2020 Stop and Search Annual Report

On at least an annual basis, NOPD shall issue a report summarizing the stop and search data collected, the analysis of that data, and the steps taken to correct problems and build on successes. The report shall be made publicly available. [Consent Decree ¶153]

The purpose of this report is to summarize and analyze the stop and search data collected for the past year. The report answers several key questions:

- 1) How many stops occurred in 2020? And, how have these stops varied by neighborhood, race/ethnicity of the subject, sex of the subject, type of subject (driver, passenger, or pedestrian), age of the subject, time of day, and type of stop?
- 2) What was the result of the stop (arrest, Law Enforcement Assisted Diversion, citation, summons, warning, or no action), and how did that vary based upon the race, sex, and age of the subject?
- 3) Did a search occur? What type of search occurred? How did that action vary based upon the race, sex, and age of the subject?
- 4) Was contraband seized? How did that action vary based upon the race, sex, and age of the subject?

The data are displayed in graphics throughout the report and in the appendices. For comparison, visit https://nola.gov/nopd/nopd-consent-decree/ to view the Stop and Search Annual Report from previous years.

Key Definitions

Age – Age of the subject is based on the subject's date of birth or apparent age, if the subject refuses to provide information or the officer cannot legally demand identification.

Contraband – Items which are illegally possessed. This includes the following:

- a) Drugs any substance defined, enumerated, or included in federal or state criminal statute or regulations, 21 CFR Chapter 1308.11-15 or La. R.S. 40:964, or any substance which may hereafter be designated as a controlled dangerous substance by amendment or supplementation of such regulations or statute. The term shall not include distilled spirits, wine, malt beverages, or tobacco;
- b) Weapons includes any items that are illegally possessed which, in the manner used, is calculated or likely to produce death or great bodily harm. Usually a firearm or edged weapon for Field Interview Card purposes;
- c) Other any other item that is not a drug or a weapon which is illegally possessed.

Field Interview Card (FIC) – The method NOPD utilizes to document official Stops/Terry Stops and other discretionary interactions with members of the public. To conduct a field interview, an officer must have reasonable suspicion that the subject has been, is, or is about to be, engaged in the commission of a crime. According to departmental policy, only one FIC entry should be made per incident.

Sex – sex of the subject is entered by the officer and is based on the officer's observation, if not provided to the officer by the subject.

Neighborhood – Neighborhoods are defined using the neighborhood boundaries disseminated by The Data Center (datacenterresearch.org).

Race/ethnicity – Race/ethnicity of the subject is entered by the officer and is based on the officer's observation.

Search – An inspection, examination, or viewing of persons, places, or items in which an individual has a legitimate expectation of privacy. The U.S. Constitution generally requires law enforcement to obtain a warrant prior to conducting a search. There are, however, limited exceptions to the warrant requirement, including the following types of searches:

- a) Consent to search permission given to a law enforcement officer to search a person, vehicle or structure by one who has the legal right to do so;
- b) Exigent circumstances –A compelling urgency or true emergency that an officer can specifically describe not using vague terms or boilerplate language. Circumstances that cause a reasonable person to believe that prompt action is necessary to prevent injury to himself/herself or others.
- c) Incident to arrest a search that takes place during or immediately after a physical arrest of a person who will be booked;
- d) Inventory an administrative search conducted to itemize and identify property for safe- keeping;
- e) Plain view if an officer sees an item that is immediately recognizable as contraband and they are in a place they have a legal right to be when the viewing is made, the item can be seized;
- f) Pat down/frisk An external examination of the outer garments of an individual for the purpose of ensuring the individual does not possess any weapons. A pat down may only be performed when it is based on an officer's reasonable suspicion that the person is armed and dangerous and must be limited to what is necessary to detect weapons
- g) Vehicle Exception Officers may search a vehicle without a search warrant if they have probable cause to believe that evidence or contraband is in the vehicle. The scope of

the search is limited to only the area that the officers have probable cause to search.

Stop –A brief, minimally intrusive detention of a subject, including pedestrians, bikers, and/or the occupants of a vehicle, during which a reasonable person in the subject's position would not feel free to leave, as defined in Terry v. Ohio, 392 U.S. 1 (1968).

Investigatory Stop – The temporary involuntary detention and questioning of a person and/or vehicle and its occupants to investigate potential criminal conduct. To conduct an investigatory stop, the officer must have reasonable suspicion that the individual or vehicle occupant has engaged, is engaging, or is about to engage in criminal conduct.

Vehicle stop—The involuntary detention of a motor vehicle and its occupants. Vehicle stops may be conducted (1) where there is probable cause to believe that the driver has committed a traffic violation or (2) where there is reasonable suspicion that a vehicle occupant has engaged, is engaging, or is about to engage in criminal conduct.

Stop result – A stop may end in any of the six manners listed below:

- a) No action the stop ends with no enforcement action taken by the officer;
- b) Warning the stop ends in only a verbal warning by the officer;
- c) Citation the stop ends with the subject receiving a citation;
- d) Summons the stop ends with the subject receiving a summons in lieu of aphysical arrest;
- e) Arrest the stop ends with the subject in the physical custody of the officer awaiting booking into a jail facility; or
- f) LEAD (Law Enforcement Assisted Diversion) the stop ends with the subject, who could have been charged with a misdemeanor, booked into jail or issued a summons, and referred for prosecution, engaged instead by LEAD program staff (a program coordinator and case management team) working with the City's Health Department and a local service provider.

Event type – Field interview cards can be categorized into the different event types that describe the initial reason for the interaction. The event types available on the FIC are listed below:

- a) Call for service the officer is dispatched by the Orleans Parish Communications District;
- b) Citizen contact the officer initiates a duty-related conversation with a person;
- c) Criminal violation the officer observes a violation of law other than a traffic violation;
- d) Flagged down a person gains the officer's attention to report a problem or observation;
- e) Juvenile violation the officer observes a juvenile violating the law;
- f) Present at crime scene while on the scene of a crime, the officer initiates aduty-related conversation with a person;
- g) Subject person the officer initiates a duty related conversation with a person who is a subject in a criminal violation;

- h) Subject vehicle the officer initiates a duty related conversation with a person who is in a vehicle that is present or involved in a criminal violation;
- i) Traffic violation the officer observes a violation of a traffic offense; and
- j) Other any other stop or detention by an officer.

Relevant policies

The following approved policies govern NOPD's actions with respect to stops, searches, and arrests:

- Search and Seizure Chapter 1.2.4
- Terry Stops and Investigatory Stops Chapter 1.2.4.1
- Search Warrant Consent Forms and Reviews Chapter 1.2.4.2
- Vehicle Stops Chapter 1.2.4.3
- Traffic Citations Chapter 61.3
- Handcuffing and Restraint Devices Chapter 1.3.1.1
- Evidence and Property Chapter 84.1
- Arrests and Miranda Rights Chapter 1.9 and Chapter 1.9.1
- Arrest Warrant Wanted Persons Chapter 1.9.2
- Alternatives to Arrest Chapter 1.2.6
- Alternatives to Arrest Sobering Center Chapter 1.2.7
- Field Interview Cards Chapter 41.12
- Juveniles Chapter 44.2
- Juvenile Warning Notice and Summons Chapter 44.3
- Temporary Custody of Juveniles Chapter 44.1.4

NOPD policies are available at nola.gov/nopd/policies.

Year-to-Year comparisons

As NOPD develops new policies and updates forms, the protocols governing stops, searches, and arrests may change. As a result, the underlying data and what they represent will change as well. This may present difficulty in conducting direct comparisons between 2020 and prior years, or subsequent years. Nevertheless, many comparisons between the 2015 through 2020 data are given below.

District Attorney Acceptance Rates

In 2020, the district attorney refused four cases because of the officer's actions. The four cases accounted for 8 arrests, 0.1% of the 6,765 arrests in 2020. For three of the cases the DA used the refusal code "Incomplete Police Investigation" and for one they used "No probable cause for arrest." To address these refusals, NOPD reviewed the four cases and conducted redirections and additional trainings with the involved officers and their supervisors for three of the cases.

Allegations of Bias

Misconduct complaints involving discrimination are investigated and assessed according to Chapter 41.13 – Bias Free Policing and other related policies such as Chapter 41.13.1 – Interactions with LGBTQ Persons. A complaint is any allegation of misconduct committed by any NOPD employee that is reported by any person, including any NOPD employee. Table 1 below shows one allegation of discrimination or bias was sustained between 2015 and 2020. The employee resigned while under investigation.

Table 1: Allegations of Bias by Disposition and Year

| Disposition | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 |
|---------------------------------|------|------|------|------|------|------|
| Sustained | 0 | 0 | 0 | 0 | 0 | 1 |
| Pending (under investigation) | 0 | 0 | 0 | 0 | 0 | 0 |
| Exonerated | 5 | 8 | 0 | 1 | 1 | 0 |
| Not sustained | 4 | 5 | 2 | 4 | 3 | 3 |
| No formal investigation merited | 0 | 0 | 1 | 0 | 0 | 0 |
| Unfounded | 23 | 16 | 25 | 21 | 12 | 8 |
| DI-2 (Counseling) | 0 | 0 | 1 | 0 | 0 | 0 |
| Cancelled | 1 | 0 | 0 | 0 | 1 | 2 |
| Total | 33 | 29 | 29 | 26 | 17 | 14 |

^{*}For definitions of allegation dispositions, see Chapter 26.2: Adjudication of Misconduct, available at nola.gov/nopd/policies.

The number of discrimination and bias-based allegations over the past five years has been relatively consistent with 2020 showing a decrease (12 down from 17 in 2019). Over the same time period, NOPD has made a concerted effort toward transparency and public awareness of the processes to file complaints of NOPD misconduct, as well as how to submit commendations for outstanding examples of police work. Placards, brochures, and forms detailing the complaint and commendation process have been made available to each District Station, NOPD Headquarters, City Hall, the office of the Independent Police Monitor, and New Orleans' public libraries. This information has been transcribed in English, Spanish, and Vietnamese to provide all New Orleans residents and visitors a way to contact the NOPD regarding positive and/or negative experiences.

