I. OVERVIEW

MUNICIPAL TRAINING ACADEMY MISSION STATEMENT

The mission of the New Orleans Police Department (NOPD) Municipal Training Academy is to provide recruit, in-service, and professional development training, grounded in constitutional and community policing, and procedural justice.

SUPPORT OF THE DEPARTMENT MISSION

The Municipal Training Academy program goals are strategically aligned to support the Department's mission in providing professional police services to the public to maintain order, protect life and property, engage the neighborhood and community, and integrate community and solution-oriented problem solving. The Academy's task is to develop well-trained, highly motivated, and courteous employees to serve our community and organization with pride and professionalism.

The Annual Master Training Plan (AMTP) supports the Department mission by identifying a comprehensive set of educational goals and objectives that fosters professional development and provides the skills training necessary for officers to perform their duties in an unbiased, safe, and proficient manner.

ACADEMY COMMITMENT

The N.O.P.D. Academy is committed to providing quality recruit, field, in-service, and professional development training programs which are centered in the best practices of constitutional and community policing. The Municipal Training Academy shall ensure that all recruits, officers, supervisors, and civilian personnel receive comprehensive training to understand and apply the law, adhere to policy and procedures, and effectively fulfill their duties and responsibilities. This training shall reflect the community expectations that officers' police diligently in a professional manner; have an understanding of and commitment to the constitutional rights of the individuals they encounter; and employ strategies to build community partnerships that sustain public trust, peace, and safety.

PARAMETERS OF THE ANNUAL MASTER TRAINING PLAN (CD Para. 245, 246,249)

CD Paragraph 245 specifies that *“the Training Division shall be the central coordination point for all training, including: Recruit Training Academy; Field training; and all In-Service training, including firearms and other use of force training; Roll Call training; Supervisory training; Tactical and Task Force training; and all Elective training.”* The Municipal Training Academy Commander is tasked with coordination and oversight of all Department training. The parameters of the programs to be addressed within the AMTP, however, are only in those topical areas prescribed by the Consent Decree as relevant for Recruit, Field Training Officer, and In-Service programs.

The Municipal Training Academy Commander’s primary obligation is in the consistent delivery of the programs specified in the AMTP. The learning needs and subject matter expertise utilized for other compartmentalized training is based upon unit specific needs and requirements that must be determined by those respective Commanders. Special purpose programs such as SWAT, Canine, Mounted, Motorcycle, Scooter, Bicycle, Central Evidence, Data Systems, etc., will not be described within the AMTP. The Academy does retain responsibility however for the records management tracking of all such specialized and elective training.

CD Paragraph 246 establishes the intent of the Annual Master Training Plan – *“NOPD’s Training Division Commander shall be responsible for overseeing all NOPD training, including Recruit Academy; Field Training; all In-Service Training; and for ensuring that training is delivered consistent with NOPD’s written training plan.”* **CD Paragraph 249** further refines the parameters of the training programs that are to be recognized within the Annual Master Training Plan – *“...develop a written training plan for NOPD’s Recruit Academy, Field, and In-Service Training, to ensure that recruits, officers, and civilian personnel are trained effectively and lawfully carry out their duties in accordance with the Constitution and laws of the United States.”*

The Annual Master Training Plan is produced from an integrated cycle of job task analysis, training needs assessment, instructional design, and evaluation processes. The Academy is responsible for the development of the AMTP as a management planning tool designed to establish the framework of each year’s training curriculum. The purpose of the training plan process is to annually assess the Department’s training needs and develop a comprehensive plan which strengthens the skills and effectiveness of the organization. This research and planning significantly improves leadership, communications, team building, and law enforcement competencies. The process is essential to the success of the Academy training program management.

II. METHODOLOGY

THE TRAINING NEEDS ASSESSMENT PROCESS

The Training Needs Assessment (TNA) is a process of gathering information to determine what training needs exist so that curricula can be developed to help the Department accomplish its objectives. The TNA shall be performed to identify specific needs or deficiencies, and to support the achievement of organizational goals by increasing the necessary skill sets of Department employees. Training Needs Assessments are the entire basis for training, identifying that the Academy is doing the right training, for the correct reasons, and creating responsive learning.

The TNA is the first step in the design phase of training and development, establishing the entire basis for the Annual Master Training Plan. For each training need, one or more learning objectives will flow from the needs assessment to then transition as a performance measure in the design of lesson plans. Clearly defined instructional objectives ensure that the training will prepare an officer to perform the targeted tasks. A significant focus of the TNA is to identify courses that will positively impact the entire Department when officers and supervisors return to the Academy for annual In-Service training.

