities.

#### Staff Recommendation: Tire Shops

Stakeholders indicated that tire shop storefronts are often filled with litter as well an uncovered tire parts. Staff acknowledge that the use standards for Motor Vehicle Service and Repair shops,

including tire shops, is vague and recommend amending the use standards for Minor or Major Motor Vehicle Service and Repair sites to require tire shops to screen the display of tires and service equipment in view of the public right of way when not in use. Staff also recommend the creation of various incentives for tire shop owners that come into compliance for current and proposed regulation updates.

#### Staff Recommendation: Nail Salons

Stakeholders did not indicate any concerns with the overall facade or site management of nail salons, and as such, staff do not recommend any additional design standards for nail salons.

#### Staff Recommendation: Beauty Supply Shops

Stakeholders indicated that beauty supply shops often display excessive signage in their store front windows. Staff recommend increased enforcement of existing signage regulations and the creation of incentives for store owners that come into compliance.

#### Staff Recommendation: Convenience Stores

Stakeholders indicated that issues with convenience stores include loitering, littering, soliciting activities, and parking lot conditions. Staff and other City agencies were unable to determine a causation between reported incidents, violations, and the retail sale of alcohol at existing establishments. Staff, therefore, recommend enhanced enforcement on these issues as a collaborative effort with the Department of Safety and Permits and various stakeholders in addition to the creation of incentives, similar to the Fresh Food Retailers Initiative. <sup>63</sup>

#### Moratorium

**Purpose:** The purpose of a moratorium would prohibit the creation of additional tire shops, nail salons, beauty supply shops, and convenience stores in New Orleans East.

#### Staff Recommendation

Staff were unable to determine a level of harm that would warrant a moratorium for any of the above-mentioned business types. Feedback from various stakeholders indicates a believed causation between existing retail goods and the lack of other retail uses in New Orleans East. However, staff were unable to identify a connection between the lack of certain retail uses in relation to existing tire shops, nail salons, beauty supply shops and convenience stores. Creating ways in which to restrict or limit retail goods establishments is unlikely to spur new high-end retail but could hurt consumers who utilize existing establishments as well as have a disparate impact on minorities and minority small business owners.

For these reasons, the staff does not recommend a moratorium on the subject retail goods establishments in New Orleans East and alternatively suggests a market analysis to investigate the business economy and provide workable solutions.

<sup>&</sup>lt;sup>63</sup> The City of New Orleans' Fresh Food Retailers Initiative (FFRI) program was designed to increase access to fresh foods in traditionally underserved neighborhoods in the city in addition to providing quality employment opportunities and serving as a catalyst for neighborhood revitalization. (*City - Fresh Food Retailer Initiative - City of New Orleans*. (2023). Nola.gov. https://nola.gov/city/fresh-food-retailers-initiative/)

#### **Separate Use Designation**

**Purpose:** Before specific action can be taken regarding the City Council's and stakeholders' views and concerns on retail goods establishments in New Orleans East, a separate use designation for tire shops, nail salons, beauty supply shops and convenience stores is required. A separate use designation within the Comprehensive Zoning Ordinance would result in the creation of a formal definition and the potential for unique use standards relative to each business type. Use standards are the rules that govern the development and function of a particular development type, which often help to mitigate negative impacts to the public or surrounding developments. Uses, once created, are evaluated for compatibility with existing zoning districts or designated areas, such as an overlay district or interim zoning district.

#### Staff Recommendation

Staff have determined that the additional regulatory oversight created with a separate use designation is not warranted.

### Other Recommendations

#### **Brownfield Remediation**

**Purpose:** To mitigate potentially harmful impacts following the decommission of a retail establishment site that contains potentially hazardous materials, staff recommend brownfield remediation prior to the site's readaptation. The Environmental Protection Agency defines a brownfield site as "a property, where the expansion, redevelopment or reuse may be complicated by the presence or potential presence of a hazardous substance, pollutant or contaminant".<sup>64</sup> Adaptive reuse for certain retail goods establishments could require the removal or remediation of various environmental hazards before new uses can be operable at the site. Remediation generally requires a Phase I or Phase II Environmental Site Assessment (ESA)<sup>65</sup>.

A Phase I ESA is conducted by a vetted environmental contractor and includes the following:

- 1. Assess the property visually with a site visit.
- 2. Research all historical records, which include Sanborn maps, archives, and environmental data.
- 3. Compile data and submit report of findings.

If Phase I has findings of potential recognized environmental conditions (RECs), Phase II is recommended before continuing with adaptive reuse.

#### Phase II ESA includes the following:

- 1. Borings/samples taken from soil, water, building materials (such as tiles, mastic and paint chips), and various locations on-site.
- 2. Samples are sent to and tested in an approved third-party laboratory.
- 3. Results are delivered in a comprehensive report which includes recommendations for remediation.

https://www.epa.gov/brownfields/understanding-brownfields

 $<sup>^{64}</sup>$  Environmental Protection Agency. (n.d.). Understanding Brownfields. EPA.

<sup>&</sup>lt;sup>65</sup> Assessing brownfield sites fact sheet. (n.d.). https://www.epa.gov/sites/default/files/2020-07/documents/assessing brownfield sites.pdf

Phase II results show the exact location and concentration of contaminants, which include lead, asbestos, hydrochlorides, polychlorinated biphenyls (PCBs), volatile organic compounds (VOCs), and many others. Phase II also provides a cost estimate for recommended remediation. <sup>66</sup>

#### Staff Recommendation: Tire Shops

As tire shops and mechanic shops are generally associated with fuels, oils and other potential contaminants, a Phase I ESA is recommended prior to a site's adaptive reuse. A Phase II is the next step. An Underground Storage Tank assessment may be needed if fuel storage is associated with the tire shop.

#### Staff Recommendation: Nail Salons

Many nail salons use chemicals and other potentially hazardous chemicals when administering a service. As such, staff recommend a Phase I ESA prior to a nail salon's adaptive reuse to determine the site's RECs.

#### Staff Recommendation: Beauty Supply Shops

Beauty supply shops generally retail packaged goods that are bought and later used by patrons away from the site; therefore, brownfield remediation is not recommended.

#### Staff Recommendation: Convenience Stores

Gas stations commonly move directly to a Phase II ESAs based on the site's petroleum and oil usage. Likewise, staff recommends a Phase II ESA for decommissioned convenience stores in connection with a gas station. In a Phase II ESA, samples and borings are taken sitewide to determine fuel leaks that affect the soil and/or groundwater followed by an assessment of underground storage tanks (UST's). The Louisiana Department of Environmental Quality (LDEQ) Underground Storage Tank Program offers funding to assess, register, and determine if fuel tanks need to be capped and stored in place or pulled from the site and disposed of at the proper landfill<sup>67</sup> prior to the site's redevelopment or adaptive reuse.