It is also worth noting that the majority of allegations of discrimination and bias-based policing receive a final disposition of "Unfounded." According to NOPD policy, the Unfounded disposition is used in cases in which "the investigation determines, by a preponderance of the evidence, that the alleged misconduct did not occur or did not involve the subject employee." The disposition "Not sustained" means the investigator or hearing officer was unable to determine, by a preponderance of the evidence, whether alleged misconduct occurred.

PIB investigates allegations of criminal misconduct against NOPD officers and civilian employees, and PIB shares the investigation of violations of administrative regulations with first-line supervisors. In order to hold first-line supervisors accountable and ensure their involvement in complaints against their subordinates, many administrative complaints are forwarded to division commanders through their bureau chiefs for investigation. These investigations are reviewed through that bureau's chain of command, then ultimately by PIB and the Superintendent of Police. To learn more about NOPD's misconduct complaint process, or the nature of NOPD complaints in previous years, you can find the complaint data and annual reports at nola.gov/nopd/nopd-consent-decree.

Psychological Evaluations of Police Officer Candidates

NOPD has a process for psychologically evaluating all candidates for commissioned positions. The psychological evaluation is one of the final evaluations and is administered to candidates who successfully pass all assessments, the background investigation, and are approved by the Recruitment and Applicant Investigation Administrator. The evaluation is administered by contracted third parties and follows national standards for police officer psychological screening.

The contracted psychologist reviews each applicant's background investigation packet, which includes, but is not limited to, investigation data about the applicant's legal, employment, military, traffic, and geographic history. Also included in the background investigation packet are the results from the computer voice stress analysis (CVSA) testing. The psychologist also reviews any other documents provided by the New Orleans Police Department (e.g., documents from the public integrity bureau), Civil Service (e.g., previous psychological reports) or the background investigation unit. Each applicant is administered computerized psychological testing and after testing, has a face-to-face interview with the psychologist. The psychologist may also conduct interviews with background investigators and/or prior NOPD supervisors, if applicable, in order to glean more information about a candidate, or to corroborate candidates' statements. Information is never disclosed to collateral interviewees. The psychologist may also request records from previous mental health professionals, including military mental health records.

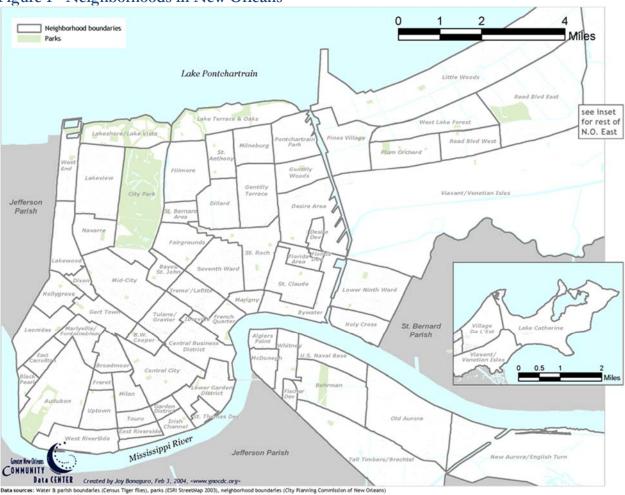

The psychologist's screening methods assess social biases, among many traits that may predict the applicant's ability to perform law enforcement duties in an acceptable manner.

In 2020, 20 applicants failed the psychological evaluation and were therefore not hired.

Relevant Geographic Area

All data presented in this report and used for analysis are confined to Orleans Parish. Figure 2 shows a neighborhood reference map of New Orleans.¹

¹ New Orleans and Orleans Parish refer to the same geographic area.

Field Interview Card Analysis

In 2020, NOPD completed 14,364 Field Interview Cards (FIC) documenting stops, searches, arrests, the use of naloxone kits, and Law Enforcement Assisted Diversions (L.E.A.D), a 64% decrease from the 40,342 FICs recorded in 2019. The COVID-19 pandemic likely explains the decrease from 2019 to 2020. With lock-down enforcement, fewer drivers were on the road, including fewer tourists, and inspection sticker and registration violations were not enforced. The map shown in Figure 2 depicts how these FICs were distributed throughout the city. The Central Business District had the highest number of FICs, with 1,963, which is down from 4,418 the previous year. Central City came in second, with 1,642 FICs, also lower than its 2,979 total in 2019. The French Quarter had the third highest number of FICs in the city, with 1,084, down from 3,427 in 2019. The French Quarter and the Central Business District have a high concentration of non-residents, including tourists and commuters. Figure 2 shows the distribution of FICs completed in 2020 by neighborhood.

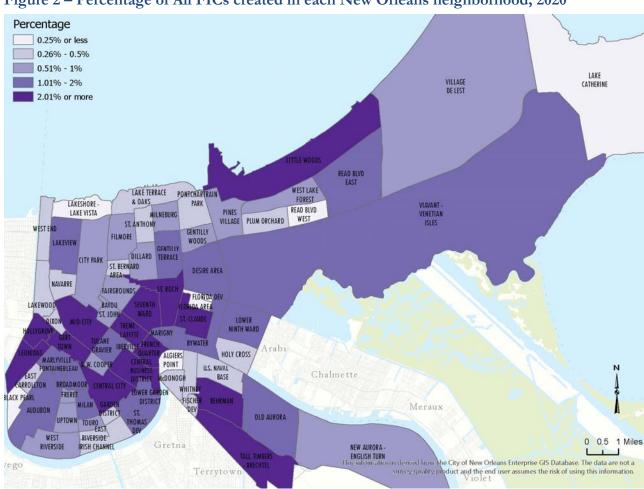

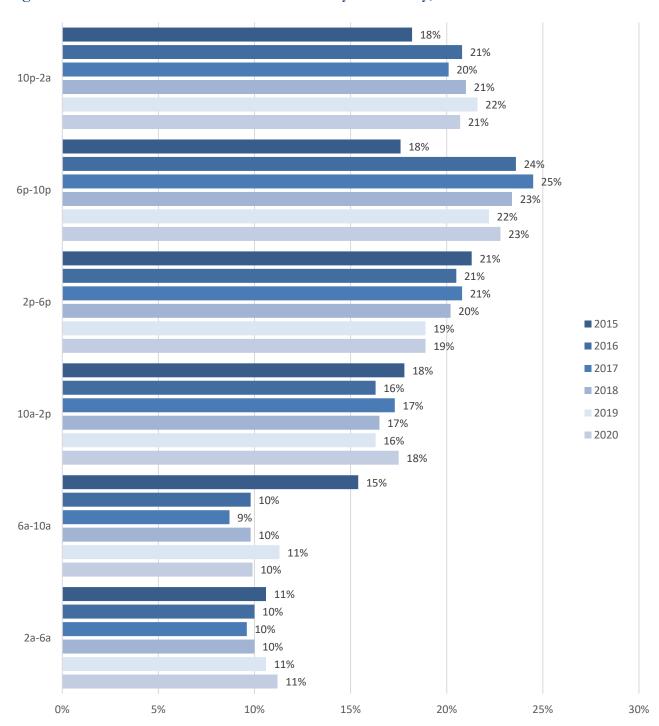

Figure 2 - Percentage of All FICs created in each New Orleans neighborhood, 2020

Time of day of FICs

In 2020, the largest portion of FICs were completed in the evening (6-10pm, 23%) and overnight (10pm-2am, 21%), with the afternoon (2-6pm, 19%) close behind. Officers completed the smallest portion of FICs in the morning (6-10am, 11%) and early morning (2-6am, 10%) hours.

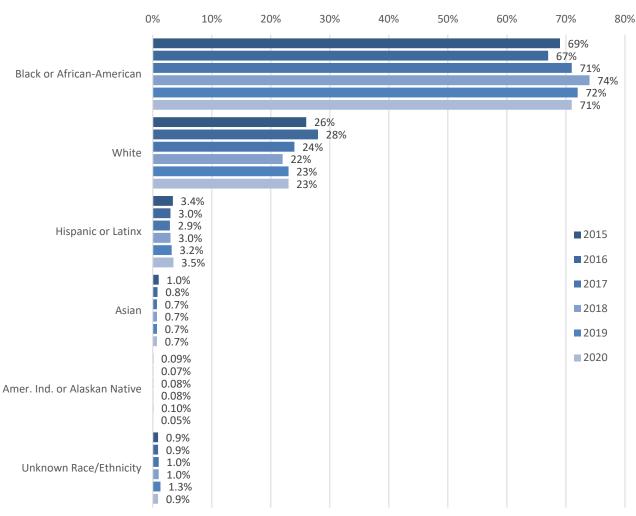

Figure 3 - Field interview cards in New Orleans by time of day, 2015-2020

Race/Ethnicity of FIC Subjects

Figure 4 (see next page) gives the distribution of stops across races/ethnicities for 2015-2020. The distribution of stops across races/ethnicities in 2020 closely resembled the statistics of previous years. Black or African-American individuals represented 71% of all subjects documented on FICs, about the same as 2019 (72%). White (non-Hispanic) individuals represented 23% of all subjects documented on FICs, which was the same in 2019. FICs documenting Hispanic or Latinx, Asian, and American Indian and Alaskan native individuals showed no change, remaining at about 3%, 1%, and <1%, respectively in 2015 through 2020. Although the portion of stops of black or African-American individuals appears high, experts believe measures of resident population (i.e. census data) should not be used as a sole method of benchmarking the population at risk of being stopped. This is partly due to concerns that the census undercounts minorities, pedestrian and vehicular populations include a greater percentage of minorities than indicated by the census, and a large portion of drivers are not residents.²

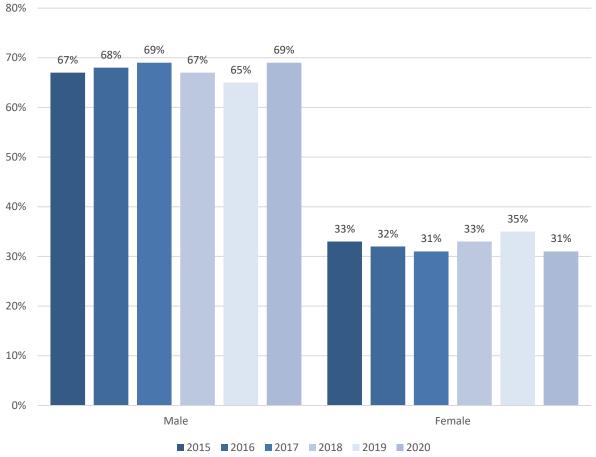

² Analysis Group. 2005. Proposed Pedestrian and Motor Vehicle Stop Data Analyses Methodology Report. Los Angeles.