As a systematic collection, review and use of information, this assessment will:

- Determine what training is important and needed
- Determine the type and length of training
- Identify gaps between actual performance and the desired performance
- Identify the target audience
- Determine what specific training will improve performance
- Determine if training will make a difference
- Differentiate between training needs and organizational problems
- Link improved job performance with organizational goals, the Louisiana Peace Officer Standards and Training (P.O.S.T.) objectives and Consent Decree compliance
- Identify opportunities for improvement in the methods, quality, and delivery of training

CONSENT DECREE REQUIREMENTS FOR A TRAINING NEEDS ASSESSMENT

C.D. Section XII. Paragraph 249 specifies that the Department will develop an “Annual Master Training Plan” (AMTP) for the recruit academy, field, and in-service training programs. To

comport with best practices, the Academy shall *“identify training priorities and broad training goals”*. The Academy shall *“delineate an industry-recognized, systematic approach to training development that includes the following concepts: analysis, design, development, implementation, and evaluation. This approach should enable NOPD to identify and validate job tasks in sufficient detail to derive learning objectives, which, in turn, should drive the selection of instructional strategies and assessments”*.

This Training Needs Assessment satisfies the requirements of **CD Paragraph 249** as it utilizes an industry recognized methodology and documented systematic approach towards vetting the core components of the Annual Master Training Plan. The process addresses the stated *“analysis and design”* by pinpointing the course goals and the learning objectives that will be presented in the 2026 curriculum. The Annual Master Training Plan will then utilize this TNA to further the *“development and implementation”* of instructional tasks.

CD Paragraphs 252-254 outline the necessity for lesson plans to be consistent with the Annual Master Training Plan. Training needs identified in the Training Needs Assessment translate and are one in the same as the *“learning objectives”* in a lesson plan. Lesson plans will describe the teaching strategies employed to convey these targeted learning objectives. The Training Needs Assessment process serves as the systematic approach to identify key job tasks and training areas of interest. The concepts and training topics that were revealed by the TNA research and interviews transition into formal learning objectives. The identification of meaningful learning objectives serves as the foundation for the instructional development process. The needs assessment flushes out learning objectives that outline the focus of the anticipated training and contributes to the creation of the instructional goal/course overview statement.

TRAINING ADVISORY COMMITTEE

CD Paragraph 248 prescribes that the NOPD will establish a Training Advisory Committee (TAC) to support the Academy’s academic and training practices. The TAC is a resource intended to provide recommendations in police instructional methods and offer guidance in the most effective learning strategies. The primary responsibilities of the TAC are identified in **CD Paragraphs 251 and 256**. The TAC shall: 1) *“annually review and update NOPD’s Training Plan. To inform this update, the Training Advisory Committee shall conduct a needs assessment.”* 2) *“Review all curricula, lesson plans, instructor’s qualifications and testing materials.”*

As this is a volunteer board with limited opportunities to perform the many hours of research required for a *“needs assessment”*, on 9/29/2017 the court amended **CD Paragraph 251**,

reassigning this responsibility to the NOPD. The Training Needs Assessment is prepared for TAC review by the “Curriculum Director” (Academic Director) of the NOPD Municipal Training Academy.

The TAC supports the mission of the Municipal Training Academy in developing and evaluating the Department’s training needs, serving as a focal point for the implementation of educational best practices. The TAC is composed of representatives from the NOPD, and volunteers from local, state, and federal law enforcement agencies, local universities, and community members. The TAC will assist the Academy and support the effective training of recruits, officers, and civilian personnel through a collaborative review of the Annual Master Training Plan. Under **CD Paragraph 248** the committee is comprised of the following:

- (a) The Training Academy Liaison and select District Training Coordinators
- (b) One NOPD command staff member (Deputy Superintendent or above)
- (c) One community representative from the Police-Community Advisory Board
- (d) Two representatives from area colleges and universities
- (e) One police professional from outside the NOPD with expertise in model training practices
- (f) One representative from the FBI
- (g) One representative from the U.S. Attorney’s Office
- (h) One representative from the District Attorney’s Office
- (i) One representative from the City Attorney's Office

For the 2026 AMTP, the TAC focused on the Training Needs Assessment as the basis for their design review. A primary duty of the TAC is to provide input into the Training Needs Assessment to ensure that the Annual Master Training Plan successfully addresses community issues. The TAC has assigned its members to actively solicit information from community groups and other sources to gain their shared expectations for the responsive training of NOPD personnel.

AMTP AND TNA DELIVERY SCHEDULE

The Academic Director is responsible for conducting the TNA in accordance with the schedule for delivery of the AMTP. The TNA Priority Ranking Matrix and Summary Report is to be completed by August 15th of each year. The AMTP shall incorporate the TNA and be reviewed by the TAC, with final submission to the Superintendent by August 31st.

III. ADULT LEARNING

ADULT LEARNING TECHNIQUES (CD Paragraph 256)

Adult learning methodology will include job task related scenarios, role play, group interaction, and problem-solving activities. Most adults learn best by experiencing a blend of activities that promote the three learning domains. Listed below are the three domains targeted for adult learning and the instructional design that best relates to the selection of a teaching method:

“Cognitive”- refers to knowledge or a body of subject matter: *lectures, brainstorming, discussions.*

“Affective”- refers to attitudes and beliefs: *clarification exercises, group process activities.*

“Behavior” – refers to practical application: *role play, simulations, teach-backs.*

The Academy intent for instructional design is to identify when traditional lectures are appropriate, enabling officers to learn best through lectures, discussion, and brainstorming. Instructors must also seek out those opportunities when officers will learn best through a hands-on approach, actively exploring the subject material. The Academy curriculum design will recognize that adults bring experience to each learning activity, and they expect teaching to be relevant and practical. Instructors must actively involve participants in their own learning process by encouraging discussions and organizing content around tasks. Officers must see a reason for learning and how it is applicable and useful to their work.