#### **Enforcement Task Force (ETF)**

**Purpose:** The Department of Safety and Permits specifically expressed a need for increased visibility and enforcement of applicable zoning codes and regulations in the public sphere. Stakeholders proposed the creation of an enforcement task force that would provide a public (intergovernmental), private partnership — which includes City agencies, business owners, community leaders, and members of the public — to assist the Department of Safety and Permits with enforcement of any existing or proposed regulations.

The enforcement task force would set goals that baseline compliance and through consistency, visitations, inspections schedules, and clearly defined goals, the task force would be equipped to assess shortcomings and provide paths forward for violators. The ETF could maintain records for business owners that display excessive signage or allow excessive littering and loitering. To maintain its effectiveness, the task force would have the authority to levy fines and other measures for actors in violation of both zoning and

<sup>&</sup>lt;sup>66</sup> Environmental Protection Agency. (n.d.). Understanding Brownfields. EPA. https://www.epa.gov/brownfields/understanding-brownfields

<sup>&</sup>lt;sup>67</sup> Brownfields. Louisiana Department of Environmental Quality. (n.d.). https://deq.louisiana.gov/page/brownfields

building codes with the intended outcome that actors pursue and come into compliance.

#### Staff Recommendation

Staff find the recommendation of an enforcement task force to be consistent with the goals and objectives of the Comprehensive Zoning Ordinance and thereby support such measures for the oversight of all uses citywide, inclusive of those identified in this study. Specifically, staff, like stakeholders, assert that increased enforcement of existing zoning provisions would lead to a decrease in negative impacts as witnessed by members of the community. As part of its recommendation, staff propose a collaborative, interagency investigation of 311 data, recent and frequent zoning violations, and a review of best enforcement practices.

#### **New Orleans East Development District (NOEDD)**

**Purpose:** In meeting with various stakeholders in New Orleans East, stakeholders expressed a desire for a formalized private-public partnership for New Orleans East, similar to the existing Downtown Development District (DDD). The DDD provides developer assistance, financial incentives, public safety, cleaning, event space, and research and planning for downtown New Orleans. Stakeholders in New Orleans East most notably want a centralized body responsible for furthering the economic development and fiscal viability of New Orleans East with the power to incentivize and disincentivize business and economic activity.

#### Staff Recommendation

Staff spoke to the head of Economic Development and was informed that there are a couple of existing entities in New Orleans East that have taxing authority - ENONAC (Eastern New Orleans Advisory Commission) and the Regional Business Park. ENONAC's enabling legislation allows for the organization to authorize a parcel fee on properties in New Orleans East. The Regional Business Park can authorize a millage within its jurisdiction, which is south of Chef Menteur Highway. Neither organization is currently exercising these taxing authorities. ENONAC's parcel fee would not provide a substantial amount of revenue to support economic development projects in the area and would likely only cover costs of staffing. The New Orleans Regional Business Park would only be able to utilize revenues from its millage in the business park. It is possible that the establishment of another development district would benefit certain areas of New Orleans East to support economic development in the area. Economic Development Districts (EDDs) work best when targeted to a narrow geography and aim to accomplish very specific economic development goals. The nuances of a new or refined NOEDD would be explored in greater detail through the impending New Orleans East Renaissance Plan.

#### The New Orleans East Renaissance Plan

**Purpose:** Originally completed in 2004, the New Orleans East Renaissance Plan was a neighborhood-focused, community-led planning process meant to provide a comprehensive strategy for land use and development decisions in New Orleans East. Given the sudden and catastrophic damage New Orleans East endured in the aftermath of Hurricane Katrina, the plan was adopted but immediately rendered obsolete. Since then, New Orleans East, like other parts of the City, has adopted several plans, yet a comprehensive plan that streamlines issues such as housing, density, transit, mixed use development, retail mix, industrial development, recreation, and natural resources is needed and was funded as part of the City's 2025

budget. Thus, the implications of instituting such a plan are likely to centralize development efforts and spur the much needed and desired economic activity stakeholders long to see.

Feedback provided by representatives from Council Districts D and E and various stakeholders indicates the need for further review, investigation, and long-term planning for the New Orleans East area.

#### Staff Recommendation

Staff support the recommendation for a long-term and comprehensive business market analysis of New Orleans East. Currently New Orleans East holds three (3) opportunity zones (see *Figure 20*) which are different from opportunity sites in that they are federally recognized and located in underutilized commercial and institutional areas. These are prime areas for development that can help spur economic development in New Orleans East.

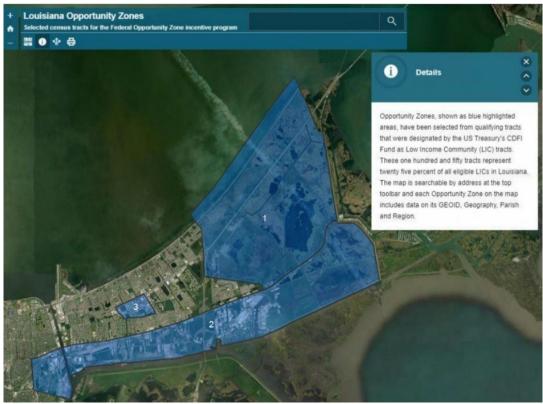

Figure 20. New Orleans East Opportunity Zones<sup>68</sup>

The funding of a revised and updated New Orleans East Renaissance Plan is a major victory for the City. A consultant working under the direction of the City Planning Commission and the Office of Economic Development is expected to complete the plan. The plan would study possible updates to land use economic investments zoning, market and survey analyses; create and maintain a community profile; and present strategic solutions to land use, environment, transportation, and other suburban issues. Similarly, a New Orleans East market analysis could provide an overview of purchasing power and market demand for various businesses in New Orleans East, which could be presented to prospective retailers to encourage economic development in the East.

<sup>&</sup>lt;sup>68</sup> Orleans Business Alliance. (2024, September 19). "Louisiana Opportunity Zones" [Web Map]. Scale Not Given. "New Orleans Opportunity Zones". 2017. https://arcg.is/1Tz9rG1

## Conclusion

Staff encountered several limitations when compiling the study data. The revenue codes only accounted for sites with active occupational licenses. As such, several sites may have been operating with inactive licenses, or recently received occupational licenses and not included in the overall analysis. Further, the filtering of revenue codes for tire shops and beauty supply shops may have led to the exclusion or inclusion of sites that could be relevant/irrelevant to the study.