11

Sex of FIC Subjects

In 2020, males represented 69% of all subjects documented on FICs, a slight increase from 65% in 2019. Females represented 31% of all subjects documented on FICs, a slight decrease from 35% in 2019.

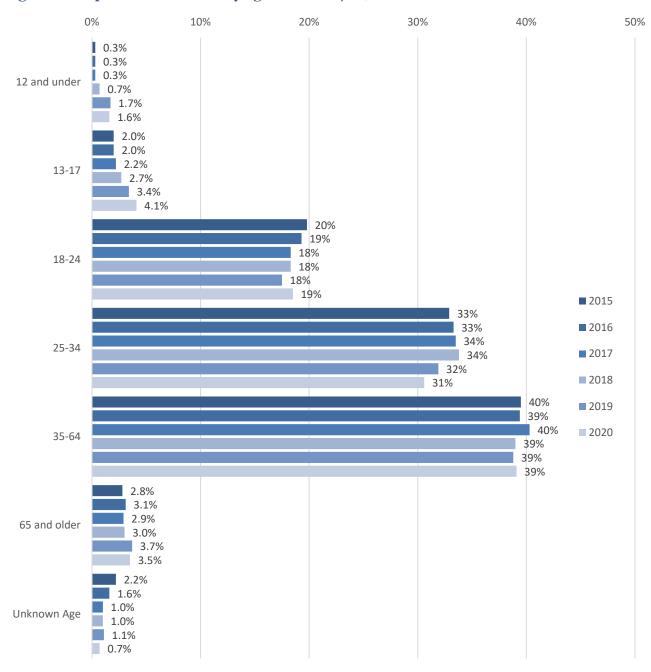

Figure 5 - Stops in New Orleans by sex of the subject, 2015-2020

Age of FIC Subjects

The percentage of stops of young adult subjects (ages 18 to 24) was about the same from 2015 (20%) through 2020 (19%). In 2020, the largest portion of stopped subjects, 39%, were between the ages of 35 and 64. Subjects between the ages of 25 and 34 represented 31% of all stops in 2020. In 2018, NOPD began documenting the demographic information of passengers, as required by the Consent Decree, which affected the percentage of subjects age 17 and under.

FICs for all combinations of Race/Ethnicity, Sex, and Age

In 2020, 20% of stops by NOPD officers were of black or African-American, males, ages 35-64.

Table 1: Stops for each Race, Sex, and Age Category, 2020

| Subject Race | Subject Sex | Subject Age Category | # | % |
|--------------|-------------|----------------------|-------|-------|
| Black | Male | ≤12 | 156 | 0.9% |
| Black | Male | 13-17 | 550 | 3.1% |
| Black | Male | 18-24 | 1,624 | 9.1% |
| Black | Male | 25-34 | 2,483 | 13.9% |
| Black | Male | 35-64 | 3,604 | 20.2% |

| Unknown | Female | 35-64 | 13 | 0.1% |
| Unknown | Female | 65+ | - | 0.0% |

FICs by Subject Type

In 2020, the largest portion of all stops (48%) involved vehicle drivers (down from 59% in 2019). Pedestrians represented 40% of all FICs (up from 25% in 2019), and vehicle passengers represented the remaining 12% (down from 15% in 2019). The COVID-19 pandemic likely explains the change in subject types from 2019 to 2020. With lock-down enforcement fewer drivers were on the road, including fewer tourists, brake tag and registration violations were not enforced, and pedestrian gatherings were disbanded. In 2018, NOPD began documenting the demographic information of passengers, as required by the Consent Decree, which affected the percentage of passengers recorded on FICs.

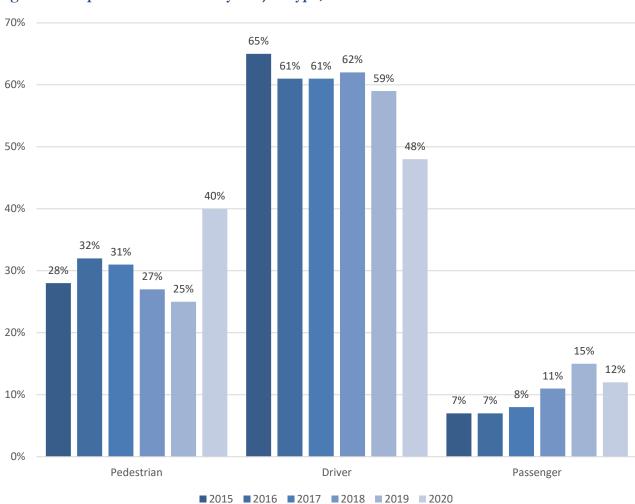

Figure 7 - Stops in New Orleans by subject type, 2015-2020

FICs by Race/Ethnicity of the Officer

For the purposes of this analysis, only officers listed as the primary officer on the FIC were considered. The percentage of FICs completed by black or African-American officers was 34% in 2020, about the same as in 2019. The percentage FICs completed by White officers was 53% in 2020, also about the same as in 2019. The demographic makeup of patrol officers, who produce the vast majority of FICs, can change over time as officers transition into and out of patrol assignments; this may contribute to the changes in the demographic distribution of officers completing FICs. The percentage of FICs completed by Hispanic or Latinx officers quadrupled from 2015 to 2018, increasing from 2% to 8%, and remained at 8% through 2020. From 2015 to 2018 the percentage of Hispanic or Latinx officers at NOPD grew from 2% to 4%, and then to 5% by 2020.

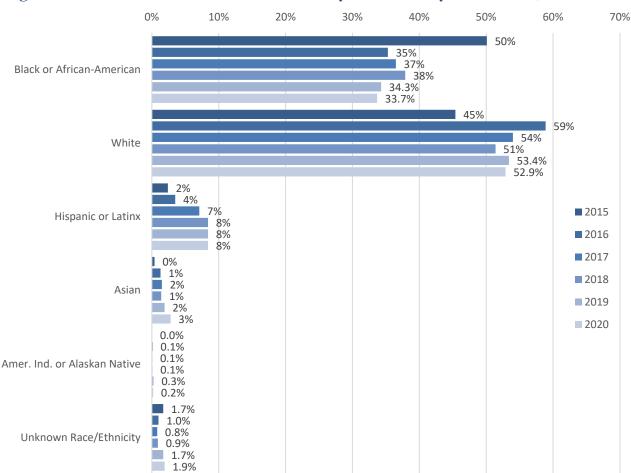

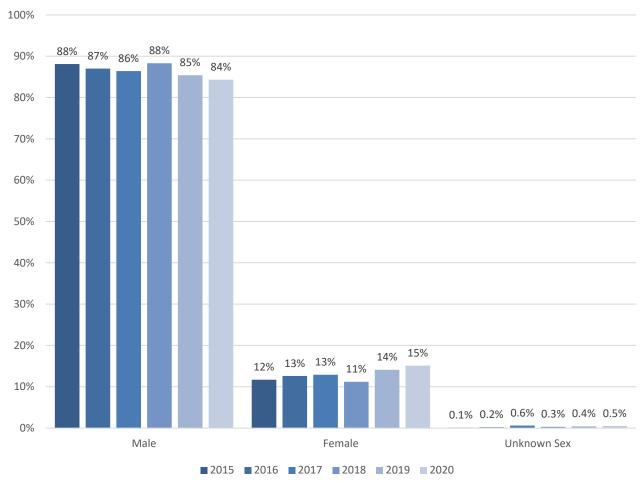

Figure 8 - Field interview cards in New Orleans by race/ethnicity of the officer, 2015-2020

^{*}Data includes officers listed as primary officers on Field Interview Cards. Secondary officers are not included. FICs with data entry errors and those created by officers that have not specified their race/ethnicity are given as Unknown Race/Ethnicity.

Field interview cards by sex of the officer

Male officers accounted for 84% of all FICs in 2020, while female officers accounted for 15 percent. In 2020, 77% of NOPD officers were male and 23% were female.

Figure 9 - Field interview cards in New Orleans by sex of the officer, 2015-2020

^{*}Data includes officers listed as primary officers on Field Interview Cards. Secondary officers are not included. FICs with mistyped employee IDs are given as Unknown Sex.

Field interview cards by age of the officer

From 2015-2020, the largest portion of stops were conducted by officers between the ages of 25 and 34. NOPD's focused recruitment efforts have brought many younger officers into the Department and undoubtedly contributed to this increase. While officers between the age of 25 and 34 make up 24% of the Department's officers, they are also most likely to be patrol officers, putting them in direct contact with residents and guests of New Orleans and, thus, more likely to complete FICs. While officers in the 35-44 year old range make up a larger percentage (32%) of the department than officers in the 25-34 range, they are more likely to have moved to specialized, non-patrol units or into supervisory roles, making it less likely that they would initiate FICs.