PROBLEM-BASED LEARNING STRATEGIES

Problem-Based Learning (PBL) is an instructional strategy that promotes active learning. Adults are problem-oriented and want to apply what they have learned, relating the connections between classroom theories and practical application. Problem-Based Learning enables the learner to acquire critical knowledge and then utilize this awareness in self-directed learning strategies and to solve team assigned challenges.

Instructors as facilitators, received professional development in how they can best utilize problem-solving activities as a part of the learning experience. This method often challenges participants to work cooperatively in groups to seek solutions to real world problems. Classrooms are arranged into pods to initiate the team concepts inherent to PBL scenarios. The

method is most effective when the problem is posed so that the recruits/officers discover that they need to learn some new knowledge before they can solve the proffered problem. PBL is an experiential learning model that promotes police officer competencies and critical thinking skills and is linked to real time interpersonal decision making.

A key element of PBL activities is to combine decision making with policy and legal guidance, thus requiring the recruit/officer to articulate the reasons for their actions. This aspect reinforces knowledge and application of desired performance objectives, translating to improved standards criteria in the submittal of Field Interview Cards, Use of Force Statements and Probable Cause justification.

THE “PROBLEM BASED LEARNING” IN-SERVICE CURRICULUM

The PBL instructional model features officers from assorted disciplines working together in cohort learning group interaction (5-7 officers). The classroom is assembled into a pod configuration to foster team-based activities throughout the In-Service week. The groups are challenged with problem scenarios, which were developed from the learning objectives identified in the TNA process. Objectives will target performance improvement in the fulfillment of select Department strategic initiatives, policy compliance and community concerns. The intent is to stimulate interactive discussion in team problem solving, and to apply the student’s knowledge and experience into creative solutions for real-life situations. The problem is not easily solved and is designed to encompass multiple relational issues. Effective problem solving will require officers to consider a variety of responses in completing their group assignment. Action plans are not only oriented towards problem resolution, but group collaboration and initiative as well.

Each team is assigned assorted tasks to complete within the scenarios, requiring the reference and application of resource materials that are distributed with each activity packet or by classroom presentations. This requires the officers to review targeted policy chapters and guidance to formulate their responses. The instructor(s) then facilitates discussion and evaluates responses as each group presents their respective task assignment. Upon completion of all presentations a collective and shared problem-oriented solution will result.

The PBL based curriculum also includes hands on “scenario based practical exercises” in areas such as handcuffing, tactics, batons, and the taser. The PBL courses and the practical exercises are often interrelated, building upon knowledge emphasized in the classroom activities.

USE OF THE TRAINING NEEDS ASSESSMENT AND PROBLEM BASED LEARNING IN LIEU OF THE TRAINING HOURS REQUIRED IN EACH CD PROVISION

Beginning in 2020 the Academy was authorized to employ the training needs assessment to address key topical training areas mandated within the Consent Decree and determine which are better suited to PBL delivery. Each year's training agenda must focus upon those operational and performance concerns deemed most significant for that year. The selections from this list must avoid unnecessary repetition of matters which were addressed in recent training courses or have been achieved by other methods, such as daily training bulletins or computer-based learning modules. Each sub-paragraph requirement also does not necessitate that it be individually presented in a separate timed parameter course. A modification request to amend the Consent Decree in this regard has been submitted in 2023 and is pending. This will formally allow the Academy to continue utilizing the TNA process to determine the topical area priorities versus adherence to specific hourly requirements directed for annual in-service refresher training.

SCENARIO BASED PRACTICAL EXERCISES

Scenario-based exercises are utilized to reinforce topical areas throughout the program curricula with the intent to task officers and recruits in their application of the knowledge or proficiency intended. Simulation drills are an effective teaching tool and serve as an essential element of adult learning. Scenario based practical exercises are featured in tactical courses and have been expanded to evaluate the application of physical skills with interactive decision making from policy guidance.

Instructors have received directions in scenario design in how exercises reinforce the theory and practical execution of the course objectives. Academy instructors also received training in the best practices for development and measurement of scenario-based training iterations.

Scenario exercises will be included whenever deemed beneficial towards the intended learning for both classroom and physical tactics courses. By incorporating real-life practical exercises, the decision-making component of police work is effectively challenged. The exercise design will be described within the lesson plan or with the submittal of a Practical Exercise Plan and include the desired performance outcomes. A consistent expectation is for officers to practice the how and why they reacted and successfully articulate the justification for their individual decision. Small practical exercises also occur randomly within the Recruit Academy schedule and are designed to reinforce prior learning.