Based on data that was readily available, staff found that there is *no* proliferation for nail salons, beauty supply shops, convenience stores or tire shops in New Orleans East. The largest number of tire shops (see *Figure* 8), convenience stores (see *Figure* 19) and nail salons (see *Figure* 11) are in District B, which contains most of Uptown, even when adjusted by capita. The largest number of beauty supply shops (see *Figure* 16) are in District C, which contains the French Quarter and Algiers, even when adjusted by capita. These types of retail uses are part of the economic fabric of the East, as well as the city of New Orleans, and represent less than 5% (see *Table* 1) of the total businesses in the City of New Orleans.

The public comments that were received during this study whether in person, during stakeholder meetings or via survey, were generally not land-use-related concerns. Instead, the comments focused on quality of life, enforcement and economic development issues. Quality of life and enforcement issues of current regulations can be improved through the allocation of additional resources to the Department of Sanitation, the Department of Safety and Permits, to create an Enforcement Task Force. The crux of this study is the lack of economic development in New Orleans East. To solve this problem requires a more robust and nuanced approach beyond limiting certain retail uses.

In more recent years, larger investments in New Orleans East, such as Lowes and the Faubourg Brewery shuttered in 2019 in 2024. Similarly, ongoing plans for the revitalization of Lincoln Beach and the redevelopment of the former Six Flags site may be catalysts for economic investment, but the realization of such plans is still several years away. The lack of investment in New Orleans East cannot be boiled down to a single cause, and the current economic landscape is a confluence of factors that need to be studied holistically.

The aim of this study - the Retail Goods Establishment Study - targets business that are assumed to deter more desirable commerce from locating in New Orleans East. The effort of limiting certain uses through distance requirements or conditional use approval is a piecemeal land-use initiative that is not likely to result in the intended outcome but may result in removing opportunities and wealth from small local businesses. Alternatively, the impending update to the New Orleans East Renaissance Plan, proposes a comprehensive approach to realizing the full potential of the area by evaluating New Orleans East with a post-COVID-19 lens and with major developments on the horizon.

# City Planning Commission Public Hearing

The City Planning Commission staff presented a summary of the Retail Goods Establishment Study findings and recommendations at the City Planning Commission public hearing on December 10, 2024. No constituents provided comments in support or opposition. Commissioner Lunn asked if the staff's recommendation included text amendments to the Comprehensive Zoning ordinance, and to further explain the proposed Enforcement Task Force. City Planning Commission staff confirmed that staff's recommendation did not include subsequent text amendments and that the proposed Enforcement Task Force would include a partnership between several City departments as well as members of the public and/or private entities. Commissioner Lunn also asked if the City Planning Commission staff is obligated to complete studies that are created by the City Council. The Executive Director stated he is unaware of a mandate, but that the City Planning Commission staff generally completes studies at the Council request.. Commissioner Jordan asked if any of the funds allocated for the New Orleans East Renaissance plan would be directed to the City Planning Commission. The Executive Director explained that all the allocated funds would be directed to the City Planning commission to direct and execute the plan.

Commissioner Lunn made a motion to adopt the study, which was seconded by Commissioner Witry. The motion was passed unanimously.

#### MOTION:

BE IT MOVED BY THE CITY PLANNING COMMISSION THAT THE RETAIL GOODS ESTABLISHMENT STUDY IS HEREBY ADOPTED WITH STAFF RECOMMENDATIONS. BE IT FURTHER MOVED THAT THE EXECUTIVE DIRECTOR IS HEREBY AUTHORIZED TO NOTIFY THE CITY COUNCIL OF SAID ACTION.

YEAS: Brown, Jordan, Lunn, Stewart, Witry

NAYS: None

RECUSED: None

ABSENT: Flick, Johnson, Joshi-Gupta, Steeg

They provide a necessary service close to home without being an eyesore near residential homes.	More than enough to choose from.  I personally don't frequent them, but they don't bother me. They must have customers fifthey are staying open. It might be the architecture that is bothering people, not the service being provided. They are perfectly legitimate businesses, but the strip malis in the East look rundown and shebby.	More than enough to choose from.  No. If a business has customers, it has the right to operate and remain open. The problem in the East is that there is no unified vision for design and asserbitists. The buildings look cheap and rundown.	outside of all of them.  What convenience stores? The gas stations? We need gas stations, so perhaps this question is about doller stores. If a busines is not morally deleterious, it is fine.	be nice.  A swimming pool. We need a pool in the East that charges for a day pass. A pool that actually opens up every once in a while. A swimming pool that people are allowed to go swimming in a swimming pool that isn't closed 360 days out of the year. A private pool that lets people swim in it.	Thank you for the opportunity for us to share our thoughts.  No.
	Black	PPNA Lake Forest Estates Neighborhood		4 4	4		Yes. Tire shops are not the best use of retail space, plus there's an abundance of illegal tire dumping in the area. The tires aren't being shipped in from other places.	Yes. Beauty supply stores are needed, but not the quantity of stores that are currently housed in the area. The stores do not add many jobs.	See above.	Yes. Convenience stores are best for quick; simple items, I.e., those of convenience. There are very little fresh foods available and places like this do not provide jobs.	I'd be interested in more grocery stores, particularly markets offering fresh, whole foods such as Sprouts. I'd also be interested in a Trader Joe's. Grocery stores are NECESSARY. We need additional retail such as Target and IKEA.