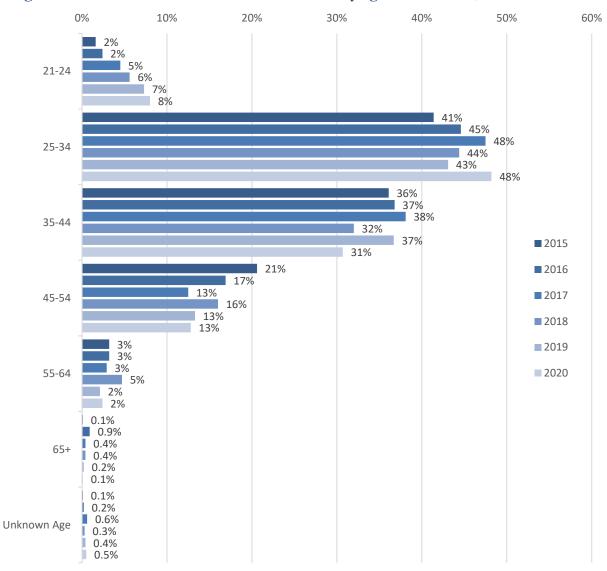

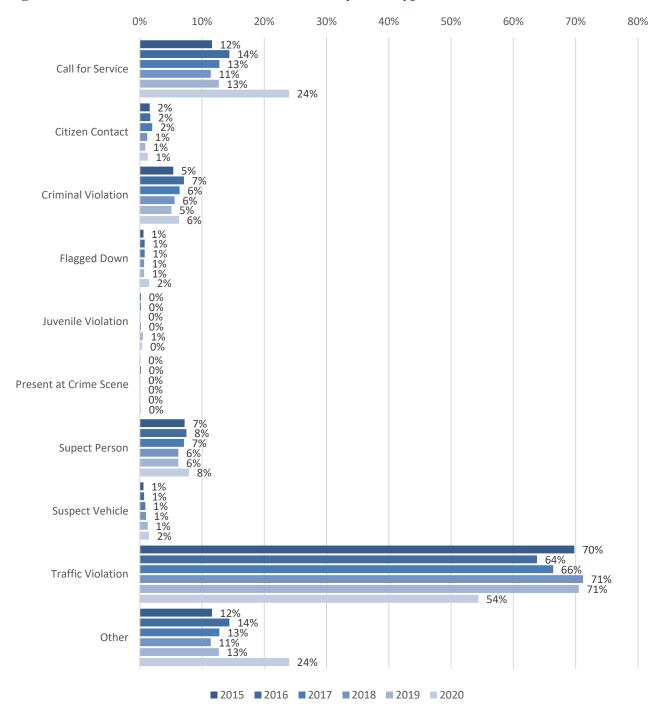

Figure 10 - Field interview cards in New Orleans by age of the officer, 2015-2020

^{*}Data includes officers listed as primary officers on Field Interview Cards. Secondary officers are not included. FICs with mistyped employee IDs are given as Unknown Age.

Field interview cards by event type

FICs were most often completed during traffic violations, which accounted for 54% of all FICs in 2020, down from 71% in 2019. The next most frequent event types was "call for service" and "other" at 24%, followed by "suspect person" at 8% in 2020.

Figure 11 - Field interview cards in New Orleans by event type, 2015-2020

Stops by event type and race/ethnicity of subject

In 2020, the distribution of event types, or the initial reason for the interaction, was similar for black or African-American and white subjects. 52% of stops of black or African-American subjects began when the officer observed a traffic violation and 53% of stops of white subjects began the same way.

Table 2: Event Type and Race of Subject, 2020

| | # | TV | CFS | CC | CV | FD | JV | PCS | SP | SV | O |
|----------------------------------|---------------|-----|------------|----|-----|----|----|-----|----|----|----|
| Black or African- American | 12,764 | 52% | 24% | 1% | 7% | 1% | 1% | 0% | 9% | 2% | 3% |
| White | 4, 190 | 53% | 25% | 1% | 7% | 2% | 0% | 0% | 7% | 1% | 3% |
| Hispanic or Latinx | 632 | 60% | 21% | 2% | 5% | 1% | 0% | 1% | 4% | 2% | 2% |
| Asian | 118 | 69% | 16% | 3% | 3% | 2% | 0% | 0% | 3% | 3% | 1% |

Stops by event type and age of subject

In 2020, the distribution of event types for subjects ages 18-24, 25-34, and 35-64 were quite similar. Chapter 41.12 – Field Interview Cards requires NOPD officers to document the apparent demographics of all passengers in vehicles that have been stopped, which affected the portion of subjects aged less than or equal to 12, 65 or greater, and those of unknown age.

Table 4: Event type and Age of Subject, 2020

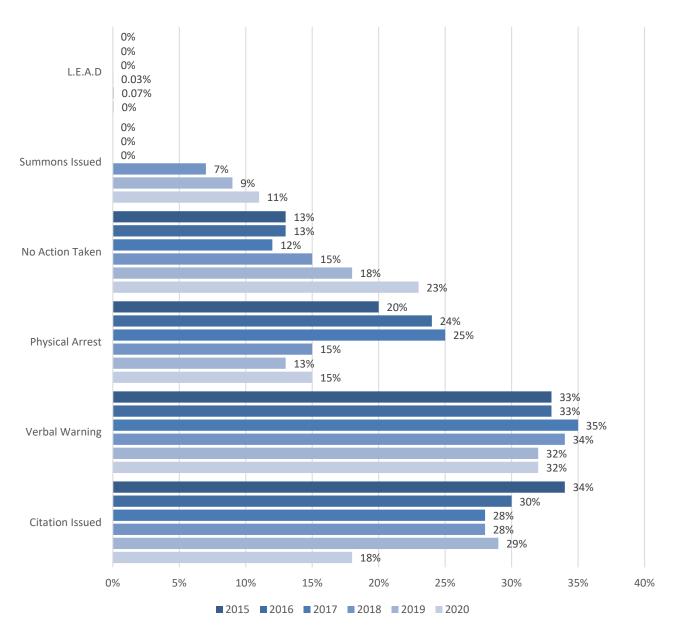

| | # | TV | CFS | CC | CV | FD | JV | PCS | SP | SV | О |
|----------------|-------|------|-----|----|----|----|-----|-----|-----|----|----|
| ≤12 Yrs | 281 | 79% | 12% | 0% | 1% | 0% | 2% | 0% | 3% | 1% | 1% |
| 13-17 | 731 | 17% | 36% | 4% | 7% | 1% | 12% | 0% | 17% | 2% | 4% |

Stops by stop result

In 2020, the most common stop result documented on FICs was "verbal warning" (32% of all stop results). The percentage of stop results that were "citation" decreased from 29% in 2019 to 18% in 2020. The percentage of stop results that were "no action taken" increased from 18% in 2019 to 23% in 2020. In January 2018, "Summons Issued" became a stop result option on the FIC. A summons is a citation in lieu of an arrest. Prior to "Summons Issued" being an option on the FIC, officers documented summonses as physical arrests on FICs.

^{*}Law Enforcement Assisted Diversion (LEAD) and Summons Issued became options in the Stop Result section of the FIC in January 2018.

Stops by stop results and neighborhood

The three neighborhoods with the highest number of stops in 2020 were the same three as in 2019 and were Central Business District (1,963), followed by Central City (1,642), and the French Quarter (1,084). The two neighborhoods that accounted for the fourth and fifth highest numbers of stops in 2020 were Treme-Lafitte (774) and Mid-City (570). In 2019, the neighborhoods with the fourth and fifth highest number of stops were Mid-City and St. Roch, respectively. The five neighborhoods also had some of the highest rates of violent and property crime in 2020. The French Quarter and the Central Business District have a high concentration of non-residents, including tourists and commuters. As mentioned above, experts believe measures of resident population (i.e. census data) should not be used as a sole method of benchmarking the population at risk of being stopped.³ See the appendix for demographic data for each New Orleans neighborhood.

Stop results varied considerably across neighborhoods. Below, the top three neighborhoods are ranked for each of the six stop result categories by (a) the total number of stops in each category, and (b) the percentage of total stops within each neighborhood in each category.

Stops Ending with No Action

With respect to the total number of stops that ended in no action, the following neighborhoods ranked in the top three: the Central Business District (384), the French Quarter (384), followed by Central City (244) and Treme-Lafitte (244). The top three neighborhoods the previous year, were the Central Business District, the French Quarter, and Central City.

With respect to the percentage of total stops within each neighborhood that ended in no action, the following neighborhoods ranked in the top three: Navarre (40% of 64 stops), Black Pearl (40% of 28 stops), Lake Catherine (40% of 20 stops), West End (35% of 47 stops), Florida Area (35% of 43 stops), and the Lower Ninth Ward (32% of 183 stops).

Stops Ending with a Verbal Warning

With respect to the total number of stops that ended in a verbal warning, the following neighborhoods ranked in the top three: Central City (627), the Central Business District (557), and Treme-Lafitte (341). Treme-Lafitte was not in the top three in 2019.

With respect to the percentage of total stops within each neighborhood that ended in a verbal warning, the top three were: Leonidas (53% of 429 stops), Marlyville-Fontainbleau (50% of 242 stops), and East Carrollton (49% of 49 stops).

Stops Ending with a Citation

With respect to the total number of stops that ended in a citation, the following neighborhoods

³ Analysis Group. 2005. Proposed Pedestrian and Motor Vehicle Stop Data Analyses Methodology Report. Los Angeles.

ranked in the top three: the Central Business District (466), Central City (294) and Behrman (151). The French Quarter was in the top three in 2019.

With respect to the percentage of total stops within each neighborhood that ended in a citation, the top three neighborhoods were as follows: Lakewood (69% of 59 stops), St. Thomas Development (54% of 183 stops), and Filmore (36% of 152 stops).

Stops Ending with a Summons

With respect to the total number of stops that ended in a summons, the following neighborhoods ranked in the top three: the Central Business District (273), the French Quarter (250), and Central City (168). The same neighborhoods were the top three in 2019.

With respect to the percentage of total stops within each neighborhood that ended in a summons, the top three neighborhoods are as follows: City Park (37% of 100 stops), Lake Terrace & Oaks (36%% of 70 stops), Dillard (23% of 148 stops), and the French Quarter (23% of 1,084 stops).

Stops Ending with a Law Enforcement Assisted Diversion (LEAD)

With respect to the total number of stops that ended in a LEAD, the following neighborhoods ranked in the top three: the Central Business District (4), the French Quarter (2), the Marigny (2), and Iberville (1).

With respect to the percentage of total stops within each neighborhood that ended in a LEAD, the top three neighborhoods are as follows: Iberville (1.04% of 94 stops), the Marigny (1.01% of 195 stops), and Bayou St. John (0.98% of 99 stops).

Stops Ending with an Arrest

With respect to the total number of stops that ended in an arrest, the following neighborhoods ranked in the top three: the Central Business District (317), Central City (256), and the French Quarter (229). The same three neighborhoods were the top three in 2019.

With respect to the percentage of total stops within each neighborhood that ended in an arrest, the rankings for the top three neighborhoods were as follows: the Florida Development (100% of 1 stop), St. Anthony (34% of 79 stops), and Little Woods (34% of 374 stops).

Stops by stop results and race/ethnicity of the subject

The distribution of stop results within races/ethnicities varied in 2020. 17% of stops of black or African-American individuals ended in arrest in 2019, while 12% of stops of white individuals ended in arrest. 30% of stops of black or African-American individuals ended in a verbal warning in 2020, and 37% of stops of white individuals ended in a verbal warning.

Table 5: Stops in New Orleans by stop result and race/ethnicity of the subject, 2020

| | # | Citation Issued | Verbal Warning | Physical Arrest | No Action Taken | Summons Issued | L.E.A.D |
|----------------------------------|--------|--------------------|-------------------|--------------------|--------------------|-------------------|---------|
| Black or African- American | 13,124 | 18% | 30% | 17% | 24% | 11% | 0.0% |
| White | 4,232 | 17% | 37% | 12% | 21% | 12% | 0.2% |
| Hispanic or Latinx | 642 | 24% | 33% | 14% | 22% | 8% | 0.0% |
| Asian | 121 | 28% | 37% | 10% | 16% | 9% | 0.0% |
| Amer. Ind. or Alaskan Native | 9 | 44% | 22% | 22% | 11% | 0% | 0.0% |
| Unknown Race/Ethnicity | 171 | 37% | 32% | 6% | 19% | 7% | 0.0% |

Stops by stop result and sex of the subject

The distributions of stop results within sexes were similar in 2020. The biggest difference was 17% of stops of male subjects resulted in arrest compared to 11% of stops of female subjects.

Table 6: Stops in New Orleans by stop result and sex of the subject, 2020

| | | Citation | Verbal | Physical | No Action | Summons | |
|--------|--------|----------|---------|----------|-----------|---------|---------|
| | # | Issued | Warning | Arrest | Taken | Issued | L.E.A.D |
| FEMALE | 5,666 | 20% | 34% | 11% | 24% | 11% | 0.07% |
| MALE | 12,633 | 18% | 31% | 17% | 22% | 12% | 0.06% |

Stops by stop result and age of the subject

The distribution of stop results within age groups varied in 2020. Four percent of stops of subjects aged 13-17 ended in citations, compared to 22% of stops of subjects aged 65 and older. About 15% of stops of subjects aged 18-24, 25-34, and 35-64 resulted in arrest in 2020.

Table 7: Stop results in New Orleans by age of the subject, 2020

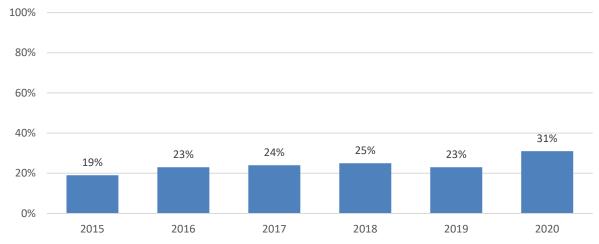

| Subject Age Category | # | Citation Issued | Verbal Warning | Physical Arrest | No Action Taken | Summons Issued | L.E.A.D |
|-------------------------|-------|--------------------|-------------------|--------------------|--------------------|-------------------|---------|
| ≤12 Yrs | 281 | 1% | 13% | 3% | 81% | 1% | 0.00% |
| 13-17 | 730 | 4% | 37% | 19% | 38% | 1% | 0.00% |
| 18-24 | 3,394 | 16% | 30% | 14% | 26% | 14% | 0.03% |
| 25-34 | 5,628 | 20% | 31% | 16% | 21% | 11% | 0.16% |
| 35-64 | 7,642 | 19% | 33% | 16% | 20% | 12% | 0.01% |
| 65+ | 620 | 22% | 44% | 7% | 19% | 8% | 0.16% |
| Unknown Age | 4 | 0% | 0% | 0% | 100% | 0% | 0.00% |

See Appendix 2 for stop results for every combination of race, sex, and age group.

Percent of field interview cards indicating a search occurred

In 2020, a person or vehicle search occurred during 31% (4,441 of 14,364 FICs) of instances in which an FIC was reported. This is an increase from 23% (9,182 of 40,342) in 2019.

Figure 13 – Percent of field interview cards that indicate a search occurred, 2015-2020

^{*}Person and vehicle searches included.

Total searches indicated on field interview cards

Although the percent of field interview cards (FIC) that indicated a search occurred increased in 2020, as indicated in Figure 13, the number of searches indicated on FICs continued a downward trend from 25,757 in 2017 to 6,401 in 2020.

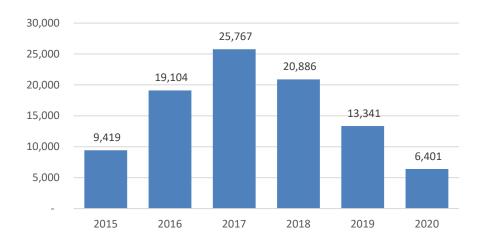

Figure 14 – Total searches indicated on field interview cards, 2015-2020

Total pat downs searches indicated on field interview cards

The number of pat downs indicated on field interview cards continued a downward trend from 12,147 in 2017 to 1,231 in 2020.

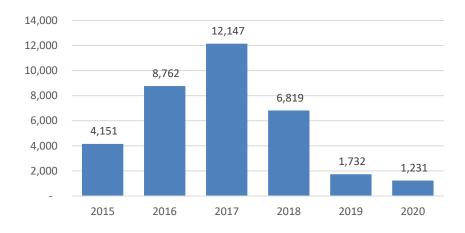

Figure 15 – Total pat downs indicated on field interview cards, 2015-2020

Types of searches in 2020

The most common searches documented on FICs in 2020 were searches incident to arrest (62%) and pat downs (22%). Searches conducted incident to arrest or as the result of a warrant are considered "non-discretionary," meaning NOPD policy dictates officers must perform searches. Similarly, searches documented as plain view also indicate the subject is most likely under arrest because the officer found contraband in plain view. Searches under exigent circumstances, by consent, and pat downs are considered "discretionary," meaning they are initiated by an officer.

FICs indicate approximately 74% of all searches in 2020 were non-discretionary. In 2018, NOPD began addressing the practice of officers incorrectly calling searches pat downs when they use an outer-garment search technique. A large portion of such searches are conducted after the subject is under arrest and are technically searches incident to arrest. This helps explain why the portion of searches that were pat downs generally decreased from 47% in 2017 to 22% in 2020, and the portion that were searches incident to arrest generally increased from 33% in 2017 to 62% in 2020. See appendix 3 for frequencies for all search types for all demographic segments.

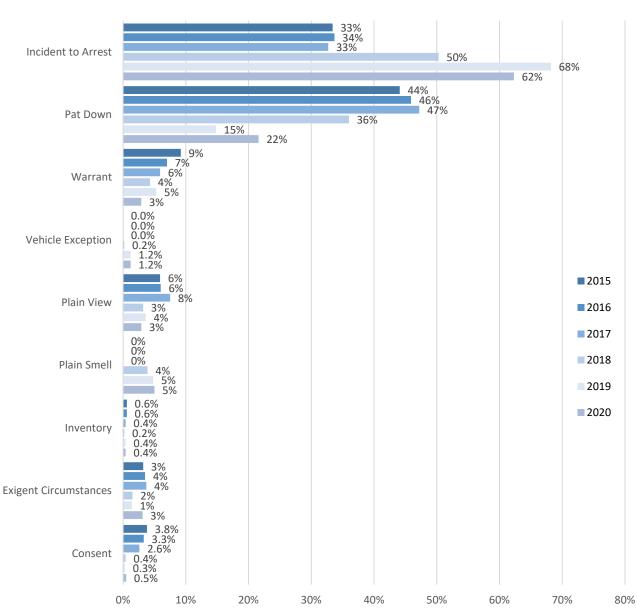

Figure 16 - Searches in New Orleans by reason for search, 2015-2020

^{*}Vehicle Exception and Plain Smell became options on the FIC in January 2018.

⁴ For the purposes of this analysis, search types Incident to Arrest, Inventory, Plain View, Warrant, and Plain Smell were considered non-discretionary; and search types Consent, Exigent Circumstances, Vehicle Exception, and Pat Down were considered discretionary.

Discretionary Search rates of subjects

Searches conducted incident to arrest or as the result of a warrant are considered "non-discretionary," meaning NOPD policy dictates officers must perform searches. Similarly, searches documented as plain view also indicate the subject is most likely under arrest because the officer found contraband in plain view. Searches under exigent circumstances, by consent, and pat downs are considered "discretionary," meaning they are initiated by an officer. See appendix 3 for frequencies of all search types and demographic segments. FICs indicate that 8% of stopped subjects were searched with a discretionary search in 2020, up from 4% in 2019 and down from 12% in 2018. Vehicle searches were not included in this analysis.

Table 8: Discretionary Search Rates, 2015-2020

| | No Discretionary Search | Discretionary Search |
|------|-------------------------|----------------------|
| 2015 | 20,934 (83%) | 4,303 (17%) |
| 2016 | 35,559 (80%) | 8,954 (20%) |
| 2017 | 43,032 (78%) | 12,468 (22%) |
| 2018 | 52,824 (88%) | 6,998 (12%) |
| 2019 | 47,921 (96%) | 2,023 (4%) |
| 2020 | 16,426 (92%) | 1,458 (8%) |

^{*}NOPD implemented a supervisor approval process for FICs in May 2015. Supervisors review FICs for accuracy and completeness. This report shows data from FICs that have been approved by a supervisor.