5/14/2024 14:39:25	Lakeshore North Subdivision	Black	None of the Above, but a business owner.		4 5	5	5	No, not to me. My husband and counted at least 10 shops along CheffMichoudDownman Rd. As long ascries are not dumped in areas around the east we are happy.	There are a lot of them, I wish that they would spread out. There are at leastsix within a two mile radius.	Too many! At least 10.	Yes, people hanging out in front of stores. Stores not well kept in and out of the stores. Too many signs plastered on windows of store and no beautification.	I would like to see a Sam's or Costro. A MALL!! Office Depot, more dine in upscale restaurants. A movie theater. The building of the theme park. We had this before, are we not worthy of this again?	More police presence, more beaufication, erasing blighted building, crime cameras were trescare being dumped liegally, he fixing of our streets and not just filling hem in end more places where our children and adults can work and play (up grade Jube Brown Park for children and adults). Also would live to see a black museum and a rock dimbring park.
5/14/2024 14:57:13	Brianwood Estates	Black	Eastern New Orleans Advisory Commission		4 5	3	s	Yes, if they are the ones dumping all of those tres throughout the community.	Beauty supply stores are needed in the community, however the over saturation is a deliment to commerce	It is nice to have nall salons; however an over suburation is a detirment to commerce	Yes, they are needed but the over soluration is a detriment. Especially the ones that are not talen care of, allow patrons to be harassed by beggars and just allow for their location to be generally unsale. Also the workers make you see like so well as the soluration of the understanding the patron and it is unfortunate the quality of products and gas are also questionable at best.	I travel to Jefferson Parish or St. Tammary Parish to buy groceries, cichting, shoes, and household goods. The growth in Etimood or Fereneaux Town Centre should have been minicided here in NOE. We are a working loss community in the East, I should be alide to buy the same calibre of thems 1 buy in other parishes, in my own backyard. I do not shop at Walmart and that should not be my only option. I love to set out but I have nowhere to go to set out but I have nowhere to go.	As a NOE homeowner for 20 years I am very disappointed that we have been allowed to be paired in the control political play, takes he had to change the perception of this part of bown. You know why no order in the brands you know why no order in the brands you know why no order in the brands you know why no making no the conduction.
5/14/2024 15:22:14	Edgelake Subdivision	Black	Edgelake Home Owners		5 5	5	. 4	Yes, because you have used tires being dumped in areas because shops do not want to pay the cost to have them properly disposed of.	It is money leaving the area because they are not owned by those live in the area. It also makes it look like that is all we have available and care about.	I understand taking care of oneself but you do not see such a concentration of them in other parts of the city.	Many of them seem to be tied to a gas station.	We are in need of shopping areas, i.e. outdoor mail, restaurants as found in other parts of the dity, movie theaters, other forms of entertainment (bowling, skaling),	I would like to see a speedy development of the Amusement Park and Lincoh Beach. I would also like to see more patrol cars on the street. Finally I would like to see parents taking responsibility for their children by teaching them the basics of respect for neighbors, environment and self. Lastly I would like to see those on corners stilling and pan-handing removed

5/16/2024 6:30:22	New Orleans east	Black	None	3	5	5	5	Makes the neighborhood look like a dump	Too many beauty supply stores not enough grocery or franchise stores	Unsure	Yes. They are our only option to shop unless we travel to Metairie or Slidell	community centers, parks, community gardens, etc. Bring life back into NOE	I pray something is finally done for the neighborhood
S162024 8:57:59	New Orleans East	Black	New Orleans East Restoration Project	ŧ	5	5	5	Yes, the enforcement is almost non existent and as a result, you see lingsily dumped ties that should not be allowed by LDEO.  Yes, tires are dumped any and	Yes, there's a proliferation of these types of stores that are not owned by us nor do they give back to the community. All of the products are harmful to our community due to chemical ingredients.	Yes. There's a prolferation of these types of stores that are not owned by us, but take our money and do not give back to the community.	Absolutely! They are not owned by us, they take our money and are not good neighbors. They are dirty, and self fried food on afmost every owner. This directly mpacts quality of life, unhealthy eating that costs the state money due to high medical costs.	Whole Foods, Rouses Supermarket, Ross Clothing, Marshalls, TJ MAXX, DSW, Neiphorkood Walmart, K&G Clothing store, Upscale modern cluster development, Chick fil a Cheddars, Texas Roadhouse, Buffalo Wal Wings, Chipote, Olive Garden, Sultry Vegan, Raisin Canes, Quicking, Racetrack, Plat, Lowes or Flying J truck stop, dirt ble, drag rading taxk, Game on, Main Event, Bowling Alley.	There have been countless studies, it's time for action. There should be a law against what has happened to this community, live are a dood desert, and people are getting sick toom the presety look options that plage this community. Shares on the Clyot flow Orlans for adaining the profile action and disentimizations of this prediominantly African American community, blo better

5/18/2024 17:16:23	3 Little Woods	Black	Small Business Owners	5	5		i .	Yes. Too much traffic	Yes! Takes away business from other small businesses (boutiques) & theft is always high at these stores.		Yes. Too much hanging out in front these establishments making them dangerous & crime is extremely high at these locations.	Retail stores, big chain grocery	
5/19/2024 10:14:21	1 Gentily	French Creole	No	4	4			negative impact on the quality of life. The large amount of improperly disposed tires in New Orleans East	Yes, beauty supply stores negatively impact on the quality of life in New Orleans East. I have commercial property in the area and have seen remnants of hair pieces/wigs in the area when traveling to my property.	I believe this is a positive impact. This encourages self-love and self-	This is a negative impact. Convenience stores attract many types of people. This leads to types of people. This has and orime.	I would like to see more grocery stores, upscale restaurants, and family friendly venues like a movie theater, skating ring, bowling alley, and etc.	I would like to see less blight and the East to return back to the daw of the 70s and 80s.
5/19/2024 15:28:52	2 New Orleans East	Black	New Orleans East Matters	5	5			The tire shops on impact the quality of life damaging the look and beauty of New Orleans East. Every tire	Yes, the east need more than beauty stores. We big box retailers	Yes, the nail salons and beauty supply stories are so over saturated	Yes, the east so much more than convenient stores. Certain convenient stores brings crime in the area.	I would to see Costco, Sam's Club, Target & big box restaurants in the east.	The east needs a mall similar to Houston Premium Outlets & Tanger Outlets Gonzales.
5/20/2024 9 02 22	2 Little Woods	Riack	Eastern New Orleans Advisory					. No	No.		Yes. Most have people hanging out, husting and/or begging		New Orleans East is a very large middle class area but has little ementies as would be expected in a middle class neighborhood. One would expect a Buillard areane, or Chef Menteur Highway to be saturated with all types of businesses like Veterans Menoral Highway in Meatire but one must drive out of the neighborhood in many cases to fulfill a variety of needs.
5/20/2024 10:37:16		Black	None					No	No	No	No.	Large Retailer, Non-Fast food	Mo
5/20/2024 10:37:16		Black	Not formally					If the shops are contributing to illegal dumping of tires, then yes. If not, no. Why not partner with tire shops to			Many dollar stores are not well-maintained. They deter other businesses like procerv store.	I would like the dollar stores that are clean and well-organized to offer some fresh food options. Some dollar stores are good neighbors. I would like clothing stores and restaurants with affordable, healthy food. Maybe one more coffee shop. Something for kids and familles, like a book store, bowling alley, places	Thank you for your work

273 responses

#### **Appendix F.** Stakeholder Meetings Summary

#### Stakeholder meetings

#### Nail shops

#### (District E, Enonac, Cyndi Nguyen

- No issue with design or operator operations
- Perception that the number of stores is limiting other economic development (District E meeting)

#### (New Orleans East Matters)

Poor customer service

#### Tire shops

#### (District E, Enonac, Cyndi Nguyen)

- Possible use type to incorporate additional design standards (lighting etc.)
- Perception that the number of stores is limiting other economic development (District E.)
- Several stakeholders believe tire shops are located where they need to be along Chef and Downman corridor

#### (New Orleans East Matters)

- Independently owned tire shops may directly or indirectly contribute to illegal tire dumping.
- Requests investigation into who is perpetuating the tire dumping and more enforcement to prevent it.