FICs indicate officers conducted discretionary searches on 9% of the black or African-American subjects they stopped, and 6% of the white subjects they stopped in 2020. As shown in Figure 5 above, 71% of all subjects documented on FICs were black or African-American in 2020. See appendix 3 for frequencies of all search types and demographic segments.

Table 9: Discretionary Search Rates by Race of Subject 2020

| | No Discretionary Search | Discretionary Search |
|------------------------------|----------------------------|-------------------------|
| Black or African-American | 11,612 (91%) | 1,152 (9%) |
| White | 3,942 (94%) | 248 (6%) |
| Hispanic or Latinx | 584 (92%) | 48 (8%) |
| Asian | 114 (97%) | 4 (3%) |
| Amer. Ind. or Alaskan Native | 9 (100%) | 0 (0%) |
| Unknown Race/Ethnicity | 165 (96%) | 6 (4%) |

FICs indicate that officers conducted discretionary searches on 11% of the male subjects they stopped, and 3% of the female subjects they stopped in 2020.

Table 10: Discretionary Search Rates by Sex of Subject, 2020

| | No Discretionary Search | Discretionary Search |
|--------|-------------------------|----------------------|
| Male | 11,011 (89%) | 1,305 (11%) |
| Female | 5,415 (97%) | 153 (3%) |

FICs indicate that officers conducted discretionary searches on 10% of the subjects they stopped between the ages of 18 and 24, and 19% of the subjects they stopped between the ages of 13 and 17 in 2020.

Table 11: Discretionary Search Rates by Age of Subject, 2020

| | No Discretionary Search | Discretionary Search |
|-------------|-------------------------|----------------------|
| ≤12 Yrs | 277 (99%) | 4 (1%) |
| 13-17 | 593 (81%) | 138 (19%) |
| 18-24 | 2,969 (90%) | 344 (10%) |
| 25-34 | 5,050 (93%) | 402 (7%) |
| 35-64 | 6,933 (93%) | 552 (7%) |
| 65+ | 600 (97%) | 18 (3%) |
| Unknown Age | 4 (100%) | 0 (0%) |

See appendix 3 for frequencies of all search types and demographic segments.

Evidence seized rates for Discretionary Searches

The FIC has a section for officers to indicate whether they seized evidence from individuals. It is important to note the FIC does not allow an officer to link evidence he/she seizes to an individual search. For the purposes of this analysis an FIC that indicates a discretionary search occurred and evidence was seized was considered to be a "hit" when it is possible the evidence was seized from a different non-discretionary search. FICs indicate evidence was seized from 17% of the subjects that received discretionary searches in 2020. The evidence seized rate has been relatively consistent since 2015.

Table 12: Discretionary Searches and Evidence Seized Rates, 2015-2020

| | Discretionary Search and No Evidence Seized | Discretionary Search and Evidence Seized |
|------|--|---|
| 2015 | 3,665 (85%) | 638 (15%) |
| 2016 | 7,467 (83%) | 1,487 (17%) |
| 2017 | 9,834 (79%) | 2,634 (21%) |
| 2018 | 5,583 (80%) | 1,415 (20%) |
| 2019 | 1,643 (81%) | 380 (19%) |
| 2020 | 1,215 (83%) | 243 (17%) |

^{*}NOPD implemented a supervisor approval process for FICs in May 2015. Supervisors review FICs for accuracy and completeness. This report shows data from FICs that have been approved by a supervisor.

FICs indicate that officers seized contraband from 17% of the black or African-American subjects they searched with discretionary searches, and from 12% of the white subjects they searched with discretionary searches in 2020.

Table 13: Discretionary Searches and Evidence Seized by Race of Subject, 2020

| | Discretionary Search and No Evidence Seized | Discretionary Search and Evidence Seized |
|------------------------------|---|---|
| Black or African-American | 952 (83%) | 200 (17%) |
| White | 219 (88%) | 29 (12%) |
| Hispanic or Latinx | 35 (73%) | 13 (27%) |
| Asian | 4 (100%) | 0 (0%) |
| Amer. Ind. or Alaskan Native | - | - |
| Unknown Race/Ethnicity | 5 (83%) | 1 (17%) |

FICs indicate that officers found contraband on 17% of the male subjects they searched with discretionary searches and 14% of the female subjects they searched with discretionary searches in 2020.

Table 14: Discretionary Searches and Evidence Seized by Sex of Subject, 2020

| | Discretionary Search and No Evidence Seized | Discretionary Search and Evidence Seized |
|--------|---|--|
| Male | 1,083 (83%) | 222 (17%) |
| Female | 132 (86%) | 21 (14%) |

FICs indicate that officers seized evidence from 23% of the subjects they searched with discretionary searches who were between the ages of 18 and 24 and from 19% of the subjects they searched with discretionary searches who were between the ages of 25 and 34 in 2020.

Table 15: Discretionary Searches and Evidence Seized by Age of Subject, 2020

| | Discretionary Search and No Evidence Seized | Discretionary Search and Evidence Seized |
|-------------|--|---|
| ≤12 Yrs | 4 (100%) | 0 (0%) |
| 13-17 | 119 (86%) | 19 (14%) |
| 18-24 | 264 (77%) | 80 (23%) |
| 25-34 | 326 (81%) | 76 (19%) |
| 35-64 | 485 (88%) | 67 (12%) |
| 65+ | 17 (94%) | 1 (6%) |
| Unknown Age | - | |

Pat Down Search and Evidence Seized Rates by Race/Ethnicity

When officers have a legal reason to stop someone and they suspect the person is armed and dangerous, officers may conduct a pat down of the subject. When an officer conducts a pat down he/she/they search a person's outer garments with his/her/their open hands. A pat down is one type of discretionary search. In 2020, officers conducted a pat down on 8% of the black or African-American subjects they stopped and on 4% of the white subjects they stopped.

Table 16: Pat Down Rates by Race/Ethnicity of Subject, 2020

| | No Pat Down | Pat Down |
|------------------------------|--------------|------------|
| Black or African-American | 11,762 (92%) | 1,002 (8%) |
| White | 4,011 (96%) | 179 (4%) |
| Hispanic or Latinx | 589 (93%) | 43 (7%) |
| Asian | 114 (97%) | 4 (3%) |
| Amer. Ind. or Alaskan Native | 9 (100%) | 0 (0%) |
| Unknown Race/Ethnicity | 168 (98%) | 3 (2%) |

During the course of a pat down, an officer may seize objects that appear to be a weapon or that he/she/they immediately recognize to be contraband. It is important to note the FIC does not allow an officer to link evidence he/she seizes to an individual search. For the purposes of this analysis an FIC that indicates a pat down occurred and evidence was seized was considered to be a "hit" when it is possible the evidence was seized from a different search. In 2020, officers seized evidence from 17% of the black of African-American subjects they patted down and from 11% of the white subjects they patted down.

Table 17: Pat Down Evidence Seized Rates by Race/Ethnicity of Subject, 2020

| | Pat Down and No Evidence Seized | Pat Down and Evidence Seized |
|------------------------------|------------------------------------|------------------------------|
| Black or African-American | 836 (83%) | 166 (17%) |
| White | 160 (89%) | 19 (11%) |
| Hispanic or Latinx | 31 (72%) | 12 (28%) |
| Asian | 4 (100%) | 0 (0%) |
| Amer. Ind. or Alaskan Native | - | - |
| Unknown Race/Ethnicity | 2 (67%) | 1 (33%) |

Police officers are allowed to stop someone they reasonably suspect of criminal activity. The stop may involve a frisk or pat-down search if the officers have reasonable suspicion that the person is armed and dangerous. One of the concerns with police stops and searches is that it is often thought that they are conducted disproportionately on black citizens. While it appears to be a straightforward assessment to compare those who are searched to the percentage of their make-up of the population, a proper analysis requires a much more complex calculation. Whether looking at vehicular or pedestrian stops, not all people have the same chance or likelihood of being stopped and/or searched by the police. In order to conduct a proper analysis, it is critical to identify a proper comparison group for those who are searched. For example, to determine if black citizens are stopped at a disproportionate rate than white citizens, one should not merely compare those who are stopped to the census or general population. The challenge is to measure the population who drives and has the same opportunity to be stopped and compare them to who is stopped. When investigating vehicular stops, there are a variety of methods researchers and policy analysts have determined the proper control group, or denominator.⁵

As noted in the Los Angeles stop data methodology report, no single study will provide a complete explanation of the observed racial differences in the stop data. A complete understanding of the racial differences in raw stop data will require more than one type of analysis and will require a control group in which every person has the same chance of being stopped. While there are multiple approaches to this analysis, one logical comparison to the race/ethnicity distribution of people NOPD has patted down is to that of people NOPD has arrested for violent crimes, as these are people who could be considered dangerous. The purpose of this comparison is to get a sense of whether the demographics of people officers suspect of being armed and dangerous (who officers have patted down) generally follows the demographics of the people NOPD officers have documented as being dangerous (arrested for violent crimes). While only the facts of individual incidents can determine whether an officer's actions were constitutional or within policy, and only the officer will know the motivation for the stop, our analysis relies solely on the raw data on the stop. The analysis below includes all arrested individuals documented in NOPD police reports that are classified as documenting violent crimes according to the FBI Uniform Crime Reporting (UCR) standards. In 2020, 89.4% of the people NOPD arrested for violent crimes were black or African-

⁵ Analysis Group. 2005. Proposed Pedestrian and Motor Vehicle Stop Data Analyses Methodology Report. Los Angeles.

American and 7.1% were white, while 81.4% of the people NOPD patted down were black or African-American and 14.5% were white.

Table 18: Race/Ethnicity Distributions of Arrests for Violent Crimes and Pat Downs, 2020

| | UCR Violent Arrests | Pat Downs |
|---------------------------|---------------------|---------------|
| Black or African-American | 1,412 (89.4%) | 1,002 (81.4%) |
| White | 112 (7.1%) | 179 (14.5%) |
| Hispanic or Latinx | 41 (2.6%) | 43 (3.5%) |
| Asian | 1 (0.1%) | 4 (0.3%) |
| Unknown Race/Ethnicity | 12 (0.8%) | 0 (0%) |

^{*}This data reflects arrested subjects documented in NOPD police reports that are classified as documenting violent crimes according to the FBI's Uniform Crime Reporting (UCR) standards. In the FBI's UCR Program, violent crime is composed of four offenses: murder and non-negligent manslaughter, forcible rape, robbery, and aggravated assault. Violent crimes are defined in the UCR Program as those offenses which involve force or threat of force.

Similarly, it is logical to compare the race/ethnicity distribution of people NOPD has arrested and charged with weapons offenses to the distribution of people NOPD has patted down. For the purposes of this analysis, any charge description with the word "weapon" or "firearm" was considered a weapons offense. In 2020, such charge descriptions include:

| ACCESSORY - ILLEGAL USE OF WEAPON |
|---|
| AGGRAVATED ASSAULT WITH A FIREARM |
| ASSAULT ON PEACE OFFICER (FIREARM) |
| CARRYING FIREARM ON SCHOOL PROPERTY |
| CERTAIN POSSESSION OF FIREARMS |
| DISCHARGING WEAPONS |
| FIREARM FREE ZONES |
| FIREARM WITH OBLITERATED NUMBER |
| ILLEGAL CARRYING OF A WEAPON WHILE IN POSSESSION OF NARCOTICS |
| ILLEGAL CARRYING OF WEAPON |
| ILLEGAL CARRYING OF WEAPONS |
| ILLEGAL POSSESSION OF STOLEN FIREARMS |

In 2020, black or African-American people made-up 92.5% of those NOPD arrested and charged with a charge description that included the words "weapon" or "firearm," and white people made-up 4.7%, while 81.4% of the people NOPD patted down were black or African American and 14.5% were white.

Table 19: Race/Ethnicity Distributions of Arrests with "Weapon" or "Firearm" in the Charge Description and Pat Downs, 2020

| | Arrests with "Weapon" or | |
|---------------------------|---------------------------------|---------------|
| - | "Firearm" in Charge Description | Pat Downs |
| Black or African-American | 1,349 (92.5%) | 1,002 (81.4%) |
| White | 68 (4.7%) | 179 (14.5%) |
| Hispanic or Latinx | 29 (2%) | 43 (3.5%) |
| Asian | 7 (0.5%) | 4 (0.3%) |
| Unknown Race/Ethnicity | 6 (0.4%) | 0 (0%) |

Searches by search type and neighborhood

The three neighborhoods with the most searches in 2020 were the Central Business District (639), the French Quarter (449), and Central City (444). The same top three as in 2019. These are also the neighborhoods where the most evidence was seized (see the section Evidence seized by type and neighborhood for more details).

Search results varied considerably across neighborhoods. Below, the top three neighborhoods are ranked for three search type categories and by (a) the total number of searches in each category, and (b) the percentage of total searches within each neighborhood in each category.

To simplify the analysis, search types Consent, Inventory, Vehicle Exception, Exigent Circumstances, Plain Smell, Plain View, and Warrant were categorized as Other Searches.

Incident to Arrest Searches

With respect to the total number of incident to arrest searches, the following neighborhoods were the top three: the Central Business District (449), the French Quarter (318), and Central City (314).

With respect to the percentage of total searches within each neighborhood categorized as incident to arrest, the following neighborhoods were the top three: Algiers Point (100% of 8 searches), Freret (96% of 25 searches), and the Lower Garden District (93% of 45 searches).

Pat Down Searches

With respect to the total number of pat down searches, the following neighborhoods were the top three: Central City (105), the Central Business District (98), and the French Quarter (69).

With respect to the percentage of total searches within each neighborhood that were categorized as pat downs, the top three neighborhoods were: East Carrollton (50% of 8 searches), Village De

L'Est (45% of 51 searches), Read Blvd East (45% of 76 searches), and West Lake Forest (44% of 90 searches).

Other Searches

With respect to the total number of other searches (searches categorized as Consent, Inventory, Vehicle Exception, Exigent Circumstances, Plain Smell, Plain View, and Warrant), the following neighborhoods ranked in the top three: Central Business District (92), the French Quarter (62), and Mid-City (48).

With respect to the percentage of total searches within each neighborhood that were categorized as other searches (searches categorized as Consent, Inventory, Vehicle Exception, Exigent Circumstances, Plain Smell, Plain View, and Warrant), the top three neighborhoods were: Lakeshore - Lake Vista (67% of 15 searches), Lake Terrace & Oaks (33% of 40 searches), and Marlyville - Fontainebleau (31% of 36 searches).

Searches by search type and race/ethnicity of the subject

In 2020, FICs indicate that incident to arrest searches accounted for 61% of searches of black or African-American individuals and 67% of searches of white individuals. 22% of searches of black or African-American individuals were pat-down searches, and 17% for white individuals. Comparisons to subjects with race/ethnicity American Indian or Alaskan Native, Asian and individuals of unknown race/ethnicity are unreliable as they received less than 1% of all searches in 2020.

Table 20: Searches by search type and race/ethnicity of subject, 2020

| | # | Incident to Arrest | Pat Down | Other |
|------------------------------|-------|--------------------|----------|-------|
| Black or African-American | 4,458 | 61% | 22% | 16% |
| White | 1,023 | 67% | 17% | 15% |
| Hispanic or Latinx | 158 | 63% | 27% | 9% |
| Asian | 25 | 60% | 16% | 24% |
| Amer. Ind. or Alaskan Native | 2 | 100% | 0% | 0% |
| Unknown Race/Ethnicity | 20 | 55% | 15% | 30% |

^{*}Other includes search types: Consent, Vehicle Exception, Exigent Circumstances, Inventory, Plain Smell, Plain View, and Warrant.

Searches by search type and sex of the subject

In 2020, FICs indicate the percentage of searches of female subjects that were incident to arrest was 73%, and 60% for male subjects. 11% of searches of female subjects were pat downs, while 24% of searches of male subjects were pat downs in 2020.

Table 21: Searches by search type and sex of subject, 2020

| | Total | Incident to Arrest | Pat Down | Other |
|--------|-------|--------------------|----------|-------|
| FEMALE | 940 | 73% | 11% | 16% |
| MALE | 4,746 | 60% | 24% | 16% |

^{*}Other includes search types: Consent, Vehicle Exception, Exigent Circumstances, Inventory, Plain Smell, Plain View, and Warrant.

Searches by search type and age of the subject

In 2020, FICs indicate that when officers searched subjects between the ages of 18 and 24, 54% of the searches were a search incident to arrest; and for subjects between the ages of 25 and 34, 63% of searches were a search incident to arrest. 25% of searches of subjects between the ages of 18 and 24 were pat-down searches, and 37% of searches of subjects between the ages of 13 and 17 were pat-down searches.

Table 22: Searches in New Orleans by search type and age of subject, 2020

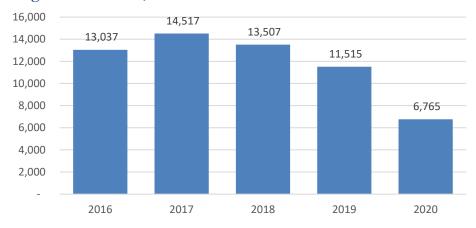

| | Total | Incident to Arrest | Pat Down | Other |
|---------|-------|--------------------|----------|-------|
| ≤12 Yrs | 13 | 54% | 31% | 15% |
| 13-17 | 326 | 50% | 37% | 13% |
| 18-24 | 1,216 | 54% | 25% | 21% |
| 25-34 | 1,805 | 63% | 19% | 18% |
| 35-64 | 2,249 | 68% | 20% | 13% |
| 65+ | 77 | 73% | 18% | 9% |

^{*}Other includes search types: Consent, Vehicle Exception, Exigent Circumstances, Inventory, Plain Smell, Plain View, and Warrant.

Total Arrests

In 2020, NOPD made about half as many arrests as in 2019, according to the Orleans Parish Sherriff's data. The stark decrease is most likely explained by the effects of the COVID-19 pandemic and the city's efforts to minimize the spread of the virus.

Figure 17 – Arrests, 2016-2020

Evidence seized by type

FICs indicate that drugs were the most common (60%) type of evidence seized in 2020. Although

the percentage of weapons seized increased from 17% in 2019 to 21% in 2020, the number of weapons seized decreased from 635 in 2019 to 395 in 2020.

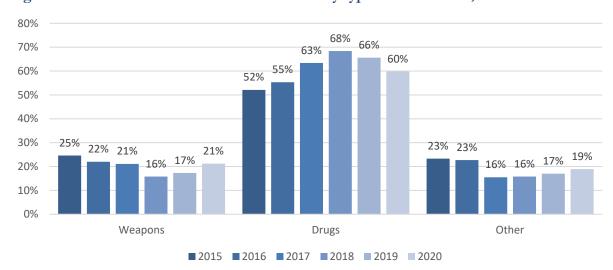

Figure 18 - Contraband found in New Orleans by type of contraband, 2015-2020

Figure 18 Data table – Contraband found in New Orleans by type of contraband, 2015-2020

| Year | Weapons | Drugs | Other |
|------|---------|-------|-------|
| 2015 | 229 | 485 | 217 |
| 2016 | 482 | 1,208 | 496 |
| 2017 | 784 | 2,356 | 576 |
| 2018 | 740 | 3,202 | 742 |
| 2019 | 635 | 2,408 | 625 |
| 2020 | 395 | 1,115 | 353 |

Evidence seized by type and neighborhood

The Central Business District had the highest number of evidence types seized during stops (195), followed by Central City (134), and the French Quarter (133). These neighborhoods represent approximately 26% of all evidence types seized throughout the City in 2020 (462 of 1,809).