#### Beauty Supply shops

- Possible use type to incorporate additional design standards (lighting, removal of excessive window signage etc.)
- No issue with operator operations
- Perception that the number of stores is limiting other economic development

#### Convenience Stores

- Possible use type to incorporate additional design standards (lighting etc.)
- Perception of over proliferation
- Loitering, crime
- Lack of fresh foods
- Perception that the number of stores is limiting other economic development
- Possible land use waivers for incorporating more fresh food options (fruits and vegetables)

#### Appendix F. Stakeholder Meetings Summary Cont'd

#### **Safety and Permits**

- Almost fully staff and can do better with enforcement.
- Stated that the creation of individual use standards (for nail shops, convenience stores, beauty supply shops and tire shops) would create an abundance of non-conforming uses.
- Additional non-conforming uses would place a burden on S&P staff regarding report writing, fee implementation and enforcement.
- Business owners may create work arounds to not be listed as a specific use, to not to have to comply with any updated use standards.
- Believes it would be difficult to clearly define each business as a separate use.

#### **Jeff Schwartz**

- Incentives exist or can be created to encourage developers to build in New Orleans East
- There's an issue with absentee landlords that "landbank" properties in hopes of higher tier developments.
- A full business analysis for New Orleans East can help drive development.
- Perceptions about crime and or lack of income may dissuade potential investors.

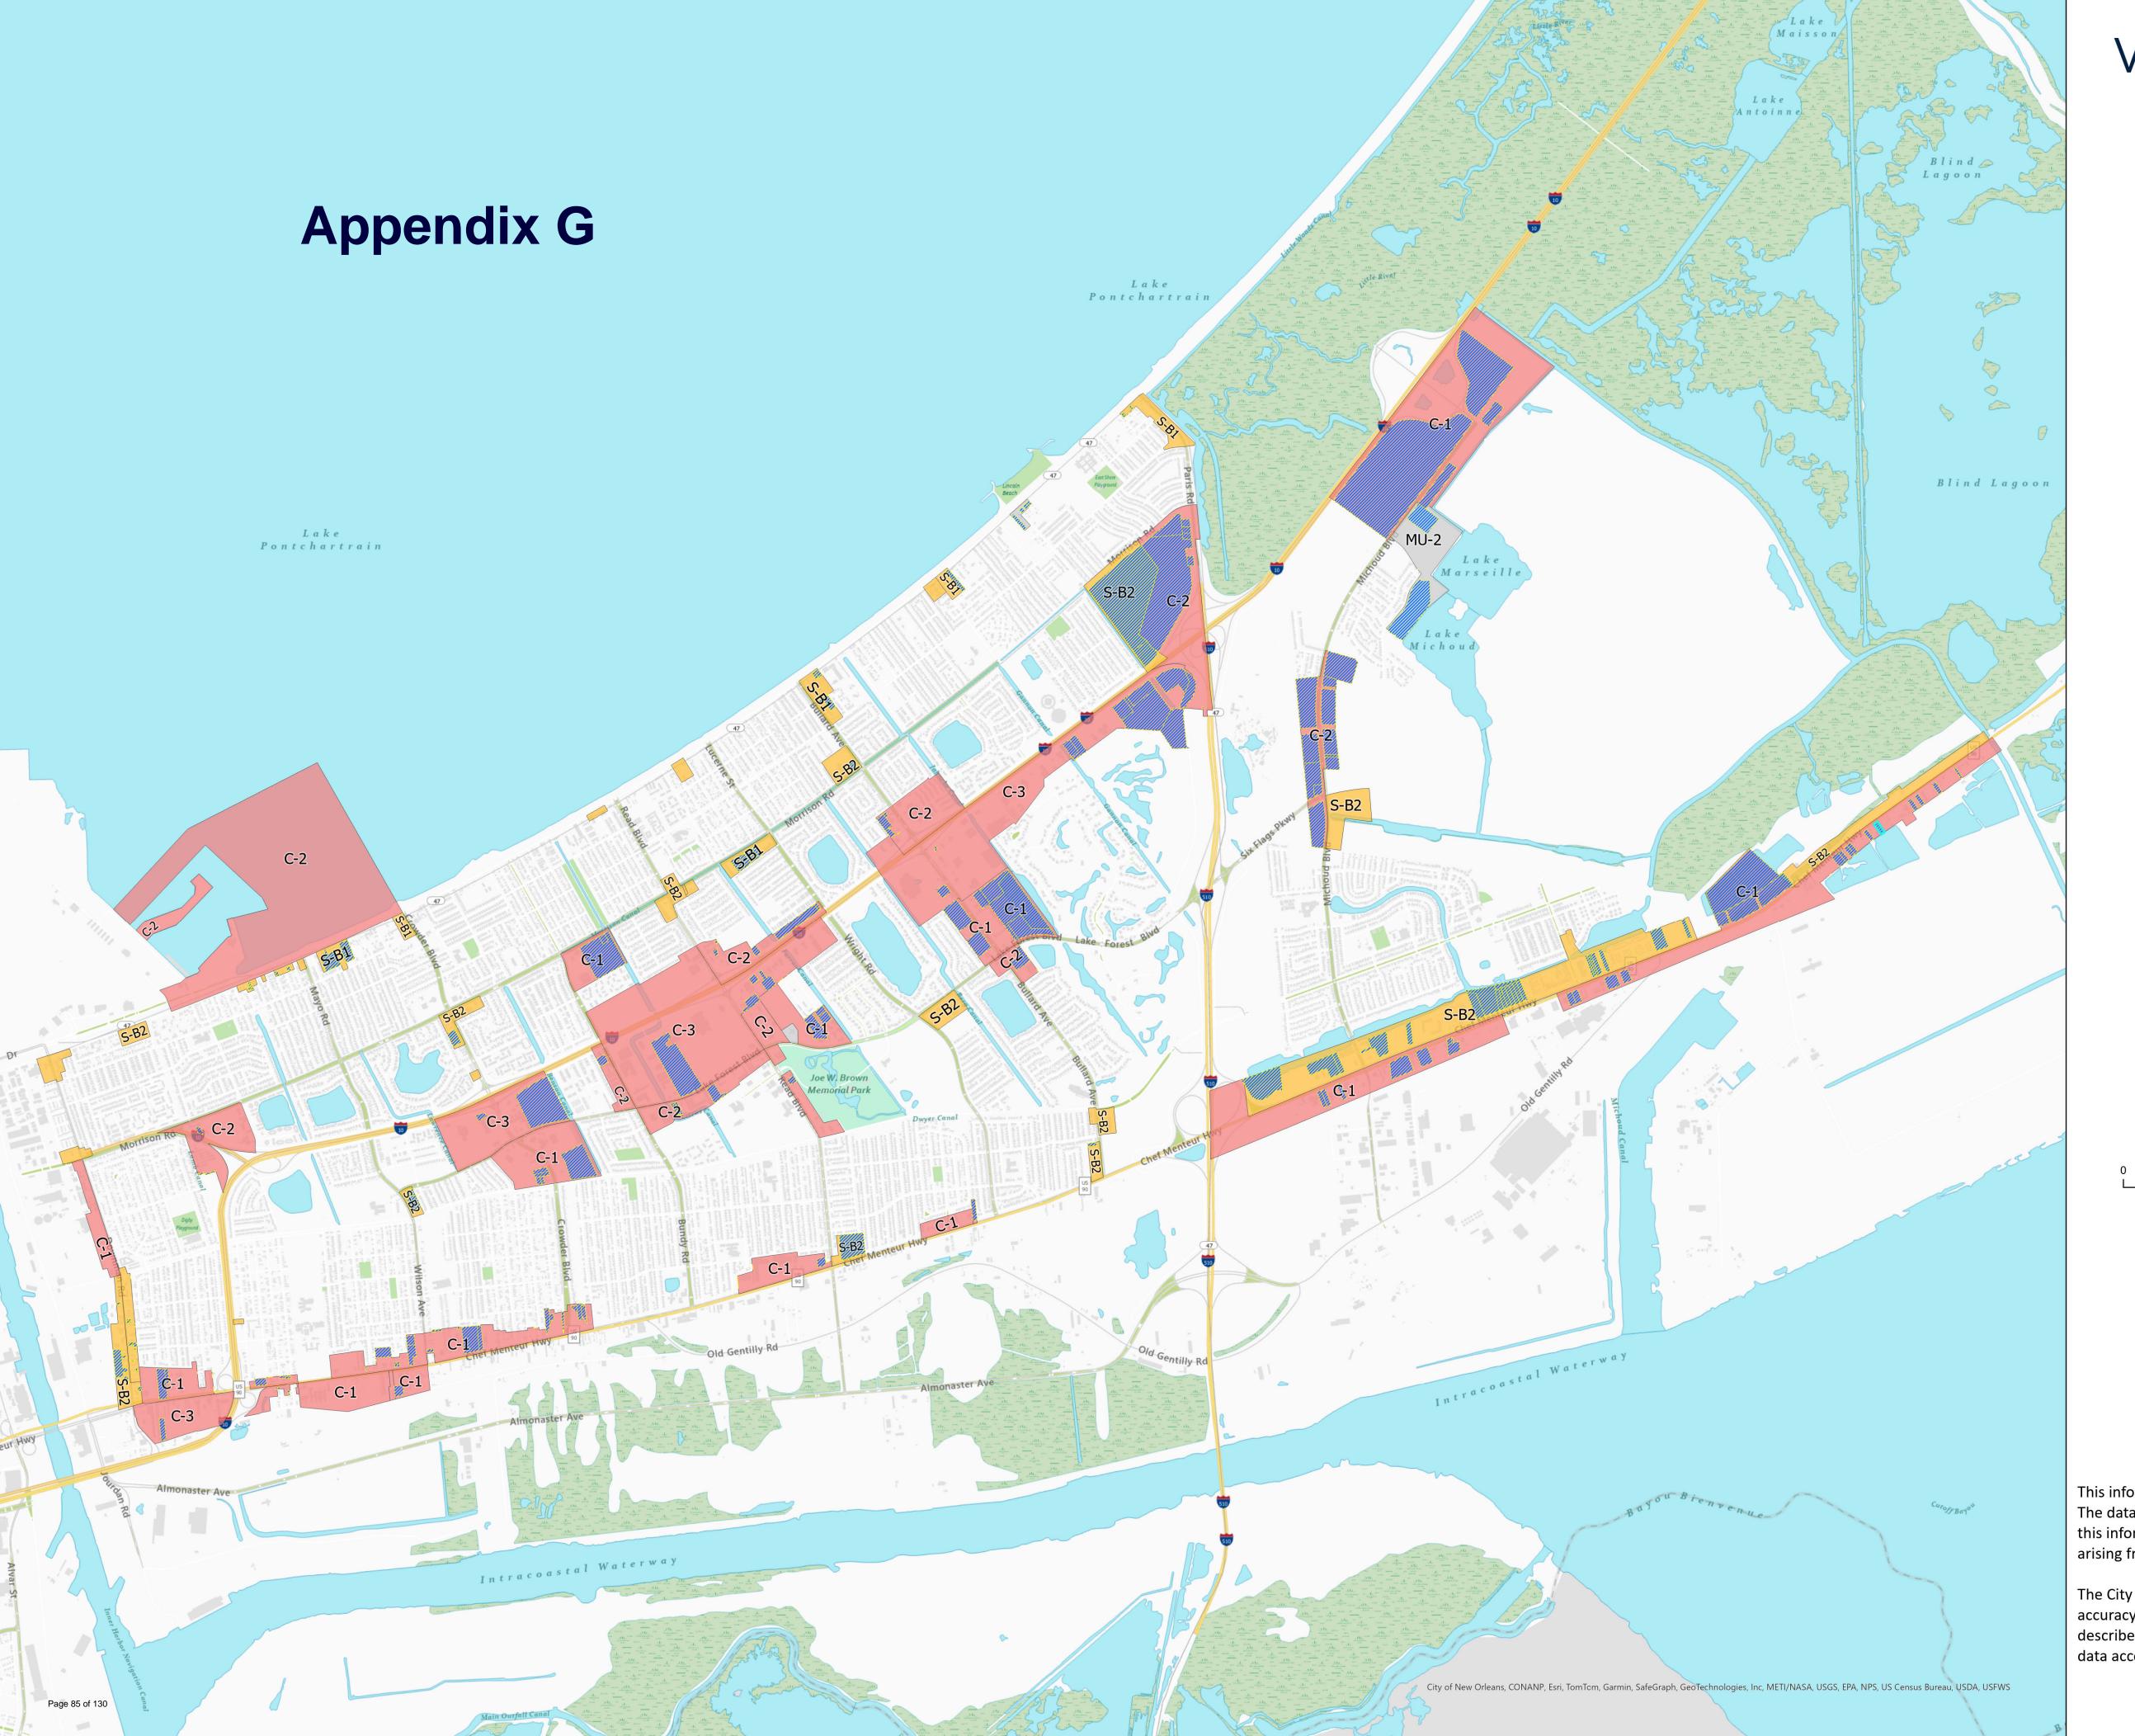

#### **NOMAR**

- Development incentives could help encourage development.
- Will send list of vacant and occupied commercial development in N.O.E.
- Does not feel businesses that are a part of the study are hindering economic development.
- Some property owners can have high tenant turnover rate. They need businesses that will stay and thrive.