Of the previously mentioned areas, weapons were 25% of the evidence types seized in the French Quarter, 24% in the Central Business District, and 22% in Central City. Drugs were 56% of evidence types seized in the Central Business District, and 55% in Central City and the French Quarter.

Evidence seized by type and race /ethnicity of the subject

In 2020, 60% of evidence seized from black or African-American individuals and from white

individuals was drugs. The percentage of evidence seized that was weapons was 23% from black or African-American individuals and 11% from white individuals. Comparisons to Hispanic, Asian, and American Indian individuals and those of unknown race/ethnicity are not reliable as they amount to less than 3% of all evidence seized in 2020.

Table 23: Evidence discovered by type and race/ethnicity of subject, 2020

| | Total | Weapons | Drugs | Other |
|---------------------------|-------|---------|-------|-------|
| Black or African-American | 1,554 | 23% | 60% | 17% |
| White | 263 | 11% | 60% | 29% |
| Hispanic or Latinx | 42 | 33% | 43% | 24% |
| Asian | 8 | 13% | 88% | 0% |
| Unknown Race/Ethnicity | 4 | 50% | 50% | 0% |

Evidence seized by type and sex of the subject

In 2020, FICs indicate that 59% of evidence seized from males was drugs, and 66% of evidence seized from females was drugs. The percentage of evidence seized that was weapons was 22% from males and 16% from females.

Table 24: Evidence found in New Orleans by type of evidence and sex of subject, 2020

| | Total | Weapons | Drugs | Other |
|--------|-------|---------|-------|-------|
| Female | 343 | 16% | 66% | 18% |
| Male | 1528 | 22% | 59% | 19% |

Evidence seized by type and age of the subject

In 2020, FICs indicate that 69% of evidence seized from subjects between the ages of 18 and 34 was drugs. The percentage of evidence seized that was weapons was 23% from subjects between the ages of 18 and 24 and 22% from subjects between the ages of 25 and 34. Although evidence seized from subjects between the ages of 13 and 17 amounted to 5% of all evidence seized, 20% of evidence seized from such subjects was weapons.

Table 25: Evidence seized by type and age of subject, 2020

| | Total | Weapons | Drugs | Other |
|-------|-------|---------|-------|-------|
| 13-17 | 90 | 30% | 34% | 36% |
| 18-24 | 560 | 23% | 69% | 8% |
| 25-34 | 661 | 22% | 61% | 17% |
| 35-64 | 550 | 17% | 54% | 29% |
| 65+ | 10 | 10% | 50% | 40% |

Steps taken to correct problems and build on successes

Training

The Academy In-Service curriculum for 2020 was built upon a Problem Based Learning design with several courses featuring Stop & Search requirements based upon the findings of the Professional Standards and Accountability Bureau's stops auditing. The course descriptions are as follows:

Procedural Justice Solutions

(CD Paragraphs 177,226)

2 Hours

This course will begin with a review of the problem-oriented policing methodology offered in 2019, reinforcing the process for solving community concerns and Department priorities. Officers will participate in a PBL activity that will require community participation in an action plan featuring the deployment of proactive patrol strategies. The teams will review the "Procedural Justice" audit scorecard and its application towards planned targeted enforcement solutions. The scorecard provides guidance for the proper method of interacting with suspects in vehicle and pedestrian stops. A focus on constitutional policing procedures that reinforce the core principles of procedural justice, bias-free policing, police legitimacy, and community policing will be addressed.

Suspicious Person and Vehicle Stop Considerations (CD Paragraph 162,177,226) 3 Hours

This course will introduce the "Audit Scoresheet" requirements for the "Stops Scorecard", "Pat Down Scorecard", and the "Consent to Search Scorecard". A PBL activity will require the officers to apply scorecard guidance in both a suspicious person detention and a vehicle stop situation. The officers will be required to summarize their investigative activities in a Field Interview Card (FIC) that follows the scorecard measured areas, including procedural justice, bias-free policing, and community impact aspects. The officers must also apply constitutional policing information provided in a legal aspect review of recent court decisions and related Department policy updates for stop, search, and arrest. Emphasis will be placed on the legality and limitations of searches based on exigency and warrantless exceptions.

Field Interview Card Review – (Suspicious Person Stops from Day Four) (CD 162) 1 Hour

This course will evaluate FIC submittals from the previous day for compliance with the intent of the "Stops", "Pat Downs" and "Search" audit scorecards. The primary objectives are to ensure that officers can adequately articulate the reasonable suspicion factors for the initial stop, the application of procedural justice in the conduct of that investigation, and the elements leading to a pat-down or search of a person or vehicle.

Vehicle Stop Tactics

(CD Paragraphs 162,177,109,226) 3 Hours

A series of interactive scenario exercises will be presented at the New Orleans East campus that require officers to employ constitutional policing guidance, procedural justice, and departmental policy in the detention of vehicles for both routine violations and high-risk felony stops. Instructors will provide tactical direction intended to develop a consistent Department recognized method in officer survival skillsets for vehicle stops. Officers will receive training in the SUL low ready armed position, maintaining the weapon barrel pointed downward in applicable situations. Objectives will include tactical recommendations for the safe approach, the decision to have the driver/occupants exit the vehicle, and the communications deployed by the officer(s). Considerations will also include the legal justification for a pat-down, search of the vehicle, and potential handcuffing when policy stipulations

are met. For the felony vehicle stop scenarios, officers and role players may utilize SIRT laser weapons to simulate use of force situations. Upon conclusion of one of the scenarios, an FIC card will be required.

Pedestrian Stop Tactics

(CD Paragraphs 162, 177,109,226) 3 Hours

A series of interactive scenario exercises will be presented at the New Orleans East campus that require officers to employ constitutional policing guidance, procedural justice, and departmental policy in the investigative detention of suspicious persons. Instructors will provide tactical direction intended to develop a consistent Department recognized method in officer survival skillsets for pedestrian stops. Objectives will include tactical recommendations for the safe approach, the control of the persons to be interviewed, and the communications deployed by the officer(s). Considerations will also include the legal justification for a pat-down, a search of the suspect, and potential handcuffing when policy stipulations are met. For the pedestrian stop scenarios, officers and role players may utilize SIRT laser weapons to simulate use of force situations. Upon conclusion of one of the scenarios, an FIC card will be required.

Unfortunately, the COVID19 classroom restrictions prevented these courses from being presented. The 2020 Annual Master Training Plan was amended, and the 40-hour week-long curriculum was continued in total to the year 2021. COVID19 restrictions extended into 2021 as well, and now this Problem Based Learning curriculum will start in 2022.

As for in-service training in Stop and Search that was completed in 2020, the Education and Training Division designed an E-Learning module titled "Safeguarding Fairness in Citizen Stops" which incorporated elements of Stops with Procedural Justice.

Monthly Training Quizzes

Every month the Policy and Planning Section of NOPD's Professional Standards and Accountability Bureau creates a 20 question, online, mandatory quiz designed to require the test taker to read and understand policy in order to reinforce policy. In March, July, and September of 2020 the online quiz required NOPD employees to read critical parts of Ch 41.13 – Bias Free Policing, NOPD Rule 3: Professional Conduct, Ch 41.3.10 – Body Worn Camera (which covers required activation), NOPD Rule 2: Moral Conduct, Ch. 1.2.4.1 – Stops/Terry Stops, and Ch 41.12 – Filed Interview Cards.

Internal Auditing and Corrective Action Plans

NOPD conducts stops, searches, and arrests auditing. The audit is designed to ensure that all stops, searches, and arrests are consistent with NOPD policy and constitutional law, are documented appropriately, that documentation is complete and accurate, and that stops, searches, and arrests are carried out with fairness and respect. Auditors review video, reports, and other documentation for every incident in the audit sample. The most recent audit covered May of 2020 and the audit report is available at https://nola.gov/nopd/nopd-consent-decree.

The audit results are shared with the auditees. Supervisors are required to address audit findings through additional training, non-disciplinary corrective action (redirection and counselling), and formal disciplinary action as appropriate to the deficiencies. The department created and implemented a Corrective Action Plan in response to the May 2020 Stops, Searches, and Arrests audit. Additionally,

NOPD's Public Integrity Bureau reviews non-disciplinary corrective action to determine whether formal discipline is required.

Notify PSS

NOPD's Professional Standards and Accountability Bureau (PSAB) uses the Notify PSS process to address policy violations and training needs its members may observe. PSAB members may make such observations through the course of their regular work assignments or while engaging in special project assignments, especially members conducting audits. 118 observations were reviewed and addressed by the Notify PSS process in 2020, about half were observations made during stops, searches, and arrests auditing.

SFLs

In 2020, NOPD supervisors documented 1,705 supervisor feedback log entries which document compliments, notes, redirections, and counseling of subordinates. 321 (19%) were categorized by the documenting supervisor as being related to: arrests, stops, searches, or bias-free policing.

Formal Disciplinary Investigations

In 2020, the department initiated three formal disciplinary investigations alleging six violations of stops, searches, and arrest policy. Five of the alleged violations were determined to be unfounded, which means the investigation determined, by a preponderance of the evidence, that the allegation did not occur or did not involve the subject employee. One investigation is ongoing.

Management Dashboard

NOPD made several management analytical tools that are relevant to stops, searches, and arrests available to members, including:

- The Pending FIC Dashboard, which shows supervisors Field Interview Cards (FIC) that have yet to be reviewed and highlights the ones that indicate a search occurred. And the dashboard shows supervisors all 911 Dispatch data that indicate an FIC is required and for which an FIC with a matching incident number does not exist.
- The Pending EPR Incident Reports Dashboard, which shows supervisors all police reports that
 have yet to be reviewed and 911 Dispatch data that indicate a police report is required and for
 which a police report with a matching incident number does not exist.
- The Audit Results Dashboard, which makes audit results readily available for review by supervisors and highlights audit criteria with sub-par compliance rates for each district/division.

Appendices

Appendix 1 – New Orleans' Neighborhood Demographics (source: The Data Center, Neighborhood Statistical Area Data Profiles, released Feb 24, 2021)

| Neighborhood | Populati | ŕ | Fema | le | Male | | |