#### **Christy Verges Peachy**

- Businesses listed as part of the study are a part of the economic landscape and economically viable.
- CU and or distance requirements may penalize property owners that are having difficulty keeping tenants in their store fronts.
- If CU and other requirements are created, the City should lease some of the store fronts to help property owners.
- Some property owners may be "landbanking" properties for higher tier developments.
- There's a huge perception of crime in N.O.E. that may dissuade investment.
- Property owners can do more to protect property to dissuade theft and other crime.
- List of properties located at Wtsvergespropertieis.com

### Appendix O. PD 09-05 Final Staff Report

# PLANNING DISTRICT 9 FUTURE LAND USE MAP AMENDMENT REQUESTS STAFF REPORT

Request number: PD-9-05

Applicant: City Planning Commission

Request: Change of Future Land Use Map Designation from RSF-Post Residential

Single-Family Post-War to NC Neighborhood Commercial.

Location: The petitioned property is located on Lot PT-1, Square -1, in the Third

Municipal District, bounded by Hayne Boulevard, Wales Street, Vincent Road and Lawrence Street. The municipal address is 13860 Hayne Blvd.

FLUM Map:

Current Zoning: S-MU Suburban Neighborhood Mixed-Use District

Current Land Use: Undeveloped

Purpose: The applicant stated the request would allow for commercial development

along the Lincoln Beach corridor and correct a split Future Land Use Map (FLUM) designation. The subject is currently has two FLUM designations, the Neighborhood Commercial and the Residential Single-Family Post War designations. The requested amendment would rectify the split-FLUM situation and create a consistent FLUM designation for the entirety of the

site.

Staff Analysis: Site Description & Land Use: The subject site is an approximately 33,750

square foot property located near the intersection of Hayne Boulevard and

### Appendix O. PD 09-05 Final Staff Report Continued

Vincent Road in the Little Woods neighborhood in New Orleans East. The site is currently vacant and undeveloped.

Surrounding Land Use Trends: The area around the subject property includes mostly vacant properties with instances of commercial uses and single-family residences intermixed.

Surrounding FLUM and Zoning Designations: The site is in an S-MU Suburban Neighborhood Mixed-Use District and is surrounded by a large Suburban S-RS Single-Family Residential District.

The portion of the site nearest to Hayne Blvd has a NC Neighborhood Commercial FLUM designation, while the portion nearest to Wales St. has a RSF-Post Residential Single-Family Post-War FLUM designation, which creates a split FLUM designation. This creates a situation where the S-MU Suburban Mixed-Use District, the zoning district presently on the site, is inconsistent with the portion of the site with the Residential Single-Family Post-War FLUM designation.

Impacts: The subject site is located across Hayne Boulevard from Lincon Beach. This request could assist with the revitalization of historic Lincoln Beach in the Little Woods neighborhood which has been underutilized for decades. Lincoln Beach opened in 1954 during segregation and was a haven for Black residents that could not attend other beaches or amusement parks. The park officially closed in 1964 after the passage of the Civil Rights Act of 1964. Recently, community members throughout the City of New Orleans have begun cleaning the park and have developed a partnership with the City, to eventually reopen the park. This proposed FLUM change is a step to correct the split FLUM designation and support the development of the park, in addition to other commercial uses in the surrounding neighborhood.

### Appendix O. PD 09-05 Final Staff Report Continued

DIVER TAKES PLUNGE AT LINCOLN BEACH July 5, 1959, A popular attraction at Lincoln Beach Saturday was the amusement center's swimming pool. A swimmer takes a high dive from one of the pool's diving boards. (Lincoln Beach opened in 1954, catering to black residents, who were not allowed at the other, all-white public swimming pools in the area. In 1964, the courts decreed a racially nondiscriminatory policy for privately operated facilities on public lands, letting black citizens swim in other pools, and Lincoln Beach closed.) ORG XMIT: NOLA2015081118083780CHARLES F. BENNETT

Given the underutilized surrounding parcels, a neighborhood commercial FLUM of the entirety of the site could encourage commercial investment, which would increase the walkability and overall vitality of the area. The zoning regulations should help mitigate the impacts of any future development of this site. Therefore, the staff recommends a Neighborhood Commercial FLUM designation.

**Recommendation:** Approval of the FLUM Designation Change to Neighborhood Commercial.

#### Reasons for Recommendation:

- 1. The recommendation will support commercial development along the historic Lincoln Beach corridor.
- 2. This recommendation will correct a split FLUM designation.

### Appendix O. PD 09-05 Final Staff Report Continued

#### **City Planning Commission Hearing (March 5, 2024)**

The City Planning Commission hosted a meeting in the City Council Chambers of City Hall. Staff presented the case to the commission with the recommendation of approval. There were three speakers present in opposition of the request. Commissioner Stewart made a motion to approve the request per staff's recommendation of approval, which was seconded by Commissioner Joshi-Gupta and adopted.

#### Motion:

BE IT MOVED BY THE CITY PLANNING COMMISSION THAT **PLANNING DISTRICT 9-05** IS HEREBY RECOMMENDED FOR **APPROVAL**. BE IT FURTHER MOVED THAT THE EXECUTIVE DIRECTOR IS HEREBY AUTHORIZED TO NOTIFY THE CITY COUNCIL OF SAID ACTION.

YEAS: Flick, Joshi-Gupta, Jordan, Steeg, Stewart, Witry

NAYS:

ABSENT: Brown, Lunn

#### Reasons for Recommendation:

- 1. The recommendation will support commercial development along the historic Lincoln Beach corridor.
- 2. This recommendation will correct a split FLUM designation.

## **Appendix P. Tire Shops Ordinance**

#### **ORDINANCE**

#### CITY OF NEW ORLEANS

8

9

10

11

12

13

14

- 1. For the purposes of this Division, the following terms shall have the following meanings:
  - a. Abandoned shall mean waste tires and/or waste tire material discarded without adhering to the proper disposal or processing standards required by these regulations.
    - b. *City* shall mean the City of New Orleans.
    - c. *Destination* shall mean a facility where waste tires and/or waste tire material is processed, recycled, collected, stored and/or disposed after transportation
    - d. *Disposal* means the depositing, dumping, or placing of waste tires or waste tire material on or into any land or water so that such waste tires, waste tire material,

15		or any constituent thereof, may have the potential for entering the environment, o
16		being emitted into the air, or discharged into any waters of the state of Louisiana.
17	e.	
18		Environmental Quality, used for identifying the quantity, type, origin,
19		transportation, and destination of waste tires and/or waste tire material from the
20		tire dealer to the authorized destination facility.
21	f.	Motor Vehicle shall mean an automobile, motorcycle, truck, trailer, semi-trailer,
22		or any combination of truck, tractor, and semi-trailer, or any other vehicle
23		designed and approved for use on the public streets of this City, used to transport
24		persons or property and propelled by power other than muscular power.
25	g.	
26		which tires, waste tires, and/or waste tire material is located. The site shall be
27		inclusive of any abutting or adjoining right-of-way that is occupied by tires or
28		waste tires regardless of the legal status of such occupancy.
29	h.	Tire shall mean a continuous solid or pneumatic rubber covering encircling the
30		wheel of a motor vehicle.
31	i.	Tire Dealer shall mean any person, business, or firm that engages in the sale of
32		tires, including recapped or retreaded tires, for use on motor vehicles.
33	j.	Transporter shall mean a person who transports waste tires.
34	k.	Unauthorized Waste Tire Pile shall mean an accumulation of more than 20 waste
35		tires whose storage and/or disposal is not authorized by the Louisiana Department
36		of Environmental Quality.
37	I.	Waste Tire shall mean any tire that is no longer suitable for its original purpose
38		because of wear, damage, or defect and/or has been discarded by the consumer.
39		This term shall also apply to any tire which has been previously installed on a
40		motor vehicle that has been removed from that vehicle and is not actively being
41		offered for sale by facility at which it is stored, regardless of the suitability of
42		such tire for resale pursuant to Louisiana Department of Public Safety regulations.
43	Sec. 26-416. –	General Authority.

2

Page 127 of 130

The departments of health, sanitation, safety and permits, and any other municipal department or agency that is responsible for the health and sanitary condition of the city may enforce the provisions of this Division. Sec. 26-417. – Enforcement. 1. Failure of any person, business, or entity to comply with any of the provisions of this Division shall be in violation of this Code. 2. Violations of this Division shall be subject administrative adjudication pursuant to Chapter 6 of this Code.

#### Sec. 26-418. – Operational Standards.

- 1. Tire dealers shall possess an Occupational License issued pursuant to this Code by the Department of Finance, authorizing the conduct of business in the City of New Orleans.
- 2. Tire dealers which store or may store more than 20 waste tires shall, within 30 days of commencement of business operations, notify the Louisiana Department of Environmental Quality of their existence and obtain a generator identification number. Storage of more than 20 waste tires, as provided in this Division, without a generator identification number shall be a violation of this Code.
- 3. Tire dealers shall prominently display to the public the notification provided by the Louisiana Department of Environmental Quality indicating that:
  - a. "It is unlawful for any person to dispose, discard, burn, or otherwise release waste tires to the environment in a manner in contravention to the Louisiana Solid Waste Regulations. A fine of up to \$32,500 per day per violation may be imposed on any company or individual who violates these rules and regulations."
  - b. "All Louisiana tire dealers are required to collect a waste tire cleanup and recycling fee from the consumer at the time of the retail sale of \$2 for each passenger/light truck tire, \$5 for each medium truck tire, \$10 for each off-road tire, and \$1.25 for recapped or retreaded tires. These fees shall also be collected upon replacement of all recall and adjustment tires. Tire fee categories are defined in the Waste Tire Regulations. This fee must be collected whether or not the purchaser retains the waste tires. Tire dealers must accept from the purchaser, at

Page 128 of 130 3

the time of sale, one waste tire for every tire sold, unless the purchaser elects to retain the waste tire. The department does not require the collection of fees on the sale of tires weighing 500 pounds or more, solid tires, or tires which are de minimis in nature, including but not limited to lawn mower tires, bicycle tires, and golf cart tires."

- 4. Generators of waste tires, required to register in accordance with LAC 33:VII.10519.A, shall comply with the manifest requirements of LAC 33:VII.10534.
  - 5. Waste tires may be stored for up to 120 days after receipt or generation; however, storage up to 365 days may be permitted, provided:
    - a. The storage is solely for the purpose of accumulating such quantities as are necessary for cost effective transportation and processing; and,
    - b. Documentation supporting the storage period and quantity generated is made available at the tire dealer's facility for audit and/or inspection.
  - 6. No more than 150 waste tires shall be stored at the generator's place of business at one time, unless stored indoors or in a transportable collection container.
  - 7. No tire dealer shall allow the removal of waste tires from his place of business by anyone other than a transporter that is properly authorized and licensed by the Louisiana Department of Environmental Quality, unless the tire dealer generates 50 or less waste tires per month from the sale of 50 tires.
    - a. If 50 tires or less are generated per month, the tire dealer may transport up to 20 waste tires to a permitted processing facility. Documentation supporting the number of tires sold or generated, and documentation indicating delivery to or disposal through a state permitted processing facility shall be made available at the tire dealer's facility for audit and/or inspection
- 8. Waste tires shall be segregated from any tires offered for sale or resale by the tire dealer.
- 9. Tire dealers shall maintain completed manifests, from a transporter authorized by the State of Louisiana to perform such function, for a minimum of five (5) years and shall make such manifests available for audit and/or inspection at the tire dealer's place of business during regular business hours.
- Sec. 26-419. Storage of New, Used, and Waste Tires.

103	1. Tire dealers shall not engage in outdoor storage of new, used, or waste tires except in						
104	compliance with the standards of the Comprehensive Zoning Ordinance.						
105	2. Storage of tires may not be located on a different parcel, lot, or site than the business site						
106							
107	3. Storage may not be located on the public right-of-way; such storage violates Section 146-						
108	494 of this Code and shall constitute a separate violation under this Division.						
109	4. Storage areas of all new, used, or waste tires collected and/or stored by a tire dealer shall						
110	provide:						
111	a. A cover adequate to exclude water from the waste tires;						
112	b. Vector and vermin control	l;					
113	c. Means to prevent or control standing water in the tires and storage area.						
114	5. Tire dealers shall not be eligible for sidewalk use permits pursuant to Chapter 146 for the						
115	display or placement of tires.						
116	16 Secs. 26-420 through 26-430. – Reserved."
